

IMPORTANT READING MATTER SELECTED FROM THIS WEEK'S NEWS FOR THE GUARDIAN'S SATURDAY SUBSCRIBERS

MONDAY.

Rev. Dr. D. Morrison, of Berkeley, Cal., brother of very Rev. Dr. Morrison, Vernon River, is in the city. He was called home in response to the news of his father's illness but did not arrive in time to see him before he passed away. Rev. Dr. Morrison leaves this week for a trip to Europe.

The quarterly official board of the Fairville, N. B., Methodist church has granted Rev. G. A. Ross, whose home is in this city, an increase in his stipend for this year, which ends in June, of \$50, to be followed next year by an additional \$50, in appreciation of his decision to remain in Fairville and not consider the call to Sackville.

A. L. Phillips, insurance adjuster, St. John, was in Summerside on Saturday adjusting the loss on the fire in Schurman's Mill on Wednesday evening last and placed the loss at \$2,259, which is fully covered by insurance. In conversation with one of the firm The Guardian's correspondent was informed that the adjustment was satisfactory to all parties concerned.

Lieutenant Colonel M. B. Edwards is receiving hearty congratulations on his being appointed to the command of the 12th Infantry Brigade. He succeeds Lieut. Col. H. McLean, whose tenure of office has expired, and who has been placed on the reserve staff, with the honorary rank of colonel. The new command of Col. Edwards embraces three regiments of infantry, the 73rd, 74th and 82nd and the 9th Field Ambulance of P. E. I. The new commanding officer has been in the militia for more than twenty years, and is popular with both his men and his brother officers alike. - St. John Times.

At Rhode Island, on Dec. 20, 1910 there passed peacefully away Edmund J. Crabbe, son of the late Edmund Crabbe, Clyde, in the sixty-sixth year of his age. He leaves to mourn a widow, daughter of the late William Haslam, Springfield, and five daughters and four sons, three of whom are at home. The only surviving sister is Mrs. Samuel Pound Frederick. Four step-sisters, Mrs. W. F. Stevenson, Pleasant Valley Mrs. John Pound, Charlottetown, Mrs. Elsworth, Yeo, Concord; Mrs. Arthur Palmer, Somerville, and on step-brother, Joseph Crabbe, C. C. road, and his step-mother, Charlotte town, also survive him. (Foreign papers please copy.)

The death occurred at his home in Clermont on the 23rd inst., of Murdoch Gillis, one of the most prosperous and highly respected residents of that place, after a very short illness of pneumonia. Deceased was sixty-seven years of age and leaves to mourn besides his wife, who is a daughter of Stephen McDonald, Grand River four sons—Joseph in Saskatoon, Daniel in St. Augustin's College, and Sebastian at home, and two daughters—Flora in New York and Mary in Saskatoon. The funeral which was largely attended took place Wednesday to St. Mary's R. C. Church, Indian River, when solemn Requiem mass for the dead was celebrated by the pastor Rev. Mgr. Gillis.

The Wesleyan says: Mrs. Bell of York. Mrs. John Mayhew, Cornwall and Mrs. Wm Long, Grace Church city, have been appointed life members in the W. M. Society says the Wesleyan also in honor of the Auxiliary. Mrs. Black, Mrs. H. G. Lowther, Mrs. Wallace Lowther in the N. B. and P. E. Island branch Prince Edward Island is to the for in Life Membership returns reporting six. Charlottetown reports three for the second quarter, through their District Organizer. Mrs. Trusman writes from Sealestown: "Sealestown Auxiliary is very pleased to report three Life Memberships this year (The names are given above.) Mrs. Black was our first President and it was at her home that we met for the first ten years and the Auxiliary deemed it a fitting thing to present her with a life membership on the evening of the twenty-first of October the Auxiliary members and friends met at the home of G. H. and Mrs. Lowther and presented Mrs. Lowther with a Life Membership certificate, it being the twenty-fifth anniversary of their wedding. It came as a great surprise to Mrs. Lowther but she made a suitable reply from the depth of her emotion.

It's Of Interest To Every Person

How Ovia Morcotte's Bright Disease was Caused And Cured.

A Cold Was the Cause and Dodd's Kidney Pills the Cure—He Recommends Them Because He Has Proved Them Good.

