

# No Runs! No Terrors!

PLACE A SMALL PIECE OF A KLEENEX TISSUE BETWEEN GARTER FASTENER AND STOCKING. LESSENS STRAIN AND PULL. THUS HELPS TO PREVENT RUNS! (From a letter by M. C. A.)

**[GOOD IDEA!— SEND KLEENEX TO YOUR BOY IN THE SERVICES]**

**I WAS A.W.O.L.**  
(ALWAYS WITH OUT LINEN) UNTIL I DISCOVERED THAT KLEENEX SERVED THE PURPOSE AND SAVED LAUNDRY BILLS (From a letter by F. E. Jr.)

**New WAR-TIME ECONOMY PACKAGE**  
50% More Pulls than before at the same low price!

The new War-time Economy Package is the same low price for the same number of pulls as the old 200 pull package (100 pulls). If you continue to use the same number of applications of Kleenex as always, you'll find the new War-time Economy Size Kleenex lasts as long as usual! And there will be more available for everybody.

## Churchill May Reshuffle His Cabinet Soon

By ERNEST AGNEW  
Associated Press Staff Writer  
LONDON, Oct. 24 (AP)—Prime Minister Churchill appears to be planning to reshuffle his cabinet along with the introduction in Commons of a comprehensive post-war legislative program.

Mr. Churchill is expected before the post-war election to capitalize on the country's interest in the future, and the expected cabinet changes might serve as the beginning of the creation of a post-war national government.

The Daily Herald predicted Saturday that the cabinet changes would be made before the opening of the new session of parliament.

It is understood the contemplated legislative program will be limited to satisfy supporters of Sir William Beveridge's social security plan and to lay the ground-work for a large part of Mr. Churchill's own extensive program of educational, health, agricultural and industrial reform.

The expected cabinet changes would call for the replacement of Sir James Craig secretary of state for war, whose return to the office of a peer is being considered, and probably of Sir John Gort, minister of charge of post-war planning. The changes are described also as involving the promotion of several junior ministers.

Named to his post Feb. 23, 1942, Sir James was the first regular British civil servant to be shifted in recent times from the civil service to ministerial rank. If he leaves the war office he is expected to receive a peerage and a position, probably returning to the treasury.

Herbert Morrison, home secretary and a powerful Labor party figure, may succeed Sir William Jowitt with greatly increased authority over the entire field of post-war problems.

It was indicated that Sir William former attorney-general and solicitor-general may return to the legal side of the government. One of more of the present legal officers—Lord Simon, Lord Jowitt, Sir Donald Somervell, Attorney-General, and Sir Maxwell Fyfe, solicitor-general—are expected to retire.

Among young men slated for promotion are Arthur Henderson, under secretary of the war office, Sir Philip Noel-Baker, parliamentary secretary in the ministry of supply and Oshert Peppas, under secretary in the Home Office.

Most recent change in the British cabinet, announced Sept. 24 in London, the appointment of Lord Beaverbrook as Lord Privy Seal.

Veterans Guard of Canada who enlisted in Military District No. 6 from left to right: Cpl. I. L. Parker of Sherbrooke, N. B.; Ptes. Cyrus Gallego of Wellington, P. E. I.; W. B. Cahill of Inverness, N. B.; A. J. Bagpole of Richmond, P. E. I. and W. R. Manson of Long Creek, P. E. I. (Canadian Army Photo)

**MULLIN — BANAHAN WEDDING**  
The church of the Little Flower Morell was the scene of a pretty wedding Wednesday morning, August 26th, at 11:15 when Rev. Phelan McKenna joined in the holy bonds of matrimony, Marie Genevieve, daughter of Mr. Patrick and the late Mrs. Patrick Mullin of Millburn to Maurice Joseph son of Mr. and Mrs. William Banahan, Morell East, in the presence of a large number of relatives and friends. As the bride entered the church the wedding march was rendered by Mr. Owen Kelly, who presided at the organ and also accompanied the soloist, Mrs. Ambrose Steele, who rendered appropriate solos during the Nuptial Mass. The bride was most attractively gowned in powder blue sheer with powder blue hat and matching accessories and wore a corsage of sweet peas and baby breath and was attended by her sister Mary who becomingly wore rose crepe with black accessories and wore a corsage of sweet peas and baby breath. Mr. Aeneas

Banahan, brother of the groom, acted as groomsmen. After the ceremony the bride party motored to Charlottetown.

