Egg Laying Type

Producing Not Influenced by Skeletal Structure

"Evidence is not only lacking to support the contention that there is an egg-laying type in the domestic fowl (type here being considered from the standpoint of skeletal structure), but all available evidence suggests that the type of the bird, as influenced by the skeleton, has no significant relationship to egg-producing ability." Thus, Morley A. Jull, formerly of Macdonald College, disposes of the disputed view that there is an egg-laying type of the domestic fowl which can be picked out by its visible physical characteristics.

In order to secure definite evidence as to whether there is any significant relationship between the so-called type of laying fowl and its laying ability, an extensive survey was carried out by Professor Jull and associates of the United States Department of Agriculture. All the leading poultry authorities were consulted, and a number of measurements of live birds, carcasses, and bones of dead birds were made. The conclusions arrived at, in addition to the fact that it is not possible for the human to separate good from poor breeders based on differences in so-called "body type" were as follows:—

Live bird measurements, as usually taken, are not reliable indices of the shape or type of a bird.

Live bird measurements of the length, breadth, and depth of head and of the length and breadth of back, greatest width at shoulders, and depth of body in front are of no value in the selection of birds according to their laying ability. In three out of six groups of birds, those with the shortest keels were among the best layers.

Dressed carcass measurements in the group of birds measured were not highly correlated with comparable bone measurements and cannot be considered as reliable indices of egg-laying ability.

There is no significant relationship between the length, breadth, or shape of skull and egg production.

Neither the length nor the breadth nor the depth of the skull of a bird bears any relation to the total weight of eggs laid by the bird, nor to her mean egg weight.

Brain capacity bears no relation to the number, total weight, or mean weight of eggs laid by a bird.

Simple correlation coefficients between egg production and each of the three measurements, length of back, width of back, width of back from femur joint to femur joint, and length of keel, are of no significance, except possibly length of keel in certain flocks.

It should be kept in mind, however, that in the selection of birds on the basis of their presumed laying ability certain physiological characters should always be taken into consideration. The most important of these include age in days that laying commences, (observations confirm the opinion widely held that high egg production is associated with earliness of maturity) the accumulation of excess tissue over various parts of the head and of fleshing in the abdomen, the bleaching of the yellow pigment from beak and shanks is an indiation of the approximate number of eggs laid during a given period, and the time and duration of the first annual moult.

PLEASE REMEMBER

All of our BULBS for Fall planting are imported by us direct from HOLLAND and are carefully examined on arrival by CUSTOMS OFFICIALS for diseases such as THRIP and other diseases that BULBS are "heir to" so that in planting our best quality large BULBS you are taking no chances that you would be if you bought the cheap BULBS that are offered and are on sale. Our BULBS cost a little more and are worth it.

Hyacinth, Tulips, Crocus, Daffodils, Narcissus, Suoio Drops, &c., &c.

Discount off. Postage paid on mail orders.

Carter & Co. Limited

INDIAN STATE RULER OUSTED

(Associated Press)

INDORE, India, Nov. 4—The government of the central provinces is taking over the administration of the Senior Dewas State, it was learned today, because the Maharajah Sir Tukoji Rao Puar has disregarded an ultimatum that he return to the State.

Return Demanded

The political agent of the Viceroy, Lord Willingdon, the former Governor General of Canada, sent the demand that the Maharajah return to the state, one of 15 under the central provinces, by Oct. 10, or the government would be taken over.

The Maharajah is now at Pondicherry, the French Indian colony.

Sir Tukoji Rao Puar ignored a British ultimatum that he return to his state from Pondicherry, the French-Indian colony, by October 10.

Centre of Scandal

By coincidence Dewas is a neighbor of the great state of Indor, where in 1925, the wealthy Maharajah then in power was the centre of a scandal involving the murder of a merchant friend of his favorite dancer, the beautiful Mumtaz Begum, and the mutilation of the girl. The Maharajah finally abdicated in favor of his son. Later he married Miss Ann Miller of Seattle.

