# EYES OF ALL NATIONS.

France has one blind person to every 500 inhabitants. In Egypt twenty one natives were killed because of defective vision, during the first week's operations of an electric railway. In Germany and England there is one blind person to every 1,000. China has more blind than all other countries. Spain comes next. America averages only one in every 1,500, the lowest per cent of any country. This is explained in the fact that scientific adjustment of glasses has reached its greatest perfection in this country. Many eyes have been saved through the timely use of glasses. We test eyes for glasses. Any eye we cannot fit should have the attention of a doctor who is an eye specialist.
