

THE TORTURE OF INDIGESTION

Thousands Made Miserable By This Trouble

"FRUIT-A-TIVES" Relieves It

What is indigestion and what causes it? As you know, solid food must be changed into a liquid by the stomach before it can be taken up as nourishment by the blood.

The stomach acts as a churn. It is covered by a strong, muscular coat and lined with a soft, delicate membrane which secretes the Gastric Juice which digests or dissolves solid food.

When food enters the stomach, the muscular coat squeezes and presses the food from end to end, or churns it, with the gastric juice to dissolve or digest it.

But—if the stomach muscles are weak—or if the dissolving fluid is poor or insufficient—then food cannot be digested properly and you have indigestion.

"FRUIT-A-TIVES" is the most wonderful medicine in the world for strengthening the stomach muscles and providing an abundance of pure, full-strength dissolving fluid to completely digest every meal. "FRUIT-A-TIVES" does this because it keeps the kidneys active, the bowels regular and the blood pure, which insures pure Gastric Juice.

"FRUIT-A-TIVES" will correct your indigestion or dyspepsia and enable you to enjoy every meal. Try it.

50c. a box, 6 for \$2.50, trial size 25c. At all dealers or sent postpaid by Fruit-a-tives Limited, Ottawa.

First, Doctors—Then a Skin Specialist—Then a bottle of D.D.D.

We shall publish every week for the benefit of skin sufferers in this section, a few words written by Canadian people—some of them of prominence—all heartiest stories of relief from terrible suffering.

A sentence or two from a letter from J. W. Corns, 15 Melbourne Ave., Toronto, a man of his standing. "I have been a sufferer for two years with eczema on the legs and ankles. I tried three or four different doctors. I went to a skin specialist. All of no use. I used one dollar bottle of D.D.D.—that is all. Today I am perfectly well."

If you wish to try a bottle of this Prescription that Mr. Corns found so remarkable, we will guarantee relief on the first bottle, or your money back. Stop this tick today. \$1.00 a bottle. Try D.D.D. Soap, too.

STARS FOUND IN "LITTLE UNIVERSE" 10,000 TIMES BRIGHTER THAN SUN

Two Thousand New Nebulae, Several Variable Stars, and One New Star Discovered by Harvard

CAMBRIDGE, Mass., Oct. 13.—Among the discoveries made by the Harvard Observatory force at its station in Arequipa, Peru, in the last Summer, is the measurement of the distance and size of the Large Magellanic Cloud—a cloud-like group of stars and nebulae visible from the Southern Hemisphere and resembling in appearance the Milky Way. Two thousand new nebulae have been discovered, several variable stars and one new star. Hundreds of the stars are 10,000 times brighter than the sun.

This Magellanic Cloud, which is believed to be a sort of small universe in itself, separate from the Milky Way system of stars, of which our own solar system is a comparatively infinitesimal part, proves to be of staggering dimensions. Its distance from the earth, while not the greatest ever measured by astronomers, is so immense as to be almost beyond human powers of comprehension, being 110,000 light-years. A light-year is six trillion miles, the distance traveled in a year's time by light, which covers 186,000 miles in a single second.

Irish Republican Arrives in Montreal

MONTREAL, Oct. 13.—Mrs. Sheehy Skeffington, prominent Irish Republican circles and whose husband was killed in the troubles of Easter 1916, arrived in Montreal this morning and is staying with her sister, Mrs. Sheehy Casey at 852 Queen West Avenue. She came over she said, on a private visit to her sister.

Mrs. Skeffington has taken an active part in the Sinn Fein organization and was a member of the executive. She has also acted as a high court judge in the Republican courts. Her father was a member of the constitutional party under Parnell and Redmond. As she believes in the Republican form of government, Mrs. Skeffington does not think the outlook for peace in Ireland bright.

Defers Action on Matter of Women Ministers

TORONTO, Oct. 11.—The question of women in the ministry was the subject of a general conference here this morning. Mrs. L. C. McKinney, ex-M. L. A. for Alberta, pleading for the admission of women to the pulpits of the church.

Rev. Albert Daniel, of Nova Scotia, had nothing to say against women and the noble work they were doing. A referendum had been taken and the majority were against the proposal, and that should be the final he thought.

The proposal was strongly opposed by Rev. Dr. James Smythe, principal of Wesleyan College, Montreal. The condition imposed on the ministers could not be applied to women, he held. There were physical difficulties in the way that women would have to meet and it was his firm conviction that they could not successfully attend to their duties in the ministry.

"If you are going to admit women to the Methodist ministry," he declared, "you are going to split the church."

This declaration was met with shouts of "No, No," and Dr. Smythe admitted that he had been perhaps rather forceful in his remarks.

The report of the committee on memorials, recommending that women entering the ministry, the conference should wait until there was clear indications of Divine Will in the matter, was adopted by a large majority vote.