The British Government's action in Dewas should not cause a flurry in the Indian Empire, because Dewas is a minor state. It will, however, stand as an example for the hundreds of ruling princes and chiefs. Many of the princes are all but absolute sovereigns in their own domains. All the princes are subject, in varying degree, however, to the Government of India.

Combating Couch Grass

Couch or quack grass presents a very serious problem in Eastern Canada. Experiments have shown that ploughing as early in the summer as the crop can be removed, cultivating the land during the fall and reploughing just before the ground freezes constitute a very satisfactory method of control. If this procedure can be followed the a smother crop practically complete eradication will be secured. It is surprising and disheartening sometimes, says the Dominion Field Husbandman to find that couch grass will persist even after considerable work has been done on the land. However, when right methods are followed, and provided reasonably dry weather is enjoyed, complete success may be assured. In Western Canada, the application of commercial fertilizers with a combination fertilizer and grain drill has proved very effective in controlling many weeds.

PRODUCE

(Canadian Press)

MONTREAL, Nov 5—Prices of butter and eggs were stronger at the close of last week trading on the Montreal dairy and produce market while potatoes remained unchanged. Receipts of all lines showed substantial declines over the previous week.

The butter market ended the week at 20¾ to 21 cents a pound for no 1 grade in carlots or less. Arrivals amounted to 4,637 boxes as compared with 5,873 boxes a week ago. Exports are running well ahead of last year. Last week shipments totalled 722 boxes, bringing the year's shipments to 68,932 boxes to date. Last week 37,361 boxes were exported dur the corresponding period.

Graded fresh Ontario eggs ended the week at 42 to 43 cents a dozen for extras, 35 to 36 cents for firsts 32 to 33 cents for seconds and 18 to 19 cents for seconds, while storage eggs brought 21 cents for extras, 19 cents for firsts and 16 cents for seconds for carlots or less. Offerings totalled 1,873 cases.

The cheese market closed at 9¼ to 9¾ cents a pound for Ontarios with Quebecs at 8⅝ to 8¾ cents.

The potato market ended the week at 65 to 70 cents per 80 pound bag of Quebecs at 76 to 80 cents for New Brunswick green mountains in similar quantities.

Currency

(Canadian Press)

NEW YORK, Nov 5—Major currencies fluctuated within a narrow range in Saturday's quiet and short session of trading on the foreign exchange markets here. Canadian dollars and pounds sterling finished the day with small gains in terms of United States funds while French gold francs closed at Friday's final figure.

Canadian money jumped to the highest quotation in more than two years in early dealings when the price was posted at 99 13-16 cents which represented a discount of only 3-16 of one percent. It eased, however, in later trading to finish at 99⅝ cents for a gain of 1-16 percent. American premium against Dominion funds weakened to 5 16 per cent.

Pound sterling closed 1⅝ cents higher at $4.85⅞ after ranging between a high of $4.86⅜ and a low of $4.85⅝.

French francs eased a point at the opening but firmed later to 5.06½ cents. United States dollars in terms of the franc closed at approximate value of 64.63 cents, unchanged from Friday.

MONTREAL, Nov 5—The British pound sterling moved higher during today's trading on Montreal foreign exchanges, as the general list strengthened following further steadiness in New York. The rate at the close today was $4.87⅝, up 1 7-16 cents from Friday's final quotation. It's closing quotation was also the high for the day.

The French franc showed a gain of .01 cents, closing the day at 6.09 cents while the premium on the United States dollar finished with a decline of ¼ of one percent at 5 16 per cent. Other currencies were generally showing gains.

Annandale School Fair

The Annandale School Fair was held in Annandale Hall, September 16, 1933, the following schools participating: Cumberland Hill, River View and Little Pond.

CLASS I.—GRAINS

Sec. 1, 100 heads of White Oats—1, Joseph MacKenzie, Little Pond.

Sec. 2, 100 heads of Wheat—1, Edna Dingwell, Little Pond; 2, John D. MacDonald, Little Pond; 3, Frances MacDonald, Little Pond; 4, Reginald Mooney, River View.

