

IF To Men of Ambition
Ages 21 to 50

THE CONFEDERATION LIFE ASSOCIATION

Needs active, intelligent, ambitious young men, who are desirous of bettering their present status to look after its interest in various districts of P. E. Island—several vacancies are open—including two General Agencies and a number of local agencies.

Previous experience not required or essential—the best qualification is willing to learn—not under the age of 21 or over 50. Ambition to be something a little more and better than you now are—sober and industrious.

WE WILL INSTRUCT, DEVELOP AND ASSIST YOU AT ANY TIME

Apply to
CONFEDERATION LIFE ASSOCIATION
156 Richmond Street, Charlottetown.
Established 1871 P. O. Box 326

FACTS
The Confederation Life Association was established 1871.
Its total assets as at Dec. 31, 1923 are \$36,889,701.05.
Total Insurance in force as at Dec. 31, 1923, \$168,383,791.
More Assurance sold in 1923 than in any year in history.
Was the first company to give the public the advantage of Non Medical Insurance—between 18—45—up to \$2000.00.
Its surplus as at Dec. 31, 1923 was \$3,991,328.
Policies unrestricted as to residence or occupation after one year.
Profits, are generous and show yearly increases.
And we give our Policy Holders—Service.

REGULAR SKATE AT ARENA to-morrow night.—11.
PRICES TO-NIGHT'S HOCKEY match Abbies vs. Crystals, 65, 50 and 40 cents.—11.
C. N. R. CASE—Information has been laid before Mr. Alexander Campbell, J. P. Sumner and Mr. John J. Dunan, special agent of the C. N. R. of Moncton, N. B., against a party for breaking the seal of a car in one of the railway yards in Prince County. The case is set for trial on Tuesday.
RESERVE SEAT TICKETS FOR to-night's game on sale at Hughes Drug Store.—11.
BEST GAME OF SEASON—Crystals vs. Abbies Arena to-night.—11.
HOCKEY MATCH TO-NIGHT starts at 8.15—11.
STILL RAIDED—Mr. H. M. Baker, collector of Customs in Summerside, preferred a charge before Messrs. Alexander Campbell and J. L. Palmer a few days ago, against a party in Western Prince County for having a still. It is said that when the officers of the law broke into the place more than 100 lbs. of the still in full blast and they could hear the smashing of bottles in another part of the place. One of them saw a half filled bottle near and quickly secreted it in his pocket. When the proprietor appeared he denied having any of the spirituous stuff but the production of the bottle was an eye-opener to him. He practically confessed to an infraction of the law but on the plea of this being the "first time" he was fined the minimum penalty of \$200.00 and costs (5.00), these amounts being daily paid.

Missionary Letter
(Continued From Page One)
sent the things could have seen the faces of the Korean Biblewomen and nurse who helped me unpack the parcels when I told them of the women in Canada who had made these things and sent them to us to use for the sick Koreans. They repeated expressions of gratitude over and over again.
We have been having some unexpected difficulties in our work lately, in addition to the ever present ones due to lack of equipment. One was that the man on night duty, one night heard an unusual sound coming from the hot water tank, and thinking the tank was not full enough, he tried to remedy the trouble by, as he thought, filling the tank. Unfortunately however, he did not know as much about either the tank or the furnace as he thought he did, and instead of filling the tank, he ran all the water out of the coils of the steam furnace and put the furnace out of business. So we were in cold storage for some days and most of the patients went home saying all manner of evil against the place where the foreigners nearly froze them to death—a very poor sort of advertisement for the hospital when we are working so hard to build up the place more to the departed clinic. Fortunately we were able to get a man to come from Seoul who succeeded in fixing up the furnace temporarily at least.
On the very day that we were deprived of the use of the furnace, our one and only graduate nurse, who had been with us only a few weeks, had a severe hemorrhage from the lungs and so we were not only without a nurse but had her on our hands to be looked after. Besides her, we have only one other woman who can be called a nurse at all and she has had very little training through she does the best she can. I have to attend to all the details of the operating room myself now and as the nurse is busy in the hospital all day there is no one to do much for the sick in the mud but that is the only nurse's home we have. We cannot take her in the hospital for there would be no one to look after her at night but the orderly on duty and that would never do. On the other hand, the nurse, Biblewoman and cook who live in the house with her, are afraid to stay lest they get the same disease, and though they work all day they only get a little rest at night on account of her. Her father has left her mother and gone off with another woman, so there is no home for her to go to and there is not such a thing as a sanatorium in the whole of Korea. So as we were not in a position to give her proper care, it was quite a problem to know what to do with her until the Severance Hospital in Seoul where she worked for a number of years agreed to take her in and care for her. In the meantime we are up against it for a nurse, and I am longing for the time when Miss Viola Cardwell, who came out this fall, will know enough of the language to be able to oversee the nursing and give the raw staff some training.
Such are some of the problems of work in a mission hospital. It is happy and encouraging moments when one receives gifts from home for the work, when one hears some member of the staff preaching with special earnestness, when patients are helped or cured, and when they decide to believe in Him who is the Truth and the Way.
With many thanks and prayers for His continued blessing on His work in Charlottetown and in Hankow.
Yours in His service,
FLORENCE J. MURRAY

