WESTERN GUARDIAN

THE DRAMATIC club of St. Mary's Church, Indian River, will present a four act comedy drama, in Indian River Hall, on Wednesday evening, May 1st, at 8 o'clock. Sale of candy.

UNITED CHURCH OF CANADA Kensington, May 9th. Rev. J. R. Saint, D.D., Minister: 9:45 a. m. Sunday School: 11 a. m. Rev. Clarence MacKinnon, D.D., of Pine Hill Divinity Hall, Halifax, will preach: 7:30 p. m. Red Lights upon the Track of Life—Samson. Special music: 3 p. m. First Church, Summerfield. A cordial welcome to all.

C. G. I. T.—In the Epworth Hall last Friday evening the C. G. I. T., of Trinity United Church were given an excellent talk by Miss Stella Bowness. Her subject was "My Camping Trip in the Mountains," which proved very interesting and instructive to the girls. Miss Bowness was given a hearty vote of thanks for her delightful talk and all expressed the hope that she would give them the pleasure of learning more about her travels in the Canadian West.—S

START OF THE LOBSTER SEASON—On account of the rather strong weather on the North Shore on Friday last and a scarcity of bait in some sections the lobster fishing season did not get off to a very brisk start. The herring have, however, now struck in and everything is in full swing with some good catches of lobsters already reported. The herring have also struck in at Summerside and from a number of nets set out from eight to twelve barrels a day have been taken since the first haul of eight barrels on Saturday last.—S

DIED AT RIPE AGE—Word has been received of the death in Amherst, N. S., on Thursday last at the ripe age of 93 years of Mr. Douglas MacLeod, stated to be the oldest resident of that town. The late Mr. MacLeod was born in the Isle of Skye and came to Prince Edward Island many years ago. In recent years he has resided with his nephew, Mr. Norman MacLeod at Amherst. The deceased, despite his advanced years, was possessed of vigorous health and was a familiar figure on the streets of Amherst and showed an active interest in town affairs at all times. He was twice married, his second wife having predeceased him four years ago. There were no children by

either union, surviving relatives now residing on the Island are Mr. William and Mrs. Katherine MacLeod. The funeral took place at Amherst last Saturday afternoon.—S

TWINS FOR THE SECOND TIME—Congratulations are being showered upon Dr. and Mrs. J. A. MacPhee, of Summerside, on the arrival on Sunday of twins, a bonnie boy and girl. Mother and children are doing fine. This is the second time the stork has left twins at the MacPhee residence. The previous pair being boys, now five years old and fine specimens of boyhood.—S

FUNERAL NOTICE—The remains of the late Mr. Henry W. Crabe, who died last week at Hartley, New Jersey, arrived at Summerside last night, accompanied by his brother-in-law, Mr. W. J. Whitney. The funeral will take place this (Tuesday) afternoon at 2 o'clock at the residence of Mr. and Mrs. Whitney, Summer street, Summerside, where the service will be held. Ven. Archdeacon White officiating, and thence to the family plot in the People's Cemetery.—S

CLOSE GUESSING IN CONTEST—Much interest was displayed in a novel contest got up by Messrs. F. W. Strong & Co., Summerside, in guessing the weight of the large bag of flour on show in their window for some time. The winners were announced on Saturday night; the guessing being remarkably close. The correct weight of the flour was 245 lbs 3 3/8-ozs. The winner of the big bag was Mr. Howard McCormick, Summerside, who guessed 245 lbs 3ozs. Smaller bags were presented to the second and third nearest guessers, who were Mr. Arthur Perry, of Summerside, (245 lbs. 5 ozs.) and Mr. J. E. Schurman, Summerside, (245 lbs. 5 1-2ozs.). There were no strings whatever to the contest as the contestants were spread all over Prince County the result appears to indicate that townfolks are better judges of weight of flour at least than the farmers. No doubt if the guessing had been on the weight of a beast, the farmers would have been more successful.—S

PERSONALS—Mr. and Mrs. George Ryan, who have been spending the winter in Summerside have returned to their home in Charlottetown. Their many friends in Summerside will miss their friendly company.—S

Capt. A. S. Dickson, of Charlottetown, is at present a valued acquisition to the choir of St. Mary's Church, Summerside, where he took part in the services on Sunday. Capt. Dickson, who has already made a very successful canvass for membership in the P. E. I. Motor League at Charlottetown is at present in Summerside on the same mission and is meeting with good success.—S

Willie—Paw, is truth stranger than fiction? Paw—Well, it is more of a stranger than fiction usually.