Sec. 3, 6 ears Sweet Corn—1, Lawrence McLeod, Cumberland Hill; 2, Edna Dingwell, Little Pond.

CLASS II.—ROOTS

Sec. 1, Green Mountain Potatoes 1, John D. MacDonald, Little Pond; 2, Joseph MacKenzie, Little Pond; 3, Marguerite MacDonald, Cumberland Hill; 4, Lloyd MacDonald, Little Pond.

Sec. 2, Irish Cobbler Potatoes—1, Isabel Campbell, Cumberland Hill; 2, John D. MacDonald, Little Pond; 3, Barbara MacDonald, Little Pond; 4, Eddy Jenkins, Little Pond.

Collection of 3 Turnips—1, John D. MacDonald, Little Pond; 2, O'Leary MacDonald, Little Pond; 3, James MacDonald, Little Pond; 4, Isabel Campbell, Cumberland Hill.

Collection of 3 Mangels—1, Edward MacDonald, Little Pond; 3, Joan MacDonald, Little Pond.

Collection of 6 Carrots—1, Isabel Campbell, Cumberland Hill; 2, Marguerite MacDonald, Cumberland Hill; 3, Edna Dingwell, Little Pond; 4, Sadie Ward, Cumberland Hill.

Collection of 6 Parsnips—1, Marguerite MacDonald, Cumberland Hill; 2, Edna Dingwell, Little Pond; 3, Mary I. MacDonald, Little Pond;

CLASS III.—VEGETABLES

1-2 dozen Green Tomatoes—1, Clara MacDonald, Little Pond; 2, Ruth Robertson, River View; 3, Edna Dingwell, Little Pond; 4, Mary Livingstone, Cumberland Hill.

1-2 doz. Cucumbers—1, Edna Dingwell; 2, Isabel Campbell; 3, Ruth Robertson.

1-2 doz. Beets—1, Barbara MacDonald; 2, Joan MacDonald; 3, Ruth Robertson; 4, Edna Dingwell.

2 heads of Cabbage—1, Rosalee MacDonald, Little Pond.

Pumpkin—1, Gordon Duncan; 2, Hazel Blackett; 3, Chester Blackett, 4, Sadie Ward.

Squash—1, Gladys Jenkins; 2, Edna Dingwell.

CLASS IV—FLOWERS

Sweet Peas—1, David MacDonald; 2, Isabel Campbell.

Mixed Flowers—1, Francis MacDonald; 2, Edna Dingwell; 3, James MacDonald; 4, Isabel Campbell.

Geranium—1, Marguerite MacDonald; 2, Hazel Robertson; 3, Stewart MacLeod; 4, Marjorie MacLeod.

CLASS V.—FRUIT

Plate of 6 Apples (Alexandra)—1, David MacDonald; 2, Boyd Livingstone; 3, Reta Morrison; 4, Reginald Mooney.

6 Apples (Wealthy)—1, Ruth Robertson; 2, Boyd Livingstone; 3, Kathryn Livingstone; 4, John A. MacDonald.

10 Apples (Crabs)—1, Joan MacDonald; 2, Ellen Campbell; 3, Chester Blackett; 4, Boyd Livingstone.

10 Plums (Lombard)—1, Edna Dingwell, Little Pond.

CLASS VI.—CANNING

1 pint jar of Raspberries—1, Edna J. Dingwell; 2, John MacDonald; 3, Ruth Robertson.

1 pint jar of Beets—1, Isabel Campbell; 2, Kathryn Livingstone; 3, Sadie Ward; 4, Edna J. Dingwell.

CLASS VII.—COOKING

Loaf of White Bread—1, Isabel Campbell; 2, Kathleen MacDonald; 3, Mary Livingstone; 4, Eileen Campbell.

1-2 doz. Tea Biscuits—1, Edna J. Dingwell; 2, Kathleen MacDonald; 3, Mary A. MacDonald; 4, Ellen Campbell.