ADVISER OF THREE KINGS

Viscount Knollys is in his 68th year. His active service at the Court extended over 45 years. It began when he became Gentleman Usher Quarterly Waiter to Queen Victoria in 1868, continued during the reign of King Edward, and ended in 1913 after he had performed the duties of private secretary to the present King for three years. He thus had the confidence of three sovereigns, and he is still Lord-in-Waiting to Queen Alexandra. Lord Knollys was a great friend and trusted adviser of King Edward, whom he served from chimney, and the fire will start 1870 until his death in 1910.

Bronx Zoo Snakes Give Their Poison For Serum Tests

NEW YORK, Oct. 13.—Poison was extracted from 33 snakes at the Bronx Zoological Gardens today, because the demand for snake serum has been greatly stimulated, following extensive laboratory experiments which are said to prove that the whisky treatment aggravates snake bites instead of curing them.

Raymond I. Ditmars, curator of reptiles, caused 24 copperheads and nine water moccasins to give up their poison, which will be developed into serum by Dr. Alfranco Amarel, of the department of snake antitoxins in the Brazilian Institute of Serum Therapy. The experiments, supposed to prove that whisky helps to kill snake-bite victims instead of curing them, were carried on at this institution in Brazil under the direction of Dr. Amarel, who is now engaged in research work at the Harvard Medical School. These experiments were described by Dr. Gilbert Van der Smissen, a specialist in the treatment of snake bites, who assisted today in the delicate work of poison collection in the glass room of the reptile house at the Zoo.

The snake-bite has been suspected of worthlessness by physicians for many years according to Dr. Van der Smissen, but the recent experiments in Brazil have proved that a quart of Scotch or rye actually hinders the patient's chance of recovery.

The Brazilian experiments are conclusive, according to the specialist, in spite of the hundreds of miracles attributed to whisky in the last few years. The activity of poisonous snakes in biting humans has increased one hundred fold, according to investigators and hundreds have reported themselves snake-bitten in communities hitherto regarded as snakeless. Judged by the demand for prescriptions, it is asserted that Long Island has been wholly misrepresented in the natural history which alleges that it is almost free from poisonous snakes. It has all the reptiles of a tropical jungle, according to recent medical history.

"The procedure in the Brazilian experiments," said Dr. Van Der Smissen, "was to take a series of mammals and dose them with whisky. Then poisonous snakes were caused to bite them. A simple series of tests were written by snakes. The intoxicated animals all died five or six hours before the sober animals.

"The fact of the matter seems to be that whisky or any other alcoholic liquor, instead of counteracting the poison, merely acts to speed up the circulation and to spread the poison more quickly throughout the body and to speed the chemical changes which it causes."

The snakes were collected into two kegs for the poison extraction today. They were lifted out by large wire hooks and placed on a table, where an instrument was placed just behind the head to render it impossible for them to strike. Each of the 33 snakes wriggled and struggled but did not succeed in threatening the nimble operators, who are used to handling quick-thinking reptiles.

Story of Billy Weeks, the Hero of Englehart

ENGLEHART, Ont., Oct. 13.—This is the story of the hero of Englehart. They call him Billy Weeks. He is a rather agreeable young chap who wears a mechanic's khaki outfit, and works at the job of road inspector for the government. But Billy Weeks has met his crowded hour of glorious life and now his fellows know the truth; he has a lion heart. On Wednesday morning he set out for Charlton in a roadster to look at some road work. Beyond Charlton he met the fire. He turned and dashed eastward, the fire pursuing him. At Charlton the flames overtook him, set fire to his car and started the village's destruction. He smothered his burning car, loaded it with children leaped for a telephone and roared a warning to Englehart. A few minutes later he dashed into Englehart, himself blistered, his car sizzling, running on its rims. He went to a drug store and bought six bottles of vasoline. He had no coat on his face, he rubbed the vasoline on his face, hands and arms. He got a bundle of blankets and put them under a hose. He padded the hood of his battered old car, pulled on his cap and headed back over the fire-swept road to Charlton. He loaded a family into his little car and started back. He found little children along the road and packed them in until sixteen people were clinging to his little car and start trip like that, each trip a crusade against death. His car caught fire six times, he lost all his tires, his face was burnt, his hands grew numb, his lungs were tortured. Billy Weeks did not go to bed Wednesday nor Thursday night when he had brought on all the people he could find. He remembered the roads and summoned his gang. He worked himself and them like fiends, replacing burned out culverts. And on Thursday morning he led twelve cars loaded with food and clothing into a still smouldering countryside where people waited for mercy."

EXPERIMENTS ARE SUCCESSFUL

"It is a wonder to me," added Mr. Felton, "that the systems which have been faced by interurban competition for their passenger traffic have not used this type of transportation to compete with it."

The four trains now in use in Iowa, Mr. Felton said, are making runs of from 100 to 150 miles a day without difficulty. These light gasoline trains, which the Chicago Great Western is putting into service, are similar to those which Premier Oliver plans to put on the Pacific Great Eastern Railway in this Province.