Central Guardian

IN REFERENCE to the Stewart's Bakery advertisement on another page of this issue, any of these products will be delivered post paid to any part of the Island. Be sure and enclose money with order. 3511-4-30-tj

THE DUNK RIVER FARMER'S Institute will hold their next meeting Wednesday evening, May 1st, at 8 o'clock p. m. J. A. Clark and R. C. Parent of the Experimental Station, Charlottetown will give illustrated addresses.—S 3504

SHAREHOLDERS of the Charlottetown Hotel Co. are requested to bring their certificates to the office of W. K. Rogers, Thursday afternoon, May 2nd, at 2 p. m. and receive first disbursement of cash. W. K. Rogers, D. A. MacKinnon, liquidators, 3512-4-30-3i

TO TEST CATTLE—The Department of Agriculture here has received word from Ottawa that the test of cattle under the Restricted Free Area plan will start on the 12th of May beginning at East Point. Ten inspectors will be at work. The last test was made in 1926.

ENJOYABLE WHIST—There was a large attendance at the Charity Whist held in the Caledonian Hall last evening, and an enjoyable time was had by all present. Following were the prize winners—Ladies, Mrs. P. McMahon; Gentlemen, H. Vessey; Ladies Consolation, V. Tierney; Gentlemen Consolation, P. Walsh; Lucky Chair, P. Gallant.

STILL ALARM—An alarm of fire was rung in at 9 o'clock yesterday morning for a slight blaze in the waiting room at the ferry wharf. A pot of tar heating on the stove boiled over, causing some consternation at the time, but due to the presence of mind of those nearby a bad fire perhaps, was averted. Mr. John Quinn who is working on the wharf had his hands severely burned endeavoring to extinguish the blaze and was obliged to seek medical aid.

TRAIN MOVEMENTS—The Canadian National summer time schedule went into effect yesterday. This jinxity is now on, running between Charlottetown and Tignish. During the winter months she ran between Moncton and Saint John. As in recent seasons two trains are put on to handle summer traffic and freight; a train leaving at 6:45 a. m. and a second at 2 p. m., both connections coming in at 6:45 p. m. and 11:20 p. m. The first train from the boat arrived in the city last evening at 7:45 an hour and fifteen minutes late, the ferry having some difficulty in docking due to the high wind. The late train arrived here at 11:40.

FUNERAL TODAY—The remains of the late Col. Moore accompanied by Mr. Chas. Black arrived from Los Angeles, California, last evening and were taken to the MacLean Funeral Home, after which they were conveyed to the residence of his daughter, Mrs. Chas. Black, 54 Fitzroy St. They will be placed in Trinity Church tomorrow morning at 11 o'clock, the funeral service starting at 2 o'clock. The funeral will not be a military one but the casket will be conveyed to the cemetery on a gun carriage.

BIRTHS—CONNOLLY—At Victoria Ave., on April 26th, to Mr. and Mrs. James J. Connolly, a daughter. WOOD—At Port Hill on April 27th, to Mr. and Mrs. W. T. Wood, a daughter, Vivian Patricia. MCLEOD—At Lorne Valley, March 15th, 1929, to Mr. and Mrs. James M. McLeod, a son, Frederick Cobb.

JOHNSTONE—At Burlington, April 26th, to Mr. and Mrs. Ernest Johnstone, a daughter, Mary Elizabeth.

In Memoriam

In fond and loving memory of our beloved son and brother, Charles Dawson, who passed away April 30th, 1928.

Your chair is vacant in our home, The voice we loved is still, While foot-prints that we used to hear Are silent, 'tis God's holy will.

Inserted by Father, Mother, Sisters and Brothers. 35015-4-30-11.

Mrs. Hearts will receive at EDGEWATER on Wednesday, May 1st and Thursday, May 2nd, from 3:00 p. m. to 5:30 p. m. H. Doris Gill, Social Secretary. 35028-4-30-2i

Correspondence Re Georgetown Customs Office

The following Correspondence between the Associated Board of Trade and the Minister of Customs speaks for itself:—

Charlottetown, Prince Edward Island, April 17, 1929 Hon. W. D. Euler Minister of Customs House of Commons Ottawa, Canada

Dear Sir: We have been advised that it is the intention of your Department to close the Custom House at Georgetown in this Province.

