**YORK RIFLE CLUB ANNUAL PRIZE SHOOT**

The annual prize shoot, the crowning event of the season in the York Club, was fired on Wednesday, October 23rd, and the weather man was certainly on his best behavior. There is no better sport than rifle shooting and all who took part had an excellent practice, a real enjoyable time, got a good supper, a good prize and went home smiling. Firing on the range continued till the light failed, when all gathered at the York Hall, where the ladies, the wives and best girls of the pick of the Island's riflemen, were preparing supper.

When all had been satisfied with the good eats provided, the Secretary of the Club Ira M. Brown with his capable assistant H. T. Vessey, called the meeting to order and in his few opening remarks especially thanked the markers for their excellent work throughout the day and also Mr. A. C. King of the city for his valuable assistance as score-keeper and in many other ways.

**NEW 72 WEEK CALENDAR**

MOSCOW, October 28 - A new calendar with 72 weeks in the year, six weeks in the month and only five days in the week, has been drawn up here. It is designed to fit the non-stop, round-the-clock, five-day work week recently instituted in Russian industry. The Academy of Science has gone over the projected calendar and approved it. It has now been referred for further study to the Council of People's Commissaries which corresponds to the ministerial councils in other countries of Europe.

Saturdays and Sundays are simply days away with in the new calendar. There will be thirty days in each month and each day of the week will always fall upon the same days in each month. A bit of calculation reveals that this fixed calendar calls for only 360 days in the year. This does not agree with the sun on its course, for Old Sol insists upon taking 365 1/2 days for his annual round, the fraction being enough to make an extra day every fourth year, calling for February 29 in western calendars and making Leap Year, the delight of spinsters.

It simply decreed that these extra five days each year and the added 24 hours of leap years should be celebrated as holidays.

These days are off in a category by themselves. They belong to no one month and are scattered through the calendar. The day devoted to the memory of Lenin, who is venerated as father of the proletarian revolution, is first on the list. It is fixed to come at the end of January, or rather right after that month. In between January 30 and February 1 Lenin will be revered for 24 hours but the event will not be allowed to disturb the arrangement making January 30 fall on a Friday and February 1 on Monday, the next official day.