The wedding breakfast was held at the Charlottetown Hotel. Later the bride party motored to points of interest on the Island returning in the evening to the home of the bride where a delicious wedding supper was served to a large number of invited guests. The remainder of the evening was spent in music and dancing. The following day, Mr. and Mrs. Banahan left by motor on a short honeymoon to New Glasgow, N. S., returning Mr. and Mrs. Banahan will reside at Morell East where the groom is a prosperous young farmer.

The bride and groom were recipients of many beautiful and costly gifts. Previous to their marriage the bride was tendered miscellaneous showers, one by her girl friends in Montreal, another at the home of Mrs. John Hughes Bangor. The Guardian joins in wishing Mr. and Mrs. Banahan many years of wedded life. (Patriot please copy.)

**CHARLETON W. L.**  
The Charlton Women's Institute met at the home of Mrs. Stewart MacMicken for the October meeting. Meeting opened with reading of minutes. The minutes of previous meeting were read and approved. Five members responded to roll call and one visitor was present. The various committees gave their reports and the following new ones appointed— Sick, Mrs. Robert Carruthers, and Mrs. David Murphy; Program, Mrs. John Myers and Mrs. Arthur Mac-

## NUTRITION MEETINGS

MISS NESTA HINTON  
Nutrition Services, Ottawa, will address public meetings as follows:

## Bristol and Vicinity

Mrs. Cyrus Lapierre received the sad news last week that her brother Pte. Lenius Sanderson, had been killed in action overseas.

An item in this column stating that Miss Catherine Mooney had passed away in Charlottetown, should have read Marie Mooney.

Friends of Mrs. Trainor who is housekeeper for Father McKenna will regret to hear she had the misfortune to fall sometime ago and dislocated her shoulder.

Miss Mary MacDonald spent a few days in the city last week guest of her sister Mrs. W. A. O'Brien.

Mr. Ralph Aldershaw has received his call to the armed services. He is the fifth son of Mr. and Mrs. Art Aldershaw, to be called. The other sons serving are Cecil, in the army, Reginald Harry in the navy and Wilfred in the army somewhere in England.

Miss Mabel Sinnott, P. W. C. spent the week end at her home in Bristol.

Mr. McGurk, arrived here last week with his building moving gear to move the mighty warehouse off the property of Mr. J. W. McGurk. This large building that has housed thousands and thousands of dollars worth of flour and feed along with countless cars and trucks and motor toes, has been purchased by Mr. P. E. Sinnott, and will be moved to his property and used as a barn. Mr. McGurk has built more modern warehouses. Many interested people are waiting to see this mighty building leave its resting place. It has stood for thirty some years but Mr. McGurk says it will be moved just as easy as any other building despite its great height and length. Before this news is read the big task may be completed.

While we are on building moving jobs, Mr. Patrick Curran, has bought a barn from Mr. P. E. Sinnott, and will have it moved to his property this week. Could this building talk it could tell many strange stories of years now forgotten as it was built more than sixty years ago by the late John O'Brien and used as a forge when he was in his prime as an outstanding blacksmith. Horses both wild and tame, were shod here and Mr. O'Brien was well over ninety when he died. The old forge now used as a barn saw more than one wild steed mastered and its walls listened to countless strange stories.

Fish canning is about to close here. Mr. Lloyd Cox reports that he has enlarged his canning plant at Morell Village and installed two re-

frigerators and an up-to-date modern fish cooking boiler and many other things. He has been buying fish along the north side right up to Nulitage and next spring will operate a bigger plant than ever. All summer this plant has given employment to quite a large staff of men and women right at their own door with wages never dreamed of before.

Pte. James Morrison is home on short leave from his training center in Ontario, visited friends in Bristol on Sunday.

Very little coal has arrived here this fall and many are feeling the want of fuel. One woman informed the writer on Sunday she was carrying wood from the woods and cutting it herself, despite all her other work, but lived in the hope her coal supply would arrive any day.

The furnaces in the two Churches at Morell, are still idle but efforts are being made to get them running. W. A. O'Brien and Gordon Batt, of the service department of the Laidlaw Co., having been working on jobs in this vicinity and the men report parts for furnaces are very scarce at this time in coming through. The demand for service men is so urgent that they are working far into the night in an effort to get complete furnaces before severe weather sets in.

Men working along the Morell river report a large amount of salmon this season with the blight. One man with many acres has at least twenty-five acres that may be left in the ground they are so poor.