9 Sugar Cookies—1, Ellen Campbell; 2, Mary Jenkins; 3, Gladys Jenkins; 4, Florence Morrison.

9 Ginger Snaps—1, Mary I. MacDonald; 2, Kathleen MacDonald; 3, Mary Livingstone; 4, Ellen Campbell.

Apple Pie—1, Ellen Campbell; 2, Mary I. MacDonald; 3, Gladys Jenkins; 4, Kathleen MacDonald.

Brown Sugar Fudge—1, Ellen Campbell; 2, Patricia Campbell; 3, Mary MacKenzie; 4, Marjorie MacLeod.

School Lunch—1, Edna Dingwell; 2, Matilda Robertson; 3, Kathleen MacDonald; 4, Joan MacDonald.

CLASS VIII.— SEWING, KNITTING and CROCHETING
(Under 12 years)

Plain Sewing, Apron—1, Florence Morrison; 2, Mary MacKenzie; 3, Sadie Ward; 4, Patricia Campbell.

Single Hemstitching—1, Marjorie MacLeod; 2, Mary MacKenzie; 3, Patricia Campbell.

Mended Sock—1, Patricia Campbell.

Division B. (over 12 years) Double Hemstitching — 1, Ruth Robertson; 2, Mary Livingstone; 3, Kathryn Livingstone; 4, Isabel Campbell.

Knitted Sock—1, Gladys Jenkins; 2, Edna Dingwell; 3, Ellen Campbell; 4, Mary Livingstone.

Mended Sock—1, Ellen Campbell; 2, Edna Dingwell; 3, Ruth Robertson; 4, Mary Livingstone.

Embroidery Work—1, Kathryn Livingstone; 2, Beatrice Steele; 3, Ruth Robertson; 4, Isabel Campbell.

CLASS IX.—MANUAL TRAINING
(Division A).

Hammer Handle—1, Frances MacDonald; 2, Norman MacDonald; 3, David MacDonald; 4, Bernard MacDonald.

Bird House—1, Boyd Livingstone.
(Div. B)

Chicken Coop—1, Boyd Livingstone.

Nail Box—1, James McDonald; 2, Joseph A. McKenzie; 3, Joseph A. MacDonald.

Miscellaneous—1, Francis J. McDonald; 2, John J. McDonald; 3, Josephh A. McKenzie.

CLASS X.—LIVE STOCK and PPOULTRY

Heifer Calf (dairy)—1, Reginald Banks; 2, Edward McDonald; 3, Joan MacDonald; 4, O'Leary MacDonald.

Barred Rocks—1, John D. MacDonald; 2, Joan MacDonald; 3, Eddy Jenkins; 4, Ronald MacDonald.

White Leghorns—1, Ruth Robertson; 2, Barbara MacDonald; 3, Eddy Jenkins.

COLLECTIONS—CLASS XI.

12% Instead of 6%

You can double the Income

your widow and children would ordinarily receive from their insurance money through the very liberal provisions of the

Imperial Double Income Policy

THIS doubled income would continue from the date of your death until your youngest child became 21 years of age. Then the full face value of the Policy would be paid to your heirs in cash.

If an ordinary policy for say $10,000 became a claim the income from the money, if invested at even 6%, would be only $600 a year. Under a $10,000 Double Income Policy, however, the Imperial Life would guarantee to pay $1,200 a year and this income would be paid until your youngest child became of age, and then the full $10,000 would be paid in cash.

If you survive the policy it will provide a very welcome cash fund or a desirable income for your own later years.

If you have young children you cannot do better for them or for yourself than to look into this very unusual type of policy without delay.

Eye Comfort

for eye workers is a matter of vital importance.

From early morn to late at night we "crowd" our eyes relentlessly, from one job to another.

How long will they stand it?

Are you now enjoying that efficiency and comfort which ought to be yours?

Consult us if you are not; You have much to gain, and nothing to lose.

In any case the knowledge gained from an examination, makes it well worth while.

G. F. HUTCHESON
