WASHINGTON, Oct. 20—(CP)—Negotiations on long-awaited United Kingdom-United States reciprocal trade agreement were reliably reported today to have come to a standstill because of dissatisfaction with concessions offered by the British Government.

It was said an official communication insisting on the granting of appreciable concessions on a small number of important American exports had been sent to London.

A point had been reached, it was said, where the United States negotiators had warned that if the requested concessions were not forthcoming the idea of a trade agreement between the countries might have to be scrapped.

This picture of the situation was said to have been conveyed to London in the form of a summary of concessions the British negotiators have agreed to thus far.

The communication was reported to have pointed out that these preferential offers did not justify the Washington Government in signing an agreement at this time.

The products causing the serious hitch were understood to be automobiles, hams, lard and bacon.

HENDAYE, France, Oct.20—(AP)—Advices from Spain today indicated that both sides in the Civil war were preparing for a new offensive without the aid of foreigners.

On the Insurgent side, Navarrese, Galician and Castilian troops have replaced 10,000 Italians who have returned home. Italians remaining in Spain will be kept in the background during the next offensive. (Dispatches from Italy indicate that Italians left in Spain number less than 20,000.)

On the Government side, non-Spanish units have been withdrawn from the front. Foreign airmen have been replaced by Spaniards trained in Russia.
