YESTERDAY'S STOCK AND BOND QUOTATIONS

MARKET GOSSIP

(By John L. Cooley, Associated Press Financial Writer.)

NEW YORK, N. Y., March 15.—Selling pressure relaxed in the stock market today, but there was insufficient buying power to give much support to the late recovery which reduced or eliminated earlier losses. Gains and losses were so evenly distributed at the close that the final Standard Statistics Associated Press composite was unchanged. Nevertheless, fractional declines prevailed in a representative list of leading industrials. Rails were frankly heavy, most of the day, but steadied toward the close. Total turnover dropped to 1,471,000 shares.

Neither foreign nor domestic market appeared to be further concerned over the Kreuger death. The firmness of London, Paris and Berlin security exchanges stimulated enough purchases by shorts to give local prices a fair lift during the morning, but this recovery was undermined by evidence of selling in carrier stocks which dragged downward until the last hour. Chesapeake and Ohio made a new low for the year and, with Santa Fe, was off nearly 2 points net. Southern Pacific Preferred and Chesapeake Corp. were also soggy. Union Pacific was erratic, but finished fractionally higher. Canadian Pacific, an outstanding in its group rallied 1¾.

Preferred stocks of U. S. Steel, Bethlehem and Jones and Laughlin sagged although none was particularly active.

Special interest naturally attached to the Kreuger issues. Kreuger and Toll after selling at 5, fell back to 3, where it closed, unchanged. International Match Preferred returned a small gain, Eastman Kodak, closely followed because of George Eastman's stock, held firm.

The bearish tinge that has attached to the rail equities this week seems to have originated in reports that January earnings were disappointing despite the wage cut. Car loadings for the week ended March 5 showed some recovery from the preceding total.

Money markets were easy coincident with the March 1' government turnover. The United States treasury's overdraft was estimated at between $50,000,000 and $60,000,000 comparatively small, and was doubtless absorbed in large measure by member banks. Large offerings of time funds were reported to have been made by commercial banks at 3½ per cent for 90 days, but whether they were successful in placing loans was not disclosed. Time money has been very inactive and the banks have been virtually out of the market.

"American Metal Market" said steel production was holding unchanged at approximatey 26 per cent of present capacity, showing little change from February's average. Prospects of larger buying by railroads are "gradually increasing," this review said, but the farm implement industry has completed the most active part of its season.

CHICAGO

CHICAGO, Ill., March 15.—Despite brisk export demand for wheat from North America, grain prices underwent late downturns today, largely as a result of stock market declines.

Export purchases of Canadian and United States wheat were estimated at as high as 2,000,000 bushels. Part of this grain was said to have brought the Chicago May price, FOB the Atlantic.

Wheat closed unsettled at the same as yesterday's finish to ⅝ lower, corn at a shade decline to ¼ advance, oats ⅛ off to ⅛ up, and provisions varying from five cents setback to a rise of two cents.

WINNIPEG

WINNIPEG, Man., March 15.—Strong Liverpool cables and an increased overseas demand for Canadian wheat imparted a firm undertone to wheat prices in the grain pit here today. Values at the close were ⅛ lower to unchanged.

May declined ¼ to close at 6 cents while July and October each were ⅛ lower to unchanged at 66⅝ and 68⅛ respectively.

Good buying by continental and seactive session. Offerings were quite board houses featured today's quite heavy at times but were easily absorbed.

It was a smart comeback after yesterday's decline. At top levels prices showed gains of half a cent but slackened off toward the close. Substantial buying against overnight export business accounted for the opening strength. Upwards of 1,250,000 bushels had been sold to foreign buyers.

oFreign news today was quite bullish and was featured by the report that the French government had authorized an increase in their foreign wheat quota. The change permits of a 30 per cent a mixture of foreign with domestic wheat, an increase of five per cent—the largest quota permitted in France for almost a year. Broomhall intimated that the Soviet Governmen had described spring seeding prospects as "alarming" due to a deficiency in seed grain.

No improvement was noted in cash wheat demand and apart from low grade oats for export coarse grains remained dormant.

Montreal Market Sidelights

MONTREAL, Que., March 15. (By the Canadian Press)—The interlisted issues improved their position slightly in a somewhat more active session today on the Montreal Stock Exchange. The main lit, however, was irregularly lower, with losses outnumbering gains by 10 to 4.