France Ready
(Continued From Page One)
holds that admission may be made conditional upon "showing that she has the intention to keep her engagements" by, for instance recognizing, as of primary importance the acceptance of existing frontiers and solemnly pledging to meet reparations debts.
"France," said the Temps today, "did not intend to open the door to Germany, but was not digging an unbridgeable pit before the door."
Meanwhile France is not only awaiting Macdonald's development of his policy concerning Germany and the Allies, but is anxious to learn his precise intentions as to Russia. If he means to make real cooperation with the Soviet subject to recognition of the debts of the Czarist regime and compensation for seized properties, Macdonald's policy is likely to have important results for France by opening the way to a general re-establishment of relations by the little Entente as well as France and Italy and bringing back Europe's economic solidarity, with surprising rapidity.

LA DAME AUX CAMELLIAS
(By Dominion News Service.)
PARIS, (By Mail), Feb. 10.—This date marks a centenary which, though not likely to attract much attention, yet led a few literary and sentimental pilgrims to visit an obscure tomb in Montmartre Cemetery—a tomb which, on each All Saints' Day, is strewn with camellias by admirers of Dumas and of his creations. It was on Jan. 15, 1824, that "La Dame Aux Camellias" was born, at Nonant-le Pin, under the name of Alphonsine Plessis. She changed this later for the more aristocratic name of Marie Desprez, which Dumas in turn changed to Marguerite Gautier. Left motherless at an early age, and the victim of a drunken father, the pretty child became first a beggar on the highways, then a farm servant on the shores of the lake of Geneva. Later she came to Paris and after working for some time as a laundress in the Rue de Valenciennes, entered the service of a milliner in the Rue Saint Honoré. She was only 12 years old when her father sold her for the means with which to slake his unquenchable thirst, and at 15 her name was a popular toast among the gilded youth of Paris. Two years later the most famous courtesan in Europe, her beauty was the theme of poets and artists, while the most eminent wits, politicians and men of the world competed for her favour. She was only 22 when she died of phthisis, at 15 Boulevard de la Madeleine, in a tiny flat, where nothing now preserves her memory. With her head shrouded in the finest Alençon lace, and her coffin filled with camellias, the only flower whose perfume her delicate nerves could bear, she was followed to her resting-place at Montmartre, by only two friends. The appearance of her tomb on All Saints' Day affords evidence that she has more friends now than then.

Poincare Has Not Resigned Office
(Canadian Press)
PARIS, Feb. 10.—The partisan tendency of the debate in the Chamber of Deputies on economics and new taxes developed a crisis this afternoon in the course of which it was thought for a few minutes Premier Poincare would resign. Indeed, the Premier and the entire cabinet withdrew from the chamber for a short time. The discussion reached a very high tension.

Johnny Dundee is Unable to Fight
NEW YORK, Feb. 10.—Johnny Dundee's claim that he was not in champion and United States junior lightweight title-holder, is suffering from severe iodine burns on his arm and will not be in condition to fight for some weeks, according to a report of the State Athletic Commission's physicians who examined him today. This was done after the Panama Boxing Commission had asked an investigation of Dundee's claim that he was not in condition to fulfill his contract to fight Joe Lombardo in the Canal Zone on February 22.

Births
RODD.—At the Prince Edward Island Hospital, Feb. 9th, to Mr. and Mrs. James E. Rodd of Kinross, a daughter.

Deaths
MacQUEEN.—On Monday, Feb. 2nd, at the residence of her nephew Captain D. J. McDonald, St. Peter's Road, Eleanor Williams, widow of the late A. R. MacQueen, in her 64th year.
SMITH.—Entered into rest at New Glasgow on Feb. 9th, Elizabeth Anne, daughter of the late John L. Smith. Funeral from her home Monday at 2 o'clock.
McKINNON.—At the City Hospital Feb. 10th, Vincent McKinnon aged 37 years. Funeral Tuesday morning at 8.45 from his brother's residence John McKinnon 64 Dorchester St. to St. Dunstan's Cathedral thence to R. C. Cemetery.

