At a recent meeting of the Board of Trustees of Souris Hospital it was decided that a new building be constructed for hospital purposes. Up to that time it was undecided as to whether the erection of a new building would be undertaken or whether one of the available buildings in the town be purchased and remodelled to serve temporarily. The site has not as yet been definitely decided upon, pending an inspection by the architect and a decision from him as to which of the lots available would be most satisfactory for the type of building planned. Construction will commence immediately upon the plans being approved by the building committee and the building will be designed in such a way that an addition may be made when circumstances warrant. Money for the proposed project is being raised by public subscription and the present time over \$14,000.00 has been subscribed. The appeal for funds is meeting with a very generous response not only throughout the community but also from many of the prominent business houses in other parts of the Province.
