Magdalen Islands Steamship Service

Messrs Nicholson & Messervy, have received the following letter in respect to the request to have the Magdalen Islands boat call at Charlottetown:

Dear Sirs:—Replying to your letter of the 6th instant addressed to the Minister of Trade and Commerce, in which you ask that the Steamer, "Lady Evelyn" should call at Charlottetown on her way to and from the Magdalen Islands, I regret that this is practically impossible. Under her contract the Steamer has to run two trips a week to Pictou and the Islands and return, calling at Souris each way, and in order to keep up to time and allow sufficient time for loading and unloading at each port, it is necessary to run a vessel as hard as possible, and it would be impossible for her to go so far out of her way as to make a call at Charlottetown, and at the same time keep up her regular service. Yours very truly, F. C. T. O'HARA, Deputy Minister

GERMAN TROOPS OCCUPY LEIPSIK

SPARTACANS WERE ONLY ABLE TO MAKE SLIGHT RESISTANCE AGAINST THE FOE

(Special to The Guardian) BERLIN, May 13.—German Government troops have occupied Leipzig. A number of the Spartacan leaders there have been arrested. The occupation of Leipzig by some thousands of soldiers belonging to the forces of Gustav Noske, the minister of defence was a complete surprise. The Spartacans were only able to make a slight resistance. A state of siege was immediately declared and steps were taken to restore the authority of the Government.

MR. BELL'S DOUBLE DEALING TACTICS

ARE AGAIN EXPOSED BY PREMIER ARSENAULT TO THE LEGISLATURE
Severe Castigation Given the Leader of the Opposition Which the Latter Seems to Feel.

MAY 12. House met at 9.30. On motion of Mr. J. D. Stewart an Act to incorporate the Cardigan Electric Light Co. was read a third time and passed. On motion of Mr. J. D. Stewart an Act to incorporate the Georgetown Fish Co., Ltd., was read a third time and passed. Premier Arsenault moved that the House go into committee for second reading of the Appropriation Act. Mr. J. H. Bell moved an amendment to the Appropriation Act by striking out the item for "Highways, a sum sufficient." Mr. Bell explained that his desire was to place on record his objection to the appropriation for highways. He spoke at considerable length and his speech, briefly summarized, meant that he objected to the government having control of the expenditure of so much money on election year. He repeated what he had said when the matter came up during the debate on the Address, that it was evidently the intention of the government to build a highway from Tignish to Souris, which would cost thousands of dollars and perhaps millions. His speech was long, labored and confused, leaving the impression that he was simply killing time and saying such things as might be useful during the coming election.

WEEDING OUT OBSOLETE SHIPS

A NUMBER OF BRITISH WAR VESSELS TO BE OFFERED FOR SALE SHORTLY
Similar Action to be Taken by the United States in Order to Get Rid of Their Old Ships.

(Special to The Guardian) LONDON, May 13.—About one hundred and seventy warships in the British navy of various classes are to be offered to buyers as soon as they can be cleared for sale by the removal of their guns and other equipment. Even this figures do not appear to be exhaustive for with the advent of peace conditions not less than five classes of battleships, two classes of armour cruisers, ten classes of other cruisers and a very large number of small craft have been placed upon the non-effective list. The removal of obsolete vessels free the personnel needed to start the nucleus of the crew system and places out of commission ships which do not give adequate returns in fighting efficiency for their upkeep. Secretary Daniels, your correspondent is reliably informed, returns home with plans for a similar weeding of the deadwood out of the American navy.

An Army Must Be Maintained

(Special to The Guardian.) LONDON, May 13.—The "Times" in a leader says "It is unthinkable that no single army should be left, where, in the spirit of the mighty Imperial army which displayed to an astounding world the real power of the British Empire, may survive." There must be some Imperial unit of the army, if only to keep alive the Dominion tradition in British guards with its home in Britain but commanded by officers and manned by men of the Dominions.

Canadian Soldiers To be Entertained

(Special to The Guardian) LONDON, May 13.—At the suggestion of the Overseas Club the Lord Mayors and provosts of Edinburgh and Glasgow are inviting six hundred Canadian soldiers to visit their cities. The Mayors of Newcastle, Liverpool, Bristol and Wolverhampton are also considering ways and means of offering entertainment. It is proposed that the tour begin on May 20. Leeds will be visited first. Discussing Peace Terms

(Special to The Guardian) BERLIN, May 13.—The Imperial Ministry met yesterday to discuss the peace terms but no positive proposal has as yet been communicated to the Entente. Practical questions and considerations relating to territorial concessions which were transmitted to Clemenceau, President of the Peace Conference today by the German delegation, were said to be of the utmost importance but of an explanatory character. It is reported the German Democratic and Centerist parties have threatened to withdraw their representatives from the government if the treaty is signed.

AERIAL SERVICE TO P. E. ISLAND

MAJ. C. KENNEDY GIVES TALK IN THE BOARD OF TRADE ROOMS. Deals With Aviation Generally and the Possibilities of the Company Formed Here.

Major Clayton Kennedy, the well-known aviator, gave an interesting address in the Board of Trade rooms last evening before a fair sized gathering of citizens on the subject of aviation from all standpoints. Mayor Wright introduced the major and said he was bringing to P. E. I. an opportunity which would never come again, in connection with the formation of the P. E. I. Aerial Transport Service. The Major referred to the great strides made of late in aviation, especially in Great Britain, France and Italy, which he said were years in advance of the rest of the world. In the United States they have been making some poor copies of the British and French machines, but have made anything but a success of their efforts. In England, since the war, wonderful strides have been made in aviation 35 per cent. of the machines used by the Allies being of British make. Regarding the danger of flying the Major said it was practically nil. He had been six years himself at it and had never experienced any trouble except when the Huns were trying to shoot him. In landing, as long as one descends from the right height the machine is bound to come down right side up. A machine is now made which will land itself. The Major, after describing the various makes of machines and what has been done in various parts of the world, said that here in P. E. I. there are various reasons why an air service should prove advantageous. There is no reason, said he, why there should not be uninterrupted communication at all hours between this island and the mainland. With a fair amount of mail matter to carry and the usual passengers who are always anxious to take the quickest means of arriving at their destination the proposition should prove a paying one. Major Kennedy then outlined the proposal of the company to be formed here. His own company is putting up two-thirds of the capital. They will take \$100,000 stock if the local people will take up \$50,000. It is expected that the local government will guarantee 7 per cent. interest. The directorate of the company will be to a large extent local. Once a couple of machines are working and demonstrate the feasibility of the thing to the satisfaction of all, there will be reason to enlarge. It will mean much to P. E. I. Island in a business way—it will mean putting the island on the map. A practical machine for here would be a 6 or 7 passenger one—a D H-16, with a speed of about 120 miles an hour. The Dominion Government will give the company some amount of bonus—it depends upon what is actually performed. A supplementary service was also contemplated for the Magdalens. If P. E. I. can show that such a service can be successfully carried out other places in Canada will be following our lead. Major Kennedy thought the company should have three machines to start with. At the close of his address, of which this is necessarily but a very scant outline, remarks were made by Mayor Wright, Mr. J. E. B. McCready, Mr. J. O. Hyndman and Mr. N. Rattenbury, who strongly approved of the proposals as outlined. A vote of thanks was tendered Major Kennedy, moved by Mr. Hyndman, seconded by Mr. R. E. Mutch, and supported by Mr. Rattenbury, which Major Kennedy fittingly acknowledged.

Mr. Taylor the resignation was accepted and a committee was appointed to draw up a suitable resolution bearing on Mr. James' work.