TIPS FOR HOME
The high neckline known as the boyish type is the favorite now for those who can wear the turn-down collar. By the way, the neckwear sections of the shops are showing beautiful collars of this type. Another item of interest is that most dresses have collars and cuffs nowadays. If the boyish type is not your style use either the V or square neckline. The three types are equally modish.
A decidedly effective touch was noticed on a tight-fitting bodice of an evening gown. The deep décolletage at the back was crossed with tiny bands of rhinestones. The seven rows of glistening crystals gave a pretty finish to the dress.
The present showings of new modes indicate that the slim silhouette will continue to be the favorite at least until another winter season begins, but there is a strong tendency to the flare at the bottom of the skirt. In one model this is attained by a two-tiered circular set of flounces below the knee and a velvet dress has a deep shaped flounce flaring from the knee. All three models are in the new straight, loose, bell-shaped effect and are charming dresses.
Bosom front is not exactly a new feature in tailored blouses but it is seen more frequently in the new displays and it has become one of the newest trims in sports dresses. Even nightgowns with the V rolling collar show a set-in pleated bosom buttoning down the front and finished at the bottom with a monogram embroidered tab. A linen dress has a plain bosom in contrasting color with a drawn-work edge. Sometimes the bosom, which may be long or short, is tucked or it is plain white-teh blouse is tucked. This new type vest is often of a different material or piped in a contrasting color.
You have lived if you have loved.
A man with an ill tongue is dangerous to his city.
No one like unkindness.

Poincare Has Not Resigned Office
(Continued From Page One)
reduced to ashes, being literally burned to the ground.
From the school building the flames leaped to the residence of the Sisters of Mercy and the 16 inmates of the house were obliged to make a hasty departure. From neither building was it possible to remove any amount of the furnishings. The residence was practically destroyed, but a small portion of the wall remaining in place and this will probably have to be torn down.
The Sacred Heart school was a large four-story brick building of modern construction, finely equipped and with accommodations for some 600 pupils, who did reside in the building. The residence of the Sisters of Mercy was a three-story brick building erected about five years ago.
Authorities Investigating.
The janitor of the school building declares that it was securely locked when he left it, but the first firemen who arrived say that they found the front door open and the building ablaze in every part and with a peculiar white flame which may indicate the use of some combustible. The heating apparatus, the only source of a possible fire, was well protected. The county officials started an investigation today.
The school building was originally located by the Good Shepherd convent. Separated by a space of about 15 feet was the new convent, a nearly new three-story brick building occupied by 16 Sisters of Mercy, nearly all teachers in the school. The town has several other school buildings and it is believed that the pupils of the burned building can be cared for at least in part time sessions.
The school building was projected by Father Morcel, who went to Van Buren in 1869 and completed under the pastorate of Fr. Jannison.
The new convent was built about five years ago under the pastorate of Fr. Rulquin.

RUSTICO NORTH SCHOOL
The following is the standing for January:
GRADE IX.—1, Evelyn Woolner; 2, Mabel Woolner.
GRADE VIII.—1, Arthur Woolner; 2, Reginald MacNeill; 3, Bertha Hollings.
GRADE VII.—1, Fred Pursey and Blois LePage; 2, Lewis Woolner.
GRADE IV.—1, Robert Woolner; 2, Mary MacLean; 3, Lloyd Laird.
GRADE I.—1, Doris Warren; 2, Margaret Woolner; 3, Mary Murphy. Average Attendance 12.6. Percentage of Attendance 84.
The United States produces nearly one-third of all the matches used in the world.
Automobiles are now being exported from Canada at the rate of 177 per working day.

Truro to Have New Creosoting Plant
(Special to the Guardian)
MONTEREAL, Feb. 10.—An announcement was made at Canadian National Railways headquarters here today of the completion of negotiations with the Canada Creosoting Company for the erection of a creosoting plant at Truro, Nova Scotia.
Building operations will be commenced as early as the weather permits and the company will install equipment for the creosoting of ties and other timbers. The plant will give employment to about fifty men and the ties treated will be used on the Atlantic Division of the National Railway system. The creosoting of ties more than doubles their life.