We are convinced that such action would be a most serious injustice to the business interests of this Island. There are at least four principal ports here where custom entries are absolutely necessary, namely, Charlottetown, Summerside, Georgetown, and Souris. The closing of the Georgetown port would have a very serious effect on the development of Prince Edward Island, and we urgently request a reconsideration of this important matter and trust to secure an early reply advising that the Georgetown port will be operated as in the past rendering a most valuable service, particularly to the eastern section of this Province.

For your further information the following is a summary of the business transacted at this port during the past year.

- Vessels arriving coastwise (from points in Canada)—147. Vessels departing coastwise (to points in Canada)—136. Vessels arriving from foreign countries—20. Vessels departing to foreign countries—33. Date of last sailing from Georgetown during past season Jan 20, 1929. Net tonnage vessels arriving coastwise—15,097. Net tonnage of vessels departing coastwise—6,661. Net tonnage vessels arriving foreign—10,184. Net tonnage vessels departing coastwise—18,957. I am, Very sincerely yours, President Prince Edward Island Associated Boards of Trade.

Ottawa, April 25th, 1929. Dear Sir:— I have received your letter of the 17th instant with regard to the closing of the Customs office at Georgetown, P. E. I. The following is a statement of the business at this point during the last fiscal year: Import duty—\$466.46. Import entries—95. Entries outwards—15. Railway Reports Inwards—37. Seagoing vessels arrived—11. Seagoing vessels departed—15. Coasting vessels arrived—128. Coasting vessels departed—125. Excise taxes—\$481.48. Excise entries—55. May I point out that we have authorized the postmaster to enter and clear seagoing vessels and as far as

possible to do so. The present visit to Prince Edward Island completes a coast to coast tour of Canada. It is the intention of the company to visit Newfoundland before returning home. Tempting offers have been received from the United States, and it is probable that an American tour will be planned for next year. In the meantime, they are well content with the success of their Canadian visit, and hope to repeat it at some future date.

EVERY HOME SHOULD HAVE LARVEX MOTH PROOF SPRAY The odorless, stainless and non-inflammable preparation which makes woollens, clothing, furniture, rugs, etc., moth proof. Price \$1.75 With Sprayer. \$1.00 Without Sprayer.

LIQUIDATORS APPOINTED AT MEETING

A meeting of the shareholders of the Charlottetown Hotel Co., Ltd., was held in the Board of Trade rooms last evening at which over three quarters of the shareholders were represented. A resolution to wind up the affairs of the Company was passed unanimously, and Messrs. W. K. Rogers and Col. D. A. MacKinnon were appointed liquidators. The first cheques in connection with the distribution of the assets of the Company will be paid out on Thursday afternoon at 2 o'clock, at the office of W. K. Rogers. Shareholders will please bring their certificates with them.

PERSONALS

Mrs. A. C. Duchemin has entered the Prince Edward Island Hospital for treatment. Her many friends hope for an early convalescence and a complete recovery to health.

the coasting vessels are concerned they can call at Georgetown as in the past but will simply be required to report their voyage at the next customs port.

Mr. S. A. McDonald, President, P.E.I. Associated Board of Trade, Charlottetown, P. E. I.

As a matter of sentiment I regret having to close an office which I am told was opened before Confederation, but you are probably aware that the Parliamentary Committee and Royal Commission on Customs and Excise both recommended a material reduction in the number of the ports and since the beginning of the present year we have closed over two hundred.

Yours very truly, W. D. EULER.

Splendid Concert

Continued from page 1—

The concert will be repeated tonight with an entire change of programme, and those who were not in the Prince Edward last night, simply cannot afford to miss tonight's performance, for the singing of this choir is well, the treat of a life time.

Since their visit here last September the Imperial Singers have met with a most enthusiastic reception in such cities as Montreal, Toronto, Winnipeg, Calgary, Edmonton and Vancouver, in the course of their trans-Canada tour to the coast.