Lafond, Alta., Feb. 3 (Special)—In these winter days, when nearly everybody has a cold, and the cold goes to the weak spot, Backache and other symptoms of Kidney disease are almost epidemic.

For this reason the statement of Ovia Morcotte of this place is of interest to every one. He had a cold it developed Backache, Kidney Disease, and finally the dreaded Bright's Disease. Dodd's Kidney Pills cured him. Here is his full statement: "I suffered from Backache, Kidney Disease and Bright's Disease. I was treated by a doctor, who did me no good. It was four boxes of Dodd's Kidney Pills did the work. I recommend Dodd's Kidney Pills to all persons who suffer from diseased Kidneys."

Neglected Kidney trouble brings suffering and disease, that too often proves fatal. When a cold shows you that your Kidneys are weak or disordered the only safe plan is to treat them up with Dodd's Kidney Pills. They always cure all forms of Kidney trouble.

Abbey's Effervescent Salt. Your stomach may not suggest what it needs when full of distress, but common sense suggests Abbey's Salt. Sold everywhere.

John S. McPhee, Bellevue sold two carcasses of pork to L. Coie & Thompson, Montague, last week which tipped the scales at 1140 lbs. Beat this who can.

Another Oakley Baron has sold for good money. Neil McEachern of Long Creek has sold his fast trotting stallion "Low Oakley" to W. S. McKie for more money than one of the same age ever sold for at West River, either cart or carriage bred. It pays to raise Oakley Barons.

I have noticed in P. E. I. that when a new orchard is planted out, many trees with and about pruning first year, throw up from two to three suckers around base of trunk, causing tree to die, within a few years. Please explain at next session.

I should say that the trees in question were severely injured in the trunk. This might be by blight, by sun scald or by winter killing, anything in fact that would seriously damage the trunk of the tree and interfere with the circulation so that the dominant buds at the base would develop. This is a frequent occurrence when trees are over-pruned. It also occurs when trees have been severely pruned or girdled, but if there is nothing apparently wrong with the trunk, look for blight. A careful examination will show that something is wrong. A. McNeill, Chief Fruit Division.

The death took place on Saturday morning in the P. E. Island Hospital of Benjamin B. Profit, Augustine Cove. The deceased entered the hospital some time ago suffering from blood poisoning in the hand to which he succumbed. On Saturday afternoon he was removed from the hospital and was taken by train to Cape Traverse and thence forwarded to Augustine Cove. The remains were accompanied by Mrs. Profit who came to his city on Wednesday on learning that her husband was becoming worse. The late Mr. Profit was an energetic and hard working man and in whatever community he resided he was highly popular. The deceased was about fifty years of age and was born in New London. About fourteen years ago he removed to Alberton and four years later located in Augustine Cove. Besides his widow he leaves to mourn a family of seven, some of whom are at home and some abroad. The funeral will probably take place tomorrow, Tuesday to the town cemetery. The children who reside abroad have been telegraphed. The Guardian extends sympathy to the bereaved family.

To the Vice-President and members of the Summerside Board of Trade: Your committee appointed to examine the President's address desire to report as follows: (1.) We notice with much pleasure the persistent activity and strenuous efforts with which the different aims and objects of the Board have been prosecuted by the President and his Council during their term of office, bringing to a successful issue so many important questions which had been pending for so many years. (2.) Your Committee are especially gratified at the success of the Board in securing for this port the services of boats of two steamship lines and they cordially approve the suggestion of the President that vigorous and prompt action should be taken to have the dredging operations resumed next summer for the

purpose of straightening the channel of the harbor and to this end they suggest the appointment of a strong and energetic committee to press this matter on the Department of Public Works.

(3.) Your committee further advise that renewed efforts be made by the Council to have the Department of Railways set their water supply from the town system, that every possible effort be made to have the station accommodations at Summerside improved, and to have the appropriation placed in the estimates this year for repairs and additions to the Railway Wharf materially increased so that this wharf may be put in a reasonably satisfactory condition for the convenience and safety of the travelling public.

(4.) We concur with the President's remarks as to the satisfactory working of the railway time-table for last year and in his suggestion re time of departure of train from Tignish.

(5.) Your committee desire to congratulate the officials and members of the Board on the material increase in the membership and the satisfactory condition of the finances of the Board, not a little of which they believe to be due to the energy and persistence of the collecting agent.