Mr. Mike Tobin was a visitor to the city last week. Mr. Tobin who is a retired C. N. R. sectionman, is enjoying better health now after his long illness.

Mr. and Mrs. Ephram Malone were in the city last week. Mr. Malone, who has confined to bed for some time with infection, is improving.

## Winter Control Of Cattle Lice

Now is the time for making certain that winter quarters for cattle are thoroughly cleaned, but before the cattle are placed in these quarters it is equally necessary to make sure that the cattle themselves are clean, that they do not carry lice. This is very important. Lice cause serious losses, and it is estimated that if one pair of lice are brought into a stable and left undisturbed they may increase to over 20 millions in the four months of November, December, January and February. There are several methods of controlling lice—by washes of drugs and drug mixtures, dusting powders, and dipping. Dipping, owing to the size of the animals, can rarely be used, and dusting powders are not so effective as washes or dips.

Cresolin of commercial grade, applied with a woollen cloth or medium stiff brush in two per cent solution in warm soft water is an old and favoured wash for the control of lice. Coal tar cresolate may also be purchased, and when used with either cold or warm water is ready for use. Applications of cresolate and other solutions can be made more thorough by spraying pump than by hand.

Another effective and economic method is by treating the cattle with raw linseed oil, but a caution is necessary here. Billed linseed oil or paint oils should never be used on any living animal. Raw linseed oil should be applied with a brush but without hard rubbing of the skin, at the rate of four ounces per cow and repeated at intervals of 20 days or less. After treatment, the animals should be allowed to remain quietly in the stable, and should not be exposed to the bright sunlight for at least 12 hours so as to avoid the danger of oil burn. Generally there are three kinds of cattle lice—the small reddish yellow lice, the long-nosed and the short-nosed species, and all can be easily controlled.

## All Quiet On Finnish Sector

STOCKHOLM, Oct. 24 (AP)—The Finnish sector of the Russian front—the world's northernmost battle zone—was quiet today.

While great battles raged south of Leningrad, Finnish and German soldiers on one side and Russian troops on the other did not fire a rifle for weeks at a time in this sector.

Small-scale aerial activity, patrol skirmishes and sporadic exchanges of artillery barrages have been the extent of warfare for the last 17 months along the Neva-Mana Law from Leningrad east to Lake Onega and northward to the Barabara Sea at Petsamo.

Since May, 1942 there has been no heavy fighting between the armies of Finland and Russia which, in their winter war battles of 1939 and 1940 and the summer campaign of 1941, gained a reputation for fearlessness, thoroughness and courage.

Ninety-thousand Germans are reported to be fighting alongside the Finns. Nazi troops hold positions in the Petsamo district, and one sector of Lapland. Some Finnish remnants are reported with them. Finnish troops control the remainder of the front.

## Chinese Replace Japanese In B. C.

VANCOUVER, Oct. 24 (CP)—An estimated 23,000 Japanese have been evacuated from British Columbia's coastal regions since Japan attacked Pearl Harbor but the shift has been carried out with hardly a pause in the province's war-quickened industrial life on which they had such a healthy grip in days of peace.

Chinese and Occidentals moved in when the Japanese moved out. Former Japanese stores, fishing boats, timber holdings and farms were taken over, either outright or by lease. There was no noticeable lag in these enterprises, and perhaps in fruit and berry growing.

Vancouver's one-time "Little Tokyo" is fast becoming a "Little Chungking." Many old Japanese signs are still there. But most have been replaced as Chinese—quick to snatch the opportunity to spread their own little district into the Japanese sector they once shunned—bought up Japanese businesses.

# Proved on the Speedway... and now on the Battlefield

Remember back in the pre-war days when, year after year, Firestone tires used to sweep aside all the records for sustained high speeds!

In these stern times there are no more speedway classics. But Firestone tires still continue to demonstrate that they have no equal for strength, stamina and dependability — on the world's battlefields. From the sub-zero Arctic to the scorching tropics, Firestone tires are carrying our boys to Victory.

Just as better tires came from Firestone's experience on the speedway, you can depend that in building war tires, Firestone engineers still continue to lead in tire engineering and design . . . that this experience and knowledge is being accumulated to give you even better Firestone tires in the days to come. In the meantime, redouble your efforts to make tires last — no matter what make they may be, put them in the care of your nearby Firestone Dealer now.