QUICK FIRES

Warm the flue by burning a more quickly.

NO UNEMPLOYMENT IN WEST CALGARY, Oct. 11.—Employment conditions in Calgary and throughout the whole of Southern Alberta are very satisfactory at the present time. Many men have been placed on farms and in mining and lumbering camps, but it has been necessary to bring in additional men from the north.

Bride of Ex-Kaiser Will be Designated Queen of Prussia

DOORN, Oct. 11.—The bride of former Emperor William, the Princess of Reuss, will assume the title "Queen Wilhelmina of Prussia," according to an announcement made today during a preliminary reception to the friends of the bride and groom at the castle here.

The ex-Kaiser was attired in his favorite uniform of a High Admiral of the Fleet, with his breast covered with a multitude of pre-war decorations and his left sleeve showing the mourning band.

Mrs. Clara E. P Issues Warning

YARMOUTH, Oct. 13.—The following warning has been issued to the public of Yarmouth by Mrs. Clara E. Perry, widow of Capt. Henry Perry, who was murdered last year:

"Patience and meekness are virtues enjoined upon all Christians, but the time comes when these cease to be virtues. I have, with as much patience and meekness as I could command, endured the bereavement and subsequent affliction which fell to my lot. I uttered no murmur while justice was taking its course, but now I am fully roused to action by the dishonorable and malicious reports of a defamatory and incriminating nature which have recently been circulated about me. I now stand as the sole earthly guardian of the purity of reputation and the unsullied honor of myself and the members of my family, and, as such, I will, with God's help, endeavor to perform that sacred duty with firmness and fearlessness. Were I a man I would take off my coat and try to give the offending individuals the punishment which they so richly deserve, but being a woman, physically unfit for fistic combat, I openly announce that to punish the culprits I shall use the only available and effective weapon at my command, namely, the strong cudgel of British law.

"I am no coward, as you all know. From this date I shall be prepared to come from any quarter of the globe, if need be, and face my accusers to prove my innocence of such allegations. I now give warning that any person, high or low, rich or poor, white or black, male or female, circulating or repeating such malicious or defamatory reports against myself or any member of my family, may be summoned to prove by law the truth of his or her statements.

FAILURES IN CANADA LESS

Number of failures in the Dominion, as reported by R. G. Dun and Company, during the past week totaled 67 as compared to 60 during the corresponding period of 1921 and to 71 during the week preceding.

Women Crosses Continent in Air

MINEOLA, L. I., Oct. 12.—Lillian Gatlin, said to be the first woman to cross the continent by airplane, landed at 5:45 this evening at the United States Air Mail Service Station at Curtiss Field, completing the flight from San Francisco on Oct. 5.

Miss Gatlin, who is the founder of the National Association of Aviation Gold Star Mothers, arrived as a "special delivery" package in one of the United States Post Office De Havilland mail planes equipped with a 400-horsepower Liberty motor. The trip was undertaken by Miss Gatlin for the purpose of creating interest in her movement to have the government set apart March 2 every year to commemorate the death of flyers who offered their lives on the altar of patriotism and progress.

Army officers here estimated that Miss Gatlin flew 2,630 miles in her flight. Her trip from Mineola today was the last leg of her journey, and was made in four hours and 36 minutes, with Pilot Elmer G. Leonard, and air service flyer, at the wheel.

DOUBLE MURDER

NEW BRUNSWICK, N. J., Oct. 11.—Clifford Hayes, 19 years of age, admiral of Pearl Bahmer, who found the bodies of Rev. Edward Wheeler Hall and Mrs. Eleanor Reinhardt Mills, choir singer, was arrested today and formally charged with first degree murder.

QUEBEC'S NEWEST MONUMENT

Advertisement for the Monument of Cardinal Taschereau. Includes illustration of the monument and portraits of Mr. Andre Vermare and Mr. M. Roisin. Text: "The Monument of Cardinal Taschereau as it will appear when completed. Mr. Andre Vermare, Sculptor. Mr. M. Roisin, Architect. The Statue of Mar. de Laval in front of the Post Office. Champlain's Monument on Dufferin Terrace."

To the many artistic monuments to be seen in the city of Quebec, out of which those of Champlain on the Terrace and Mgr. de Laval in front of the Post Office, are not the least, another will soon be added which will be of no ordinary interest, as it will be erected to the memory of one of the greatest personalities in the contemporary history of French Canada. Cardinal Eléazar Alexandre Taschereau, the first Canadian to become member of the Holy College of Rome, will shortly have his statue in his good old Quebec, the city he loved and cared for during his lifetime, and upon which was reflected so much of the glory he gathered by his rapid ascent in the hierarchy of the Catholic Church. Cardinal Taschereau was appointed to that high state in 1886 and he died in 1897. He was succeeded by Mgr. Bégin, who was later awarded the scarlet robes of office.