(6.) One of the most important and significant points made in this very suggestive address is in reference to the position of Summerside as the commercial centre for the Province and the consequent necessity of facilitating and improving our municipal affairs.

(7.) Your committee has read with much interest the views advanced in the President's address on the question of the water supply. In accordance with much that is therein stated, they have some doubts as to the wisdom or expediency of this Board's committing itself to any academic theories on education or dissipating its energies on theoretical questions while so much remains to be done pertaining to the more legitimate objects for which the Board of Trade exists. With the complicated question of education and what are the proper studies for schools and colleges they feel that this Board may not be sufficiently conversant to make any pronouncement or to enter into any advice as to the educational value of certain subjects of study, and they believe that the Board will, for some time to come, find ample scope for its activity in questions pertaining to trade and commerce and such other kindred matters as may contribute to the material advancement and welfare of the town and county.

(8.) We heartily approve of the recommendations made by the President relative to merchant's day excursions, the improvement of the public roads, the systematic inspection of all classes of foodstuffs offered for sale and the regulation of stables, slaughter houses and grocery stores where these are produced or handled. The suggestion of the President in reference to securing the best quality of exports from this Province is also highly commendable. All these recommendations your committee believe are worthy of the efforts of this Board to secure their realization and they suggest that this

Bad Case of Eczema Cured by Zam-Buk. Another case of the healing power of Zam-Buk, in cases of eczema, is to hand from Winnipeg. Mrs. H. Cross, of 176 McIntosh Ave., Elmwood, is the subject, and gives the following account of her case: "For five years," she says, "I was terribly afflicted with eczema on my legs, and despite all the doctoring and numerous remedies I tried, I seemed unable to get relief. The disease first started with watery blisters, which itched terribly, and when rubbed or burned and smarted very much. The pustules then spread and formed sores. These were irritable and very painful. One blister was no sooner rubbed—or I might say touched—than another started. "They soon spread over both limbs, and I suffered much inconvenience. I tried various remedies, as they were recommended, but could find no relief. Ordinary salves and ointments seemed unequal to my case. "At last a friend suggested my using Zam-Buk. I acted on this advice and began the Zam-Buk treatment. A few applications gave me considerable ease, and the burning, smarting pains were reduced. I persevered with the balm, and in the course of a week the disease was under control and the sores healing. From that time forward I continued to improve, and the sores, too, became less and less troublesome, until in a wonderfully short time, considering the seriousness of my case and the long time I had been suffering, Zam-Buk worked a complete cure."

Such is the nature of the great cures which Zam-Buk is daily effecting. Purely herbal in composition, this great balm is a sure cure for all skin diseases, cold sores, chapped hands, frost bite, ulcers, blood-poisoning, varicose sores, piles, scalp sores, ringworm, inflamed patches, babies' eruptions and chapped places, cuts, burns and bruises. All druggists and stores sell at 50c. box or post free from Zam-Buk Co., Toronto, upon receipt of price. Refuse harmful imitations and substitutes.

Blood Humors

Commonly cause pimples, boils, hives, eczema or salt rheum, or some other form of eruption; but sometimes they exist in the system, indicated by feelings of weakness, languor, loss of appetite or general debility, without causing any breaking out.

They are expelled and the whole system is renovated, strengthened and toned by Hood's Sarsaparilla.

Get it today. Sold by all druggists everywhere. 100 Doses One Dollar.

Board in conjunction with other Provincial Boards of Trade take such steps as may be found expedient to have the same carried into effect. Respectfully submitted. NEIL McLEOD, (Signed) JOHN H. BELL, JOSEPH READ.

The Montreal Star has the following article, illustrated by a splendid photo for Mr. Warburton's exhibition. The first McGill student to be elected Rhodes Scholar from Prince Edward Island is Hugh C. Warburton, of Charlottetown. P. E. I., news of whose appointment has just been received at the University in a cablegram from Dr. G. R. Parkin, secretary of the Rhodes Trust.

What lends additional interest to the appointment is the fact that Mr. Warburton, besides possessing very high qualifications for the scholarship, is a particularly intimate friend of Walter J. Pearce, Arts '12, the recently elected Rhodes Scholar from McGill. The Prince Edward Island appointee was born in Assam, India, in 1889, where his father, Dr. George Warburton, now a retired doctor of Charlottetown, was at that time a physician in the Indian army. Shortly after his birth his parents came to Prince Edward Island.