Sacred Heart School
(Continued From Page One)
Plaid, in the brightest and snappiest of color combinations imaginable, is the newest thing for hats.
It isn't at all extraordinary when you come to think of it. We have had plaid dresses and coats, so that while plaid hats are something of a surprise they are at the same time a logical happening.
Now, your new plaid hat may be entirely criss-crossed with colored blocks and bars, every inch of it or it may have just a plaided brim or piping to show that it is a very new and altogether different sort of hat; and it goes without saying that when it is of plaid or partly so, it is small.
You will think immediately of the sports hat in connection with plaid, but to be sure, the sports hat is the only sort featuring plaids that we see at the present time, but a letter from Palm Beach describes a charming hat that hinted of more usual ways in which we may expect to find plaid used. It was a cloche of biscuit-colored tulle, and a long scarf of plaid chiffon was drawn around the crown and threaded a slit in the brim. It wrapped around the throat and an end of this filmy scarf was left to flutter in the breeze. This hat was worn with a lovely afternoon dress of biscuit-colored voile showing that plaid may associate with the dressy gown, providing its material is chiffon and its colorings delicate. Mayhap summer will bring to us some of these bewitching hats.
So vast is the supply of petroleum that the pipe lines in the United States alone, which carry it from the wells to central points for storage or to refineries, are more than enough to girdle the earth at the equator.
From eye and ear and tongue and touch and thought, reject all a false balance is abominable to the Lord, but a just weight is His delight.
A man who has not learned to say "No" will be a weak and wretched man till he does—and after.

POLICE "TAP" FAT PEOPLE
CHRISTIANIA, (Norway), Feb. 10.—A short time ago the police noticed with surprise, that an unusually large number of fat persons were to be seen in certain districts, and they decided to investigate the cause of this sudden epidemic of corpulence. It was found that the fat people were liquor smugglers, wearing under their clothes light aluminum receptacles which could hold quite large quantities of liquor.
It is said that in smuggling districts, the police now make a point of approaching any persons of unusually ample proportions, and politely asking for permission to tap with their knuckles on the suspicious looking part of their figure. If a metallic ring follows, the unfortunate victim is arrested.

GRIP STOPS COMMISSION
(By Dominion News Service.)
LONDON, Feb. 10.—Influenza has stretched on its back an entire Royal Commission, and by the irony of fate one of the oldest. Appointed in 1851, in the first flush of the success of the exhibition in Hyde Park, the Commission thus stands as older than influenza itself, which, as a separate disease of cold, dates from 1887 or thereabouts.
The great glass house of Hyde Park, became the Crystal Palace at Sydenham, and this again in 1920 was acquired as the property of the nation. The Commission, however, pursues its fate as custodians of the parties interested in national treasures there.
The Royal Commission was to have met in January, and had persuaded the Prince of Wales to be chairman, but the alarming news was circulated that the Commission to a man had 'flu, and they were all in bed.

GHOSTS AT A HOSPITAL
(By Dominion News Service.)
LONDON, Feb. 9.—Ghosts were produced by C. E. S. Phillips, the Physicist, at the Free Cancer Hospital, at a lecture on electricity at the Hospital recently.
To demonstrate the presence of rays which are too short to be seen in the ordinary way, he turned out the lights of the lecture theatre and then proceeded to produce ghost after ghost, by holding in the invisible rays produced by an electric arc, objects which had been slowly coated with a special preparation, he caused it gradually to appear out of the darkness and glow with a sickly phosphorescent light.
An apparent string of sparkling gems, which next appeared, turned out to be nothing more than a string of deformed and carious teeth, collected in the dental department of the hospital.
To show the value and power of the X rays, as at present used, a healthy live rabbit in a box was shown as a skeleton of ghastly shadow bones, with the jaw bones moving up and down, contentedly chewing something that was invisible.

Chief Justice Taft Has Recovered
(Canadian Press)
WASHINGTON, Feb. 10.—Chief Justice Taft has recovered from his recent attack of indigestion and is at his desk in his home today attending to correspondence.

NEW INVENTIONS
Two electric buttons placed beside a typewriter keyboard operate the line guide on a new copy holder for typists.
A high power air rifle has been developed that shoots a 22-caliber bullet with sufficient force to kill a small animal 100 yards distant.
In Hawaii there has been developed a machine for planting either sugar cane or potatoes with about one-sixth the labor formerly required.
For cutting meat there has been invented an electrically driven saw, mounted on a frame resembling a hand tool and controlled by a trigger.
A Frenchman is the inventor of a bottle stopper that permits an exact predetermined quantity of a liquid to be poured into an attached container.
When bread rises more on one side than the other the pans have probably touched the sides of oven. This should be avoided when placing bread in oven.
Grease spots on the rugs may be removed by mixing equal parts of fuller's earth and magnesia with sufficient hot water to form a paste. Spread this over the spot and next day brush off. Repeat, if necessary.
When there is a small leak in the lead pipe, place head of a nail over the hole and strike two or three times with hammer. This will close the hole and you will save a plumber's bill.

HOTEL VICTORIA
Offers to the travelling public a comfortable, up-to-date hotel. Contains 44 rooms with private baths. The Cuisine is famous all over Canada. Telephones in all rooms. Courteous service.
