HOW TO CURE A CORN.

It is one of the easiest things in the world to cure a corn. Do not use acids or other caustic preparations and don't cut a hole in your boot. It is a simply to apply Putnam's Painless Corn and Wart Extractor and in three days the corn can be removed without pain. Sure, safe, painless. Take only Putnam's Corn Extractor.

Not To Be "Beaten"

A farmer went into a grocery store and exhibited to the eyes of an admiring crowd an enormous egg about six inches long, which he avowed to have been laid by one of his own hens. He had it packed in cotton and would not allow anyone to handle it, for fear of breaking the phenomenon.

The grocer examined it with the rest, and, intending to chaff the countryman said: "Pshaw! I've got something in the egg line that will beat that."

"Till you a dollar you haven't," said the countryman, getting excited.

"Right!" replied the grinning grocer; and going behind the counter, he brought out a wire egg-beater.

"There's something in the egg line that will beat it, I think," said he, reaching out for the money.

"Hold on, there," said the farmer; "let's see you beat it."

And he handed the egg to the grocer. The latter laid out his hand for it, but dropped it in surprise on the counter, where it broke two soup plates and a platter. It was of solid iron painted white.

"Some folks think they're mighty clever," muttered the farmer, as he pocketed the money and walked out; "but 'tain't no use backing against the solid fact."

"Taint no use backing against the fact that neither the quality nor prices of our Groceries are to be beaten. This accounts for our increasing trade. A.M. Is your stock of jam running low? We still have a quantity of that pure home made Raspberry at 10c per lb. Try Eureka Blend Tea, 25c per lb.