Warm appreciation of the manner in which they had been received throughout the Dominion was expressed by Mr. R. Festyn Davies, musical director of the company in an interview with The Guardian last night. Mr. Davies said that since landing at Quebec on Sept. 22nd the tour has been a splendid success. They were received with great cordiality in every Province, and the trip from coast to coast has been one of the memorable experiences of his life. He is convinced that the Maritime Provinces have a wonderful future in store for them, especially as a summer tourist resort. All the members of the company have enjoyed themselves immensely, and have written home glowing accounts of the manner in which they have been received in the different towns and cities. Mr. Davies was particularly struck with the comparative mildness of the climate. Many people in the Old Country still think of Canada as a land of snowstorms and blizzards. He found the climate during the present tour considerably milder than the average winter, and the singers have felt no ill effects from colds as a result of the tour.

The present visit to Prince Edward Island completes a coast to coast tour of Canada. It is the intention of the company to visit Newfoundland before returning home. Tempting offers have been received from the United States, and it is probable that an American tour will be planned for next year. In the meantime, they are well content with the success of their Canadian visit, and hope to repeat it at some future date.

Feed Nobody ever got very far in dairying by buying most of the feed. Let us use home grown feeds. Every Dairyman must work out his own feed ration, using first the feeds he can grow, buying only the feeds he cannot grow. All feeds must be grown on somebody's farm, and we can grow them for us. Soiling crops such as oats, peas, vetches and corn should be cut and fed daily to cows when pasture begins to get dry.

The expert Dairyman don't need anyone to tell him how to mix rations for cows. A cow is made to handle bulky feeds. Give her all the roughage she will eat up clean in winter. A good rule for feeding grain is to give her one pound of grain per day for every pound of butter fat she produces per week. The only way to tell whether a cow is getting enough feed for her best production is to gradually increase the feed and weigh the milk to see whether she is

Card of Thanks

Mr. and Mrs. Peter K. MacFadyen wish to thank the many friends and neighbours for all the kindnesses received during the illness and death of their little son and brother; also for the many letters of sympathy received. 35010-4-30-11.

Card of Thanks

Mr. Ira Huestis and Mrs. Barbara Craswell, Wilnot Valley, wish to thank their friends and neighbours for the many acts of kindness shown to them during their recent sad bereavement, also the friends who sent such kind messages of sympathy. 35019-4-30-11.

AT ROTARY

Mr. J. A. MacDonald, Provincial Dairy Superintendent, was the speaker at Rotary yesterday. His address on the necessity of the "dairy cow in agriculture," was listened to with much interest by those present. Mr. MacDonald spoke as follows:—

Mr. Chairman and members of the rotary club. I appreciate very much the interest the Rotary Club is taking in the Dairy business. I always thought the industry didn't get the publicity its importance demanded. The prosperity of a community is gaged by the condition of its live stock and this being an agricultural province the prosperity of the farmer is reflected in the business life, and so it is good business for everyone to give the live stock business a boost.

Necessity of the Dairy Cow in Agriculture.

Wherever the Dairy Cow has taken her rightful place and man has done his part, we find the highest type of farming. We find farmers living on their farms getting the very most from the farm crops, and an income every week in the year. We also find a debt free people with minds and hands alert from steady employment. We find a good citizenship and a good agriculture.

We need the Dairy Cow to break the monotony of one crop in summer and months of inaction in winter. We need profitable cows giving us a monthly income which will enable Farmers to build real homes, not merely a place to stay. We need cows to change the farmers winter idleness to profitable work. We need the Dairy Cow to stop the drain of fertility from the land to pay off the mortgage, and erect good buildings.

It seems a great financial loss to this Province that is so admirably adapted by nature for dairying that only one third of the farmers are Patrons of Cheese and Butter Factories. And the revenue received from the Creameries and Cheese Factories is only slightly over one million dollars. And the value per cow with last year's high prices averaged approximately \$35.00 per cow. By eliminating the best cows from that average many of our cows must have been kept at a loss to the farmer.

Our climate is ideal for Dairying, cool nights in summer and modern temperatures in winter, abundance of the very best of water and good pastures. Our Creamery and Cheese Factory output should be at least double the present make. The quality of our Dairy Products are second to none. What we want now is quantity. The only way to bring this about is better feed, and care, weeding out the boarders and scrub bull.

