THE FULL DINNER-PAIL

One of the prospects held out to the people of Canada before the last election was that the Liberal regime which was shortly to be ushered in would be an era of prosperity. The laborer would have a good wage and a "full dinner-pail."

In this province where business failures have always been a rare exception for many years, we have had more failures since the Liberal party came into power than in any other much longer period.

Our position, we repeat, is infinitely better than theirs and capable of infinitely greater development than they are. Yet the complaint about hard times has become almost universal.

Immigrants who chance to hear our complaints are likely to give us a wide berth. What we need to know most of all is that, as compared with other sections of Canada, we have nothing to complain about. It is true we have had two poor years, as what counts and weight and not to be disposed of in a curt refusal such as was sent to Moncton.

Notes By The Way

The action of our local Board of Trade in answer to the request to send delegates to a conference with other boards of trade and declining to send any delegates may well excite surprise throughout the mainland provinces of the Maritimes.

It is evidently not what the Government of Nova Scotia desired. They treated the subject as one of importance and gravity and in the speech from the throne at the recent opening of the Legislature promised to confer with the government of New Brunswick and Prince Edward Island with a view to concerted action in regard thereto.

The Public Forum

This column is open for the discussion by correspondents of questions of interest. The Charlottetown Guardian does not necessarily endorse the opinions expressed by its correspondents.

Modern Dances

Sir,—I read with keen interest the letter in the Guardian, dated Feb. 13, entitled "Modern Dances."

I remember hearing it said some years ago of a certain village on our fair island, where a prayer-meeting used to be held every week. The place would be crowded and you couldn't find a young man or woman in that building who was not a Christian.

Children are so pure when young, and when half-grown, the air becomes so impure, that the child's life that was so innocent and sweet becomes tainted and some day they drift to places of amusement such as the dance hall which is the first step downward.

2 Years in Prison and Lash for Flynn

TORONTO, Feb. 28.—J. Harry Flynn was today sentenced in the police court to two years imprisonment and ten lashes for indecent conduct.

That Body of Yours

By James W. Barlow, M.D.

(COPYRIGHT) HOW TO STAND PROPERLY.

If you obeyed the commands of the sergeant-major in your mind you would always stand erect. Perhaps you remember them: "Head up, chest out, chin slightly drawn back, abdomen down and weight of the body on the balls of the feet."

Now what do you see? A wonderful transformation has taken place. The head is erect, the shoulders are back, the chest stands out and the arms are back. You look so good you're proud of yourself.

Now how do you develop these muscles? Just two simple exercises. First, lie on the back and raise both legs slowly with knees straight until they are at a right angle with the body. Do not raise the buttocks off the floor. Rest take a breath and raise them again. Repeat this eight times, increasing one each day up to sixteen times.

Canada Does not Benefit

(Continued from Page One.)

after the treaty goes into force, is 107.50 francs. On component parts of copper, pure or alloyed, moulded, wrought, etc., Canada today pays 360 francs and the United States 90. We shall hereafter pay that lower rate. Another item on which Canada today pays 504 francs under the treaty will be subject to the reduced rate of 126 francs, which is the American rate.

Mr. MACLEAN (South York): Is any preference given the United States today by France on the importation of a Canadian product like nickel?

Mr. FIELDING: I could not tell my non-friend of hand how nickel is affected. The articles I have mentioned are clearly those in which there is discrimination. I shall be glad to go into the nickel question and let my hon. friend know later.

Sir HENRY DRAYTON: I think my hon. friend has covered nickel in this treaty.

Mr. FIELDING: Yes. On component parts of machines and shunting, not specified, of two or more metals, etc., we are paying now a rate of 350 francs, the American rate is 140 francs, and we will get the benefit of this reduced rate. On another item of the same class we are paying a rate of 306.25 francs, against the American rate of 122.50, and we will get the benefit of this reduced rate.

On screws, eyebolts, strap hinges, etc., we are paying 784 francs against the American rate of 294 francs, which reduction we shall get the benefit of. On another item of the same class we are paying 616 francs, while the American rate is 252 francs; we will get the American rate. On another item of the same class we are paying 476 francs, and we shall get the benefit of the American rate of 189 francs. On another item of the same class we are paying 392 francs and shall get the benefit of the reduction to the American rate of 147 francs.

