MILITARY BALLOONING

**A WONDERFUL MACHINE. CHARLOTTETOWN MAILS**

If all is true that August Peters, re-  
 cently of Chicago, claims for a machine  
 he has invented, he cannot only run a  
 locomotive or a steamship but can sup-  
 ply the steamer or the train with fresh  
 air, with cold air for the furnace room,  
 and ice for the storage departments, and  
 to cap it all it runs itself, he says. Mr.  
 Peters today showed his machine in  
 working order.

To outward appearance the apparatus  
 looks like an immense ice chest, but as  
 soon as the doors are opened a mass of  
 piping is revealed. At the back of the  
 chest, is a cylinder and a force pump.  
 By means of an electric motor air is  
 forced through the cylinder and force  
 pumped into a storage chamber and  
 thence through a series of pipes sur-  
 rounded with ice.

To start the machine in action to its  
 fullest power it must be loaded with  
 ninety pounds of ice. After that it makes  
 its own ice.

Mr. Peters says the machine is the  
 nearest thing to perpetual motion ever  
 invented; that it will furnish motive  
 power to ocean steamships; that the one  
 he now has working at 113 Bedford  
 avenue, Brooklyn, will easily run a  
 2,500 horse power marine engine; that  
 it will at the same time provide fresh,  
 dry air for a ship at the rate of 1,000  
 square feet per minute and simultane-  
 ously manufacture ice at the rate of  
 1,800 pounds an hour.

Slightly modified, Mr. Peters says,  
 his machine as it now stands in his  
 Brooklyn workshop could be fitted into  
 the Holland submarine boat and enable  
 the crew of that boat to remain under  
 water indefinitely.

When Mr. Peters started the machine  
 in action a strong current of air was  
 expelled from the escape vent so  
 cold that in a few minutes the tem-  
 perature of the shop was greatly re-  
 duced. He said it was an easy matter to  
 bring the temperature of the surround-  
 ing atmosphere down to 50 degrees be-  
 low zero, and that he could net it down  
 to 200 degrees below zero inside the  
 icebox. There was no ice in the machine  
 at the time of the exhibition.

By means of an air tank placed above  
 the machine a sufficient amount of com-  
 pressed air was constantly being stored,  
 which would keep the apparatus running  
 indefinitely, said Mr. Peters.

Peters was born in the Village of  
 Rahsdemnitz, near Stolp, in Pomera-  
 nia, Germany, fifty-five years ago. He  
 served three years in the German  
 army and through the Brazil-Paraguay  
 war.

Peters moved to Brooklyn three  
 months ago from Chicago, where, he  
 said he had lived for twenty-seven years.