The Farmer who wants to start Dairying and must buy foundation stock may be obliged to buy cows to start with, but few men ever made a success of Dairying when they depend on buying cows. It is not always necessary to pay big prices to get good cows, but never buy a poor cow because you can get her cheap. If we already have common stock and cannot arrange to get better ones to start with, then let us take care of those we have, so that they can do their best, and by the use of good sires raise calves that will be better than their mothers, and get a start in that way. Starting with mongrel low producing cows is a pretty slow way to get a high producing dairy herd, yet by continued use of good sires a good herd can be developed from the commonest kind of foundation stock. The best way to judge a dairy cow is by weighing her milk, keeping a daily record of the amount she gives, testing her milk to find out how much butter fat she gives and keeping a record of the feed she eats, so we can tell whether she is paying for her feed and labor with butter fat. This is the surest way to judge a cow. When we buy cows that have had records kept by honest dairymen we know what we are buying.

Feed

Nobody ever got very far in dairying by buying most of the feed. Let us use home grown feeds. Every Dairyman must work out his own feed ration, using first the feeds he can grow, buying only the feeds he cannot grow. All feeds must be grown on somebody's farm, and we can grow them for us. Soiling crops such as oats, peas, vetches and corn should be cut and fed daily to cows when pasture begins to get dry.

The expert Dairyman don't need anyone to tell him how to mix rations for cows. A cow is made to handle bulky feeds. Give her all the roughage she will eat up clean in winter. A good rule for feeding grain is to give her one pound of grain per day for every pound of butter fat she produces per week. The only way to tell whether a cow is getting enough feed for her best production is to gradually increase the feed and weigh the milk to see whether she is

giving more and whether the milk is paying for the extra feed. Many a cow is a poor milker because she gets too much abuse and not enough to eat. It takes a certain amount of feed for a cow to live on, and then if there is any over she will make milk if she is a good dairy cow. Many dairymen keep themselves poor hauling milk and cream to market, and hauling back feed that costs as much as he gets for his milk and cream.

Markets

It is a crime for any man who owns a cow to sell a pint of milk or a pound of butter before his children, his wife and himself have milk to drink every day, and cream and butter to eat every meal. There are many dairymen who are anxious to get the milk or cream can full, and depriving his family of the best food on earth, and for which there is no substitute. These facts make the market for milk and its products the most staple of anything produced on the farm. The amount of these products used will largely depend on the quality.

Milk is recognized by all leading authorities as the lowest priced, most readily assimilated and most desirable food for practically all, but more especially for children, invalids, old persons and the sick. Milk is a food prepared by nature and the necessary nutriment for the development of the human and animal body are present in the proper proportions. No article of food is so easily spoiled, or so readily rendered unsafe as milk. The fact that it is so largely the food of the young and the ailing is all the more reason that proper care in handling and distributing should be taken to keep it free from contamination when served to the consumer.

Certified milk is sanitary milk produced under the strict supervision and according to the rules of some health authorities. The herd producing it is examined as to its healthfulness, the sanitary conditions of the barns and surroundings. The bacterial count and age of milk are carefully watched. If these conditions come up to the standard, the owner of the place is granted a certificate showing that he is authorized to sell certified milk. Certified milk has all the qualifications of a perfectly sanitary food, but the price is so high as to be almost prohibitive for the mass of common people. The only alternative seems to be pasteurized milk. This can be supplied at a reasonable cost, and if properly pasteurized will be as safe as certified milk. The quantity of certified milk produced is very small, nevertheless this product is of great value in feeding infants and invalids, and has an indirect beneficial influence upon the general milk supply.

Dr. Sharam of Columbia University is stressing the value of milk and its product as a food, recommended the following divisions of a \$10.00 bill, milk and its products \$4.40, vegetables and fruit \$1.70, bread and cereals \$1.30, meat and fish \$1.20, eggs 60c, sugar 30c, miscellaneous 50c.

The fact that this product of the cow is so essential and economical as a food for man and beast, particularly the young who never develop properly unless they get a sufficient quantity of the proper foods the first years of their existence places a serious responsibility on the shoulders of the producers and distributors.

