5 Cents a Day

\$1.50 A MONTH

Lloyd George Takes Stand Re German Reparations

Your grocer will tell you frankly that he makes less profit on Red Rose Tea than on other teas. The only object he has in recommending it is to see that you get the best quality possible.

MR. MERCHANT!

Ever go hunting? Ever throw your arm over your shoulder on a crisp morning and go afield for furry and feathered game? Wasn't it a great delight to hear the whirr of wings or see a glint of fur between the tangle of the underbrush, to sight along the barrel until you had a line on your quarry, press the trigger and—find you hadn't loaded your gun!

Every day during 1921, Mr. Merchant you will be hunting—out gunning for customers. Your ammunition is your stock. Your gun is the Guardian. You will often draw bead on your quarry—a customer. Are you going to forget to load your gun and disappoint yourself?

IT PAYS to buy in this price. IF ITS DRYGOODS WE have it. Lives and Murdoch Ltd.

MENS AND BOYS NEW spring suits arriving daily, also spring hats and caps at 100c and Murdoch Ltd.

GOOSE SUPPER AT OAKLEY

A very pleasant and enjoyable event took place on last Monday evening February 28th, at the Oakley House when a goose supper and entertainment were given in honor of the 47th birthday of Mrs. Henry Dingwell, the popular proprietress of the Oakley Hotel.

Hotel Arrivals

VICTORIA HOTEL. Phil Dome, Montreal, A. Chas. Thompson, N. Sydney, A. E. G. Austin, Montreal, J. B. Gordon, Amherst, J. Hutchinson, Toronto, A. M. Kennedy, Ottawa, Robert Goodell, Ottawa, John McDonald, St. John, J. A. MacDonald, Gardigan, H. D. Whear, Souris, Mr. and Mrs. W. V. Miller and baby, Dartmouth.

REVERE HOTEL

Jas. Atkins, Mt. Stewart, E. R. Ball, St. John, E. Brown, York, J. Hagerman, Sussex, A. J. McNew, In. Bonshaw, J. C. Jardine, Summerside

ONE BILLION ANNUALLY

More than one billion dollars worth of time is lost each year in the United States alone through sickness and accidents, outside occupational diseases and injuries covered by workmen's compensation laws. This sum is lost primarily and mostly by numerous kinds of workers who cannot afford such reverses.

AGE AND MILK YIELD

From a study of all data bearing on the effect of age of the cow on the yield and fat content of milk, the conclusions show that a dairy cow on the average as a two-year-old may be expected to produce about 70 per cent, as a three-year-old about 80 per cent, and as a four-year-old about 90 per cent, of the milk and butter that she will produce under the same treatment when mature.

STAMPED MAT BOTTOMS for hooking. New spring kids hats, new wall papers etc at 100c and Murdoch Ltd.

PARTIES WITH WHOM I have surviving engagements please write or phone when think its fit. Mrs. Alfred McDonald, Hermanville.

WHAT CONSTITUTES A ROPE

The ideal method of fastening cows should hold the cow securely and yet permit sufficient freedom to prevent continuously reminding her that she is a prisoner.

THE DAIRY COW

The dairy cow is the foundation of the dairy industry. Not only that, she is the only source of supply for one of the indispensable foods of the human family. Her importance has never been fully appreciated and only within the last few years has it been known that her product is the main source of the food elements which contribute to the individual's physical and intellectual attainment.

KEEP IT SWEET

Keep your stomach sweet today and ward off the indigestion of tomorrow—try KI-MOIDS. The new aid to digestion. As pleasant and as safe to take as candy.

RHEUMATIC PAIN

Rheumatism is "pain only" not blister. Not one case in fifty requires internal treatment. Stop drugging! Rub the misery right away! Rub "St. Jacobs Oil" at any drug store and in just a moment you'll be free from rheumatic pain, soreness and stiffness. Don't suffer! Relief awaits you. Get it! "St. Jacobs Oil" is just as good for sciatica, neuralgia, lumbago, back-ache, sprains and swellings which never disappoints and does not blister.

DICKY DIPPY'S DIARY

SATURDAY: CAUGHT MY LITTLE NEPHEW, OSWALD, ACTING IN A SILLY MANNER BEFORE HIS SISTER, SO I SAID: "STOP MAKING A FOOL OF YOURSELF," AND SENT HIM OUT OF THE ROOM!

HIS SISTER SEEMED SO AMUSED OVER HIS ACTIONS THAT I SAID TO HER: "WHAT WAS HE TRYING TO DO ANYWAY?"

AND SHE SAID: "WHY, HE WAS ONLY MAKIN' BELIEVE HE WAS YOU"

Secures the best family medicine treatment which is

Hood's Sarsaparilla

For the blood, stomach, liver and kidneys. Clears an appetized digestion, makes food taste good. More Than This While it purifies, vitalizes and enriches the blood, it eradicates catarrh, gonorrhea, rheumatism, makes the weak strong. Gives you more energy, spirit and help than any other treatment for three times the money. Get Hood's today. A word to the wise is sufficient. For a mild, effective laxative or for the catarrh, take Hood's Pills.

ANGRY LOBSTER PUT TO SLEEP

English scientist discovers that crustaceans may be hypnotized

OTTAWA, March 2.—Lobsters may be hypnotized. This is not a new method of trapping the delicious crustacean, but merely an accidental discovery made by the Librarian of the Zoological Society of London, England. He was collecting specimens some time ago for the Marine Biological Laboratory at Plymouth. On trying to prevent an active lobster from crawling out the boat his wet hands slipped several times on the creature's back, but instead of becoming more angry the lobster grew docile. He repeated the rubbing movement for some time and produced a hypnotic trance.

A correspondent of the London Daily Mail recently described a demonstration of lobster hypnotism before a few incredulous scientists. A wild, uneducated female lobster last week was selected random from a fishmonger's shop for the purpose of the experiment. There could, therefore, be no question of a trained confederate or of collusion. She was a big fish of 3 1/2 oz. and the hypnotist elected not to cut the string binding her claws, as she showed considerable liveliness. She "becked" just like a mustang as Mr. Duncan tried to spread her tail out flat on the desk. He performed some rhythmic passes up and down her polished black back, and she grew more docile, permitting her tail to be unfolded. Then he lightly massaged her back with the tips of his fingers until the lobster lost her expression of annoyed anxiety and relaxed into beautiful slumber.

They came the crowning moment. Mr. Duncan lifted the hypnotized lobster and stood her on her head. With her two claws and nose as good supports, she remained motionless for three or four minutes. After that the hypnotic sleep grew lighter and passed off away a few moments later, leaving a normally angry lobster. The secretary of the Zoological Society who watched the experiment could not account for the strange occurrence. The gentleman who made the discovery offered the suggestion that some important nerve centres lie under the shell of the back and possibly these have something to do with the phenomenon.

BACK EYE FOR RECIPROCAL

CHICAGO, March 2.—Another reciprocal has suspended operations. On February 28th, The Wichita Great Western Underwriters, Wichita Falls, Texas, went into voluntary liquidation.

Coming on the heels of all the reciprocal failures in Chicago, the suspension of the company is at last making the public realize that they had better fight shy of the whole class. Officials of the company gave as a reason for discontinuing business the great reduction in the amount of insurance, the general public is carrying and the unsettled conditions of the country. It goes to show that as long as prosperity reigns a policy in a reciprocal is a fairly safe gamble, but that during hard times it is much better for one's peace of mind to be insured in a sound stock company, where in case of loss, cash is paid, the claim