Entering the Prince of Wales College at an early age, he was soon marked for rapid advancement, and became very popular with his fellow students, among other positions assuming the editorship of the "Observer," the college paper, and figuring at intervals on the football, hockey and tennis teams.

Upon graduation from the Prince of Wales College, and obtaining a first-class teacher's license, Mr. Warburton came to McGill in the autumn of 1906, where in the second year he was successful in winning an exhibition of one hundred dollars. Like success attended his efforts in the third year, when he won the Coster memorial prize, awarded for an English essay, open to competition to all students from the Maritime Provinces.

Mr. Warburton takes a keen interest in military matters, and for five years has been a member of No. 2 company 4th Regiment, of the Canadian Garrison Artillery, which drills annually at Petawawa.

It is a somewhat peculiar coincidence that he is the sixth Rhodes scholar to be selected from that company which on three of those five occasions has been the company winning first place. The other applicants for the scholarship were, Messrs. G. W. Irving, of Vernon River, P. E. I., a class mate of the successful scholar at McGill, and W. A. Scott, of Charlottetown.

Through their purchases and their knowledge of the output for 1909 the firm realized that, though there was good money in poultry products for the agriculturist, the supply had fallen off at a remarkable degree and what was offered was not up to the required standard in quality. The company then applied themselves to the task of devising a plan whereby their established poultry business on a firm basis. To this end they organized an educational company and for this purpose they set aside a large sum of money to be expended annually. As a result there was held in Montreal towards the close of the past year what was the first exclusively winter (fat stock) poultry fair, the culmination of the campaign the firm have been conducting for "more and better eggs and poultry," and was a credit to everyone who had anything to do with it, inasmuch as it was the largest and best exhibit ever shown as one exhibit in Canada, comprising as

it did all the poultry shown at the Ontario winter fair, Guelph; the Maritime Province Winter Fair, Amherst, and an entry equally large competing for a prize of one hundred dollars in gold, offered by Gunn, Langlois & Co., Limited, for the best exhibits of turkey, chickens, ducks or geese, for which producers in Ontario, New Brunswick, Nova Scotia, Prince Edward Island and Quebec competed. The show was advertised to be held at the firm's warehouse on the 16th and 17th December, but owing to the large number of requests from leading dealers and the general public, it was decided to continue the show for four days of the following week, and the result was that the show rooms were thronged with persons interested in the eggs and poultry business from a producer's as well as a consumer's standpoint.

One of the leading educational features of the exhibit was that every breed of poultry was represented, and as each breed was properly tagged, it made it easy for visitors to make a comparison for themselves. Besides this, expert poultrymen were in attendance all the time, so that fine points could be explained to visitors. The enthusiasm which this show aroused was doubtless of much value in increasing the interest in poultry products. Producers saw that there is money in poultry if fed and marketed properly, consumers realized that there is a difference between good and poor quality, and that there is economy in buying the high class article. Not only will it help producers to secure "more and better eggs and poultry," but it was one of the greatest educational features to the consumers of the city that has ever been brought forward into the line of dressed poultry.

The falling off in exports and eggs and poultry is shown by the following statistics. Fiscal year. Dozens. Poultry. 1899... 9,632,512 \$1,267,063. 1900... 10,187,906 1,475,902. 1901... 11,363,064 1,691,640. 1902... 11,635,108 1,732,242. 1903... 7,404,100 1,436,130. 1904... 7,789,316 1,053,896. 1905... 2,601,427 712,866. 1906... 2,921,725 495,176. 1907... 2,591,205 556,557. 1908... 1,365,390 301,818. 1909... 552,250 124,315. 1910... Nil Nil.

It will be noted that during the year 1910, no eggs or poultry were exported. An interesting part of the exhibit was the public educational meeting held on Wednesday afternoon, when representatives of the press were present. Mr. Gunn, in welcoming the guests, dwelt upon the necessity of a movement of some kind which would overcome the heavy loss which Canada is at present sustaining through want of care in the marketing of poultry products, and which he estimated was over \$2,000,000 per annum.

One feature of the prizelist which will be of particular interest to provincialists is the fact that among the prize winners is found the name of D. McDonald, Glenfman, who won second prize for his exhibit of ducks. Recently the Montreal firm's representative, H. Jones, was in this city on a business trip. He was looking around ascertaining the output and the prices paid. If they decided to purchase from this Province arrangements would follow later.