Today the most encouraging feature of the Dairy Industry is the increased pro rata consumption of Dairy Products. The findings of the National Dairy Council of Canada gives the consumption per capita per year as 28.54 pounds butter, 3.92 pounds of cheese, 40.76 gallons of milk, and an increase of 25 per cent during the last ten years. This was largely brought about by advertising and education carried on by the National Dairy Council in conjunction with the Red Cross and Health Authorities. Many School Boards are furnishing a half a pint of milk a day for the children at lunch or during the day, also many of the large manufacturing concerns in the United States furnish milk for their employees during working hours and they found it a good investment. They done more and better work and lost less time from sickness since they started this practice. Another reason for the increased consumption is the improved quality of our Dairy Products. We know how much more butter and cheese we eat or milk we drink when the quality is good. With these facts before us it behooves the Dairymen of this Province to put more forethought into the feeding, breeding and care of their dairy stock, as well as putting her products on the market in a hygienic and sanitary condition, particularly where raw milk is fed to children.

The price of Dairy Products are subject to the law of supply and demand like all other farm products, but the very essential place they hold as a food leaves the farmer with a safe market, and Dairy Products will always range high enough to profit the man who takes good care of good cows. Don't let anyone discourage you in

BABY'S SKIN

New Ointment Gives Quick Relief from Scalds and Eczema

The special prescription of a famous physician, and tested in hundreds of cases, "Soothing-Salve" enables every mother to quickly relieve the baby from Scalds, Eczema, and Rash. This new ointment is wonderfully soothing to inflamed spots and raw surfaces, relieving the itching and burning and quickly clearing the skin. 50c at all druggists.

It costs you nothing if you do not benefit. After using two boxes of "Soothing-Salve" if you are not satisfied just return the empty tins to Fruit-Salves Limited, Ottawa, Ont., and we will refund your money.

New Apartments Provide Service Of Modern Kind

A decided acquisition to the housing accommodation of the city has been provided by Mr. E. S. Blanchard, B. Arch., whose new and splendidly equipped building, the Cavendish Apartments, has just been completed on the south west corner of Water and Pownall Streets, overlooking the Hillsboro River and harbor.

The building comprises eight apartments of modern design and handsome appearance, including four of the duplex type with bedrooms over living quarters. Each apartment has three bedrooms, living room, dining room, kitchen and bathroom, with a balcony over each kitchen, and closet in every room. There is also a built-in moth-proof cedar chest, for each tenant with complete janitor service, the janitor's premises being over the garage. A house telephone system connects each apartment with the front door and the janitor's quarters.

Each living room has an open fire-place with ash chute to the cellar. The living rooms are 24 feet long, the dining rooms being 19 feet. The bathrooms are finished in white enamel, with plate glass mirrors and medicine chests. Each kitchen is wired for electric stove and refrigerator, and has a built-in cabinet and ironing board. The rear door of each kitchen opens on the janitor's stairs, and a dumb waiter in the hall connects with the basement.

There is garage accommodation for seven cars and storage facilities are provided in the cellar, there being a separate locker and coal bunker for each tenant. The Dunham Differential Vacuum heating system, modern and efficient in every way, has been installed.

There is a handsome lawn, 30 by 35 feet, on one side of the building, and an attractive hedgerow has been planted all around. The view across the Hillsboro river and harbor is an exceptionally fine one, the full benefit of the sun being received throughout the day. Altogether, the apartments are a credit to Charlottetown and will provide the most serviceable and up-to-date accommodation that modern architectural ingenuity can devise.

The building which is now the Cavendish Apartments has quite an interesting local history, it being at one time the Charlottetown Electric Light plant. Later it was used by the Robert Simpson Company as a canning factory, and subsequently by Mr. George Toombs as a salt warehouse. The building needless to say, has been completely altered by Mr. Blanchard, the exceptionally high ceilings making it possible to convert it from a three to a four storey structure; and the exterior as well as the entire interior have been remodelled to suit its present purposes.

The Dairy business. You may not be making as much money as you would like to, but there is nothing fundamentally wrong with the dairy business. The good Dairy Cow is the mainstay of our agricultural districts and she will keep right on the job, don't let anyone tell you different. She has been and will continue to be man's best friend.

We need the products of the Dairy Cow for the proper development of the rising generation to build up strong minds and bodies—to enable them to take a place second to none as builders of this great country. It is truly said of the Dairy Cow she is the Mother of Prosperity.

This address was the last of the series put on before the Club by the rural-urban committee, Rotarian James P. Crockett was in the chair. At the close of the address, Rotarian J. O. Hyndman suggested that the Rotarians arrange for a picnic at the Experimental Farm this summer at which the members of the Boys and Girls Live Stock Clubs would attend.