On another item of the same class we are paying 1064 francs, and will get the benefit of the American rate of 399 francs. On another item of the same class where we are now paying 840 francs we will pay the reduced American rate of 315 francs. On another item of the same class on which we are paying 616 francs we will get the reduced rate of 231 francs. On still another item of the same class on which we are paying 560 francs we shall get the benefit of the American rate of 210 francs.

On all these things which I am enumerating the Americans have the advantage today, and in some cases that advantage to them and disadvantage to us seriously affects our manufacturing interests.

On household wares and all articles of iron, steel, etc.—quite a large list—Canada is paying 184.4 francs, the American rate, its 59.50 francs. We will get the benefit of that rate. In another case in the same list we are paying

(Continued from Page One.)

195.30 against the American rate of 63 francs, which of course we get the benefit of. On another item of the same group our rate is 217 francs against the American rate of 70 francs, and we get the advantage of this reduction too. On porcelain we are paying 76 francs, while the Americans are paying 23.75 francs. We will have that reduced rate. On another item in the same class we are paying 256 francs while the Americans pay only 80 francs. We will get the benefit of that reduced rate. On another item in the same class we are paying 192 francs and will get the benefit of the reduced American rate of 57.60 francs. On still another we are paying today 320 francs against the American rate of 96 francs—another reduction we will get the benefit of.

Upon skins and hides prepared, vanished, we are paying today 2500 francs and we shall get the benefit of the American rate of 625 francs.

On other kinds of nails we are paying today 196 francs while the American rate is 66.50. We will get the benefit of this rate.

All the above mentioned goods originating in and coming from Canada will enjoy the same tariff rates as like goods the produce of the United States. I think hon. gentlemen will admit that in that respect the treaty removes a very great disadvantage.

I do not wish to magnify the importance of the treaty. As I have already said, the volume of trade we have with France is not very extensive, but whatever it is, 25 francs, against the American rate of 122.50, and we will get the benefit of this reduced rate.

On another item of the same class we are paying 476 francs, and we shall get the benefit of the American rate of 189 francs. On another item of the same class we are paying 392 francs and shall get the benefit of the reduction to the American rate of 147 francs.

On another item of the same class we are paying 1064 francs, and will get the benefit of the American rate of 399 francs. On another item of the same class where we are now paying 840 francs we will pay the reduced American rate of 315 francs.

On another item of the same class on which we are paying 616 francs we will get the reduced rate of 231 francs. On still another item of the same class on which we are paying 560 francs we shall get the benefit of the American rate of 210 francs.

Mr. MEIGHEN: The minister recited quite a number of items without giving their names and compared the old duty with the new, that is, the American duty we have today with the duty which we have been paying heretofore. Will he say that in respect of all these items Canada actually produces them for export?

Mr. FIELDING: We are advised by the manufacturers' representatives that all the items I have read are of importance to their interests. As I have already said, in looking over the list you will see many articles which today are not important in our export trade. But the development of our manufacturing interests is going on very rapidly today, and many of these items which hon. gentlemen may think of little or no importance today have been included in the treaty at the special wish of the manufacturing interests of Canada. They felt that in view of that rapid development it was wise to make provision for the best terms available in order that we may reap the advantage when we do begin to export those items.

Mr. GOULD: Presuming the French government will withdraw these concessions from the United States, do our concessions like wheat terminate at that time, or do we revert to our present tariff?

Mr. FIELDING: I have no authority to say that the French government will withdraw these concessions from the United States, but I can imagine it might be possible. If my hon. friend will read Article 5 he will find it is in these words:

All products originating in and coming from Canada other than those mentioned in schedules A and B to this convention shall be subject in France to the rates of the general tariff of 1910 as long as by virtue of the French decree of March 28th, 1921, such tariff shall continue to be applicable to the products of the United States of America other than those specified in schedule A and schedule B to the French law of March 29th, 1910.

If the United States of America should at any time cease to enjoy the benefit of the French decree of March 28th, 1921, products of Canada other than those enumerated in schedules A and B to this convention shall enjoy a reduction of twenty five per cent on the difference between the French whatever the rates of these tariffs may be.