The street apparently considered the International Nickel report, issued yesterday, was favorable, the issue remaining firm all day to close ¼ higher at 9¼. Brazilian Traction held the leadership in activity with sales of 1,110 shares and gained ⅝ at 13¾. Charles Gurd was unusually active, with sales of 785 shares and dropped 4½ points on the day to close at 16, ex-dividend. Canadian Pacific, with sales of 748 shares, closed a full point better at 18½ after touching 19½ shortly after the opening.

National Steel Car went up half a point to 11¼ upon announcement by the directors that the dividend rate of 50 cents per quarter would be paid for the current three months.

Such issues as Canadian Car, Canada Cement, Asbestos, Consolidated Smelters, Hollinger and Massey Harris all declined during the day, finishing with losses but at slightly better levels than the day's lows.

Total trading amounted to 6,331 shares compared with 5,449 yesterday and 26,336 on the corresponding day of last year. There were no price changes in the bond department where total sales were $6,000.

Sterling closed at $4.0619 and United States funds at a premium of 11 15-16.

MONTREAL, Que., March 15.—An irregular price trend in somewhat more active dealings characterized today's session on the local exchange, with little impulse for expanding market operations furnished by either the market in Wall Street, where an easier tendency held sway, or in the news development of the day having an influence on security markets. C. P. R. furnished a firm feature here in light dealings moving up a point to 18½, and coming in the face of a further selling movement directed toward the rail issues in New York. The preliminary earnings report of this road for 1931, as made public yesterday, was regarded as distinctly satisfactory, having regard to conditions in general and as they affected the railways in particular. Of the other interlisted issues here, Brazilian was up ⅝ while Internatonal Nickel improved ⅛.

—o—

An easier tone prevailed in the local bond market today with, however, no pronounced selling pressure. High grades were fractionally off, while domestic utilities and corporations showed little change. International Issues were weak, with reactons from one-half to two points reflecting the general tendency of the New York Market.

Sanatorium Commission Visits Dairy

Yesterday morning Mr. Justice Haszard, Mr. George DeBlois and Mr. Simon Paoli of the Sanatorium Commission, made an inspection tour of the source of their milk supply, the Health Pasteurized Milk Company, East Royalty.

The party left town by sleighs about ten o'clock and made a thorough inspection of the whole plant while it was in operation. They also inspected the three different barns, the cattle, and the barn equipment. It was a most profitable and educational tour. The filtering of the milk while still hot from the cow, and the thorough processes it goes through before it reaches the customer, is indeed quite interesting, and after watching the different operations in the handling of the milk, there is no need of fear of any contaminations whatever taking place.

The stables are one of the most important parts. The herds supplying the milk are owned by Mr. Walter Heartz, Mr. Harold Heartz and Mr. Neil Darrach. These are the three owners of the company. The milk is supplied by Holsteins, Ayrshires and Guernseys. The barns have high ceilings, concrete floors, and an automatic water supply. The animals are kept perfectly clean, and their rear quarters are kept thoroughly clipped, making it easier for the animal to be kept clean and less danger from anything contaminating getting in the milk.

As Mr. Heartz told the delegation the milk coming from a cow has a temperature of about 100 degrees. It is immediately placed through patent filters and chilled before it leaves the barn, thus killing any germs and cleansing the milk almost as soon as it comes from the cow.

After this first process, it is then taken up to the plant where it is heated to 143 degrees for half an hour. Then it flows over a series of plated pipes which have brine running through them. In this way the milk is cooled instantly to 40 degrees.

After it comes off the cooling process, it is filtered again through fine screens and runs into a tank which has underneath an automatic filler system. The bottles are filled and stopped before they leave the tank, going direct to the refrigerator.

The commission was highly pleased with the milk supply for the Sanatorium. Mr. Heartz stated they have been continually adding to their herds, and as the demand increases, the herds will be enlarged. They have now the supplying of the Canadian National Hotel, and at present the output of the plant is 350 quart bottles per day, and 40 quarts of cream.

Samples of the milk were passed out to the commission as it came off the cooler. The milk certainly has a fine natural flavor.
