—The Attorney General Sir Rufus Isaacs, who was examining the President of the International Mercantile Marine Company, asked if that would necessitate additional boilers being lighted. Ismay said that it would. The Attorney General pointed out that the Fireman Barrett of the Titanic had testified that additional boilers were lighted on Sunday morning. Ismay also said that a wireless despatch which Captain Smith had handed him on Sunday had indicated to him that the Titanic would reach the ice region on Sunday evening. The collision occurred shortly before midnight on that night. The witness said that there was nothing in their mail contracts to compel the company's vessels to steam at the rate they usually did in crossing the Atlantic, and that there was no cause for delay. Ismay insisted that he had nothing to do with the navigation of the ship, but Sir Rufus continued to press him regarding the speed of the Titanic and the warnings of ice in her path which they received. The witness answers were not always clear, which led to Lord Mersey to remark sharply, "answer the questions."

FATHER CHAINED AND BEAT HIS DAUGHTER

NEW YORK, June 4.—Accused of beating his daughter Jennie, fourteen years old, with the buckle end of his belt and tying her with a dog chain and a rope to a stationary wash tub, William Rampone, of No. 314 East 108th street, was before Magistrate Herrman, in the Harlem Police Court, yesterday. He was held in \$500 bail for Court of Special Sessions. The girl and her brother, five years old, to whom she had played the role of mother, were given into the custody of the Society for the Prevention of Cruelty to Children.

Rampone, according to the testimony, chastised his daughter last Wednesday until she was unconscious. Then, it was testified, he fastened a dog chain to her ankles and a rope around her waist and tied her to a wash tub and, locking the door left her with her brother.

Jennie, with the little boy's aid, escaped through a window. She sought refuge in the flat of a neighbor, who communicated with the Society for the Prevention of Cruelty to Children.

Neighbors yesterday swore that Rampone was in the habit of beating his children. The dog chain and the rope were produced in court. Rampone in defence asserted that the girl was unruly and that she frequently played "hooky" at school. He said he beat her last Wednesday for taking sixty cents and spending it on ice-cream and candy. Jennie, who is small for her age, denies her father's charges.

TITANIC WAS RUSHED TO HER DOOM

LONDON, June 4.—J. Bruce Ismay told the British court of inquiry today that it had been planned to drive the Titanic at full speed during a few favorable hours of her maiden trip, and that he considered Captain Smith fully justified in going at full speed through the ice region so long as weather conditions made it possible to see ice ahead. Lord Mersey, the head of the court which is inquiring into the disaster of the White Star liner, repeated the question whether the witness thought the captain justified in his action adding "at either day of night." Ismay replied in the affirmative. Ismay was the star witness when the investigation was resumed today. He told the court that the chief engineer had arranged before the steamer left Queenstown for New York, that the weather being favorable on either Monday or Tuesday the vessel would be driven at full speed for a
