New Scale Williams Piano's Tone Powerful and Rich

Crystal Brown, a young Toronto tenor, who has risen to a top position in musical ranks, and is now leader of one of the largest city choirs in Erie, Pa., paid a visit to the Toronto Exhibition and called at the exhibit of the Williams Piano Company, Limited, of Oshawa. After examining the New Scale Williams Piano, he expressed his opinion of it in the following words: "I was surprised to find such beautiful quality of tone, so wonderfully powerful, and of such rich sustaining quality. It is equal to any piano I have ever tried. I was particularly pleased with its elastic touch, and the ease with which the tone lends itself to the wishes of the performer. I think the New Scale Williams is equal, if not superior, to any American make of piano."

ENGINEERS REPORT ON CITY ELECTRIC LIGHTING

The report submitted by the expert of the Delano-Osborn Engineering Company of Toronto, Canada. H. T. Harrison first dealt with sources of water power available for a plant. He had first visited Moore's Mills, Hunter River and New Glasgow, and later Morell. While the last was the most suitable for furnishing necessary horse power it would only develop about 210 horse power which was entirely inadequate. He therefore did not recommend the consideration of utilizing water power.

FIRST.

Estimating on an up-to-date steam plant in every particular for street lighting alone at local rates for material and workmanship here he gave the following:—

Building 40 x 60, brick and steel, with slate roof,	$3,600

2 boiler feed pumps, etc.,	750
85 H. P. simple non-con. engine,	1,280
60 K. W. A. C. generator, etc.,	2,120
Steam Piping,	1,000
100 arc lamps, etc.,	3,650
Pole line,	3 850
Engineering fees	$2500
Total cost of plant	$21.500

Total	$3479

FIXED CHARGES.

Insurance	100
Total	$1900

On this basis for an all night service, every night schedule net cost to city per lamp $70.79

Cost per lamp operating on a moonlight system $56.87

Calculating increased insurance the cost of wooden building would be only $10 per year less with much increased amount for repairs.

SECOND.

Estimating on the power and equipment for lighting streets and supplying commercial lighting for 7000 sixteen candle power incandescent lights together with power for furnishing small powers the following figures were given:

Building 75x105 brick and steel slate roof etc.	$12.000
3 250 H. P. water tube boilers etc.	$10,500
2 boiler feed pipes &c.	1.200

ANNUAL OPERATING EXPENSES.

Salaries and Labor	$ 5900
Fuel, Street Lighting	1642
Carbons	94
Fuel for Store Lighting	1620

Oil, Waste, etc.	600
Total	$ 6004

FIXED CHARGES.

Interest	$ 3925
Depreciation	3250
Insurance	500
Total	$ 7650

The report recommends the installation of a power plant for street and commercial lighting with brick power house which would properly light streets and give lighting at a nominal cost besides being a source of revenue to the city. The report also recommends that city water works and sewerage pumping station be operated from the same plant. The total cost of these changes would be about $10,000 and would mean a saving over present operating expenses of from $1,800 to $2,000 yearly.
