Fox Ranching Pays

Fox ranching is today paying handsome returns, provided average intelligence is displayed in securing prolific stock, and in ranching same to the best advantage from a view point of feeding, breeding and sanitation.

More attention should be paid to ranch building, particularly the breeding pens and runways which should in all cases be covered, then if severe winter storms come the foxes cannot climb over the top and escape.

Too much emphasis cannot be placed on the importance of buying only THE BEST IN FOX WIRE NETTING. Cold, heat, rain and winter storms are the destructive elements which must be combated—to do so, it is necessary to use "Brayco" Brand Fox Netting, a high grade wire specially made-to-order, extra heavily galvanized, which contains extra twists in the meshes and will not rust, made on special weaving looms, expressly for Canadian fox ranchers.

It will pay you to send your netting order in to us now, An advance in price will take place soon and all orders not in our hands before then will have to come under the higher prices, so order today from our stock of assorted sizes. "Brayco" Fox Netting is sold exclusively by the