He had a short conversation with a Guardian representative but in that brief space of time Mr. Jones imparted a lot of information of value to poultrymen and egg producers.

For Skin Health

A lifetime of disfigurement and suffering often results from improper treatment of the skin or neglect of simple skin affections. Cuticura Soap, assisted by Cuticura Ointment, affords the purest, sweetest and most economical method of caring for the complexion, preventing minor eruptions from becoming chronic, and speedily dispelling severe eczemas and other torturing humors, itching and irritations, from infancy to age.

Cuticura Soap and Ointment are sold by druggists everywhere. Forster Drug & Chem. Corp., 515 State St., Boston, Mass. Mailed free. Cuticura Soap on the care of skin and scalp.

SCOTT'S EMULSION

is the best source of body-warmth. It's the match that starts the regular fuel burning. Just a little improves the appetite; a little more warms, builds up and strengthens the whole body. Thousands and thousands of little babies, boys and girls, men and women, are taking it to keep out the cold, to keep up the body-warmth and to keep the doors closed against Grippe, Pneumonia, Rheumatism and Consumption. It contains no alcohol, no drug or other harmful ingredient; it is known the world over by the mark of quality—The Fisherman. ALL DRUGGISTS SELL SCOTT'S EMULSION.

Beginning, he touched on the quality and manner of dressing poultry. He said that if producers wished to get the highest prices they had to attain the highest state of proficiency. There is a right and wrong way to market poultry. The former is to leave head and legs on and plucked without scalding. He claimed that the practice of placing of poultry on the market, drawn, minus head and feet, lent itself to unscrupulous dealers disposing of diseased and aged fowl. As a consumer, he said, he would never purchase poultry without head and legs.

Another point he dwelt on was the uniformity of quality. For poultry uniform in quality and properly dressed Gunn's were willing to pay high prices and prices, too, which would make poultry farming profitable. He compared farm fed fowl to crated fowl and explained how his firm, which in one of their establishments, had large numbers of fowl always on hand being prepared for their particular customers, this being enforced by reason of the small quantity of properly dressed fowl offering.

He then spoke of eggs as a marketable asset for the farmer. Beginning with the hen he said the strain counted for much and careful selection as to egg-laying qualities was essential. He then spoke of the marketing of eggs. He said this was one of the greatest troubles his firm had to contend with. Farmers saved up eggs for a certain length of time and then marketed them. By the time these reached the exporter, were exported and finally landed in the importer's hands the latter was forced to suffer a certain percentage of loss through bad eggs. This tended to lower prices. He advocated the establishing of egg circles to take the product of each farm in regular intervals whereby the retail customer is assured a fresh egg, there are smaller losses and higher prices for the poultryman.

His firm generally are sparing neither time or money to educate the people interested in the subject of poultry raising, and this is given a long lines which are mutually beneficial to the producer, dealer and consumer.

TUESDAY The funeral of the late John McInnis, Peake's Station, took place yesterday afternoon from the residence of his father, Joseph McInnis, in St. Theresa's Church and cemetery. Rev. Ignatius McDonald officiated at the services. The pallbearers were: Ward Crane, Stephen Crane, Joseph Mooney, Walter Currie, Louis Clarkin and John Fisher. The deceased, who was only seventeen years of age, met his death in the Maine Lumber Woods. He was killed by a heavy log rolling over him. He went to Maine only four and a half months ago and his sad death under such circumstances is to be deplored. He leaves to mourn a father, one brother out west and one sister at home to whom The Guardian extends sympathy.

Word was received in this city yesterday afternoon of the death in St. Louis of William Robins, son of the late Thomas Robins of Beque, N. B. Particulars were given beyond the fact that a stroke of apoplexy suddenly removed from active life a most popular and highly respected man, one who bore a reputation for honor and uprightiness among all classes. The deceased was a brother-in-law of Mrs. Robert Hogg of this city and an uncle of Mrs. W. W. Clark and W. F. Robins, also of this town. He married Nellie, third daughter of the late James Goullie, of Summerside, who with a son and one daughter and an adopted daughter are left to mourn their great loss. The Guardian extends heartfelt sympathy to both relatives and friends here and in St. Louis.
