SIR THOMAS WHITE AT WASHINGTON

New York.—A special despatch from Washington to the Tribune this morning says: "The general financial situation between Canada and the United States, growing out of the commercial relations between the two countries, was discussed at a conference between the Secretary of the Treasury and Sir Thomas White, the Canadian Minister of Finance, today. Sir Thomas said that 'until quite recently exchange has been normal between the two countries, but lately it has gone slightly adverse to Canada. The reason is that during April, May and June Canadian excesses of imports from the United States have more than proportionately increased. For April and May the excess was more than double what it was for April and May, 1916. The situation could be readily remedied by a loan or loans in the United States.'"

THOUGHT SHELLING WAS CELEBRATION.

Collier Forced Sub. to Submerge in Azores. AN ATLANTIC PORT.—The bombing of St. Michaels, Azores, on July 14th, by German submarines was at first thought to be a Fourth of July celebration by American naval ships in port, said the captain of a British steamship from Lisbon and St. Michaels, which arrived here today.

The firing began early in the morning, he said, but as the shells commenced to explode over the city, the illusion that it was part of an Independence Day programme was quickly dispelled. An American collier in port returned the submarines fire with such precision and volume that the undersize craft soon submerged. The British steamship captain, who was an eye witness of the fight, said the U-boat was 300 feet long and carried two guns. One girl and a man were killed in St. Michaels by the German shells.

JUSTIFIABLE BOAST ON ROADMASTERS' WORK

Two new road masters of this year who deserve great credit for the excellent work they have done are Mr. William Howatt of Albany and Mr. Arthur Green, of Searle town. Mr. Howatt had his section of the road widened eight feet more than the average for a distance of almost two miles and had the remaining three miles widened to a considerable extent. Mr. Arthur Green did work which is a delight to the eye, and a pleasure to the travelling public. From Albany station to Searle town school, a distance of 2 1/2 miles, the road is 40 feet wide part of the way and in no place as is less than 30 feet wide. Mr. Green has just completed about six miles of the finest country road to be seen on this Island. While a novice at the work he has proven that he is capable of becoming a first class roadmaster. Mr. William Thomas, of North Tryon, deserves much praise for the manner in which he handled the road plough. Mr. Thomas is certainly an expert in this kind of work. This road, on account of the splendid manner in which the work was done is most highly commended by motorists touring from Summerside to Charlottetown.

VICTORY HINGES ON WORK IN SHIPYARDS.

Admiralty Appeals to Builders for More Tonnage. LONDON.—The Iron and Steel Confederation of Great Britain received the following message, signed by Sir Edward Carson, First Lord of the Admiralty, and Admiral Jellicoe, First Sea Lord: "The Board of Admiralty wish to impress on all engaged in the building and repairing of ships how serious are the times in which we live. A determined enemy has set himself to blockade our islands and destroy merchantmen bringing food to our people and supplies to our armies, using methods contrary to the law of nations. Every day merchantmen are sunk. We need all our resources to prevent the threatened starvation. The enemy knows this, and has staked everything upon it. If he succeeds victory will rest with him; if he fails his defeat is certain. "There are only two weapons we can use, both forged in our shipyards. One is a class of warship that will enable the navy to hunt down and destroy submarines; the other is every new merchantman that will replace a ship sunk. These weapons must be used together. Upon the men in the shipyards and engineering shops depends entirely their output. How the latter can be increased concerns everyone, and no measure which will enable the better use of labor and machinery can be neglected. We who are secure in our homes owe it to the brave men dying every hour for us at sea, on land, and in the air to spare no effort to give them the weapons with which to give Idhif weapons with which to win the war. "We are confident that in this supreme crisis in our history the men of the shipyards and workshops will see that this appeal does not fall upon deaf ears."
