IN MEMORIAM

MRS. ALEX MCAULAY

The passing in her home, Souris East, P. E. I., on Nov. 15th, 1948, of Mrs. Alex McAulay at the age of 73 years was learned by the people of the community with a feeling of sincere sympathy and regret in the loss of a beloved resident and neighbour to the community in which she lived.

The deceased was a daughter of the late Michael Christian St. George, and Margaret McDonald, Little Pond. The late Mrs. McAulay was possessed of a kind and cheerful disposition which endeared her to all who had the pleasure of her acquaintance. Having a high regard for honor and always a supporter of Christian ideals she stood for advancement of church and community affairs. In this spirit she will be best remembered in the hearts and minds of those who were associated with her at all times. Notably in her home where the deceased extended a warm and cordial welcome to all, will her presence be keenly felt, but also in the neighbourhood where she exercised the qualities of a neighbour and in her many acts of kindness and good will to all who at any time needed her assistance. This was in keeping with her devout religious spirit which she at all times exemplified. She leaves to mourn her passing one son Joseph H. on the homestead; also a host of sorrowing relatives and friends who will always cherish her memory.

Her funeral which was largely attended, was held on Friday, Nov. 17th, to St. Mary's Church Souris, where Requiem High Mass was sung by Rev. Fr. Murnaghan who also conducted the services in the cemetery where she was tenderly interred in the solemnity the Catholic church provides for her faithful departed. Her husband and one son predeceased her a number of years ago. May her soul rest in peace.

The pallbearers were Messrs Aeneas McDonald, Peter McAulay, Roy McDonald, Anslum McDonald, James Poole and Andrew McDonald.

1948 TOBACCO CROP

Harvesting of Canadian tobacco is now completed and with yields in Ontario considerably reduced by hot weather, the crop is much smaller than was anticipated in August reports. The crop, including all types, is now estimated at 109,055,000 pounds compared with the pre-harvest estimate of 128,881,000 pounds. The current estimate however, is two per cent greater than the 1947 crop of 106,888,000 pounds. Hot, dry weather during the latter part of August and most of September cut the yields of flue-cured tobacco in Ontario considerably and accounted for the greatest loss since the first estimate. Average yields of flue-cured tobacco in Ontario were reduced 20 per cent per acre. The total flue-cured crop is now estimated at 87,756,000 pounds compared with the August estimate of 103,826,000 pounds. Yields of burley tobacco were also lighter than expected and the crop is now set at 11,952,000 pounds or 688,000 pounds less than was produced in 1947.

A reduction in the estimates of both acreage and yield of dark tobacco brings the estimate of production to 1,687,000 pounds, a reduction of 12 per cent since August. There was little change in the estimated production of cigar tobacco. Production in Quebec is still estimated at 5,500,000 pounds but a revision in the acreage and lower yields in Ontario resulted in a decline from 825,000 pounds in August to 750,000 pounds. Pipe tobacco is still expected to amount
