THE MORNING GUARDIAN

MONDAY, OCT. 3, 1898.

PROVINCIAL PROHIBITION.

Thirty four years ago the governments of the three maritime provinces had sent delegates to Charlottetown to formulate a scheme of maritime union. They would undoubtedly have accomplished this purpose but for the arrival of the Canadian delegates on the scene with the larger and more ambitious plan of a general union of all British North America. The latter plan was adopted with much hesitation by the eastern provinces and with what results we have seen.

From that hour we have been subjected to the will of the people of the large central provinces. They forced upon us a high tariff, contrary to our wishes and interests. We were natural free traders, but we gave up our most cherished fiscal and economic traditions at the will of our new masters. They taxed us to build the Intercolonial Railway, that they might have an outlet to the sea; to build a transcontinental Railway, that Ontario and Quebec might open new markets for their manufactures in the North West and on the Pacific coast. They called for millions more to deepen the old Canadian canals for their traffic, not for ours.

of the maritime provinces, thus wholly subjected to the will and interest of Ontario and Quebec, and taxed beyond all precedent in our history, grew poorer and our people migrated abroad, so that there was practically no increase in our numbers at home. This the last census showed all too plain.

And now what do we find? The people of the maritime provinces have voted in the proportion of five or six to one in favor of the suppression of the liquor traffic by law. And again the stronger will of Ontario and Quebec is to be imposed upon us, to perpetuate the whiskey trade and fat ten the Ontario and Quebec distillers and brewers. Had we, as our people desired, formed the maritime union projected in 1864 we would now be a federation of free self governing people, with our trade free, our debt nominal, with the liquor traffic under ban of the law and our people prosperous and happy.

It is useless now to repine over the mistakes of the past. There is much that is beyond remedy. The big provinces must have their way in regard to prohibition as to all else. We must submit with such grace as we can command. Prohibition for Canada is now apparently relegated to the back ground. We have yet the one resource of enacting prohibition by act of the provincial legislature. It will be less effective, no doubt, than the total prohibition of the importation, manufacture and sale that we hoped for, but yet a good law--as good as the Maine law--can be enacted. To this we must now bend our energies. The people of the Island have spoken in thunder tones for prohibition; it is the duty of the legislature to give them the best it can give.

We shall return to the subject.

EDITORIAL NOTES.

General Kitchener is said to fail in one point of courage. He is very timid of a photographic camera, a fault unknown to American generals.

Boston Advertiser states that "most of the matters before the Quebec commission have been so fully and freely discussed and with so good an understanding that their settlement is not only possible but probable."

Sir Wilfrid Laurier is quoted as saying in reference to the plebiscite: "It is the function of all responsible and constitutional governments to listen to the voice of the people." If they listen they will hear of a big majority for prohibition, just now. Another report is that Hon. Mr. Blair says the result of the voting was "a black eye for prohibition." Perhaps he did not say that.

The Canadian reside in Boston have sent to Ottawa a contribution of \$275 to the treasury of the Victorian Order of Nurses, as a token of their interest in that worthy order.

Hobson has raised and saved the Spanish cruiser Maria Teresa and she steamed away from the spot where she was sunk to Guantonomo--using her own steam power. It is expected to save the cruiser Colon in the same manner.

A lot of by-elections are to follow the plebiscite pretty closely, or at least before October closes. These will be held in North Simcoe, Lambton, West Huron, Bagot, Levis, Montmagny and East Prince. It will be of great interest to note the result.

And now some people are saying that the 24th of November is too late for Thanksgiving Day, that the bountiful harvest is almost forgotten by that date, and that a day should be selected for the expression of the nation's gratitude that is in memory distance of the harvest.

A plebiscite meeting at Lachine, Quebec, was broken up by some roughs who threw eggs at the exhibitor of some views intended to influence them for their good. He is now offering \$25 for the arrest and conviction of the one who threw an egg that hit him in the mouth.

Hawaii sets an example to many countries of greater pretensions in the matter of education. The little state spends half a million dollars yearly on its schools, and education is compulsory. By the last census over 85 per cent of the native population of the islands could read and write. The compulsory system applies to the children of all classes, Hawaiian, Chinese, German, French and English.

During the last ten days of the campaign it is said there were two thousand meetings held nightly in the interest of the prohibition party. On the Sabbath previous to polling day it is thought that half a million people listened to sermons in advocacy of legal restriction. But comparatively little of this work was done in those districts where it was most needed--in the French speaking parts of Quebec. Before another plebiscite is taken there must be a lot of temperance missionary work done in the province of Quebec.

One of the most enterprising spirits in the matrimonial field keeps a lighthouse thirty miles off the coast of Maine. The other day his wife died, and he rowed the body to the shore for burial. That duty attended to the sixty year old widower was introduced to a widow who sympathized with him, proposed to her and was accepted. They were married at once and rowed back to his home in the ocean, in time to have his light burning at sunset. He had rowed sixty miles, buried one wife and married another since sunrise.

On the eve of the plebiscite campaign the Hamilton Herald sent a circular to all the clergymen of that city asking whether they believed that prohibition would conduce to the moral welfare of the people of Canada. Sixteen replies were received. Of the six answers from Methodist ministers, five were strongly affirmative and one evasive. The two Baptist, two Congregational and one Christian Worker who replied all stood squarely for prohibition. Of the three Presbyterian ministers one believes in prohibition and two were in doubt and declined to take a side. Of the two Anglican clergymen one "would rather see the law we have" and the other declared his belief that a prohibitory law would be "immoral" and a "death blow to true religion on the lines of temperance."

TWIN TORTURERS!

Lumbago and Rheumatism made Harmless by Dodd's Kidney Pills.

Lumbago and Rheumatism cause endless pain and suffering. Every man and woman who runs chances of getting wet, or catching cold, is liable to suffer from one or both. Our hospitals are full of sufferers from these diseases; none are more painful. Every nerve is on fire; every joint is a centre of agony; every muscle an area of torture. To move hand or foot makes the victim shriek with agony.

Rheumatism makes more cripples than all the railroad accidents that ever happened. Twisted, misshapen caricatures of humanity, who cannot walk without misery, are to be seen every day. The kidneys are to blame. If they are healthy you needn't fear Rheumatism or Lumbago. Dodd's Kidney Pills keep the kidneys healthy and cure Rheumatism and Lumbago. Dodd's Kidney Pills ALWAYS CURE.
