# THE CHARLOTTETOWN GUARDIAN

WEDNESDAY MORNING, OCTOBER 9, 1907.

### MILITARY AIRSHIPS.

France has now two military airships, Germany two and Great Britain one. Germany is about to build another and larger one. Those of France were built in 1905 and 1906. All are in general of a similar design, a huge balloon of a light or sausage shape, inside the lifting power, but in which is supported a frame work in which are the motive power and the place for the crew and other equipment.

The British military airship has been at all years in the shade, so to speak, although almost down to the date of her trial trip it was not known to the general public that it was under construction. The secret was well kept. The time taken in building was due to changes in plans. The balloon is 100 feet long, and 50 feet in diameter. The car, supported underneath, is shaped like a canoe and is 30 feet long and 12 feet deep. It is propelled by an engine of 85 horse power, operating two propellers. The latter are 10 feet in diameter each and have two blades.

This military airship is called the No. 5. It is designed to carry three men, and is believed to be capable of a speed of 10 to 15 miles an hour in calm weather, with a corresponding variation in increase when going against or with the wind, which is very light. The No. 5 is the first of a series of military airships which will be built in the future. The No. 5 is the first of a series of military airships which will be built in the future. The No. 5 is the first of a series of military airships which will be built in the future.

heroic effort leaves men on shore. After the terribly fatal wrecks on the north shore of the Island last year, and the fair promises made by the Government to provide life boats, stations and life saving apparatus it was hoped that something would be done for the security of seamen's lives along our coast. Nothing has been done. In this and in other matters our Province is treated as if it were no integral part of the Dominion, but a mere outside appendage and of little consequence.

Wind and rain regrettably marred the enjoyment of those attending the opening of the Exhibition yesterday and prevented many from attending who would otherwise have done so. Better weather, fine and cool is promised for today and it may be hoped that these conditions will continue for the days to come.

The leading editorial article in The Examiner of last evening on the Commission of Enquiry, created by the Senate, is taken word for word from an editorial article which appeared in the Chronicle of October 1st. We feel that the views therein expressed are thoughtful and of being thus conscientiously re-echoed. The Examiner's article is an excellent example of the kind of writing which we have always found in your columns, and we have always found in your columns, and we have always found in your columns.

### HORSE NOTES

The Dominion Express of 21st Sept. is the first to report that the horse named "The Duke" has been sold for \$50,000.
