

INDIGESTION Troubled Him For Two Years

Mr. H. C. Harvey, Novar, Ont. writes: "I have been troubled with indigestion for the last two years. I have taken everything I have seen advertised, but have never had any of them do me so much good as BURDOCK BLOOD BITTERS. I have taken six bottles and haven't had an attack since. It is the finest medicine you can take for the food."

Connolly Estate Scholarships

Applications will be received by the undersigned until June 14th 1928, from students, desirous of competing in a written examination for a Connolly Estate Scholarship. This examination, to be held in July next, is open to all deserving students who shall have been found eligible to compete, in accordance with the provisions of the Will of the late Owen Connolly. Each applicant shall state (1) his name in full; (2) age; (3) Names of both parents; (4) Post-office address; (5) Nature and extent of his studies during the past year.

M. J. SMITH Secretary "Trustees Estate of Owen Connolly" Kinkora, P. E. I. May 28th, 1928. 4752-30-31-6-2-5-7-8.

AUCTION SALE

I am instructed by Frances Haughey to sell by auction on the Premises at Kelly's Cross on Friday, June 15th, A. D. 1928, his farm consisting of 65 acres of No. 1 Land all clear and in a good state of cultivation. Also all his household furniture. Sale positive as owner is leaving the Province. JOHN P. BRADLEY Auctioneer. 4653-6-8-31.

FOR SALE

I offer for sale at North Granville, my mill property, also new dwelling house, two acres of land included, in a well located place near church, school and hall. MR. GEORGE F. WILKS, Bradalbane, R. R. No. 2. 4635-6-8-31.

Mortgage Sale

Take notice that under and by virtue of the powers of sale contained in a certain mortgage or deed of trust dated the twenty-fourth day of January A. D. 1924, made between J. & T. Morris Company Limited of the first part and The Maritime Trust Corporation of the second part, there will be offered for sale by Public Auction on the premises Nos. 75 to 79 Water Street in Charlottetown, on Monday the sixteenth day of July A. D. 1928, at the hour of eleven o'clock in the forenoon, the following property, namely: All that tract, piece or parcel of land situate, lying and being in Charlottetown aforesaid bounded as follows: On the Southeast by Water Street, on the Southwest by property now or lately owned by W. W. Owen (formerly used as Telegraph Office), on the Northeast by property of Charles H. E. Longworth, and on the Northwest by the Robins Estate. Also all that other parcel of land in Charlottetown bounded as follows: On the Northwest by Water Street, on the Southwest by property of D. B. B. Brown, on the Northeast by property of the Labor Union, and on the Southeast by property of Bruce Stewart & Co. Also all the personal property of J. & T. Morris Company Limited, comprising the machinery, plant equipment, office furniture, stock-in-trade, bottles, containers, boxes, cases, engines, materials and supplies used in connection with its business, beer, aerated waters and drinks manufactured or in process of manufacture, formulas, trademarks, trade names, book debts, and all other fixtures, utensils, goods, chattels effects and assets now owned, or which at the time of such sale may be owned by the said J. & T. Morris Company Limited. Terms of sale to be twenty per cent cash at the time of sale, and the balance within thirty days after the date of sale. Dated this fourteenth day of May 1928. The Maritime Trust Corporation, by McLEOD, BENTLEY, Their Attorneys.

"Jealous Hearts" By MILDRED BARBOUR

Chapter 52. THE PACE OF FOLLY. Tony, lying awake and tossing restlessly in the guest-room of the Spanish villa, heard Millicent return home with a gay and noisy party. Dawn was beginning to lighten the sky; birds were singing in the trees on the lawn that stretched to the sound: the freshness of the August morning was drifting in through the opened windows. He thought, with a pang, of Lynnwood--of the fragrant quiet of the rolling meadows, the scent of box from the garden, the cardinals in the poplars. And then a couple of shrieking motor-cars sped up the drive and came to a stop below the terrace. There was a grinding of brakes, a great deal of laughter, and shrill screams. "Come in, everybody," he heard Millicent say. Then there was scrambling and laughing below, and the sound of many feet on the stone-flagged veranda. A small army must be entering the hall, judging by the clumping over the parquetry. A door banged sharply, and after that, the noise was more subdued; at least, it seemed so, to the listener upstairs. But not for long. After a few minutes, Tony heard the quick rush of light footsteps on the stairs; there was a knock at the door, and Millicent's voice called: "Awake, Tony? If you aren't, you must be dead. Slip on a dressing-

Some one proposed that they go swimming, dressed as they were.

gown and come down. The gang insists on seeing you. Tony sprang out of bed, slipped on the gown, and opened the door. Millicent was standing in the corridor, looking pretty and flushed and excited. She wore, about her fair head, a gilt and silver coronet of paper--the sort that serve as favors at children's parties. Around her white throat was a trailing necklace of interwoven flowers. She pointed to the two ornaments and laughed. "Here it is, people!" Every one seemed to fall on him at once. He was greeted with a yell. Then he was as quickly forgotten. Some one proposed that they go swimming, dressed as they were. There was a wild scramble, and Tony, with grimly tightening lips, watched from the veranda. Millicent, fleet of foot, even in her French-heeled slippers, was on the beach before the others. Regardless of her gorgeous gown, she plunged into the water. "Atta girl! Atta sport!" her companions shrieked in approbation. Tony turned away disgustedly. He was on the point of going back to bed when he found Millicent again beside him. She was laughing and wringing the water from her gown. "One doesn't realize how little there is to these things until one dries in a shower, if I were far from home." Suddenly, with a flashing change of mood, she sighed, and a weary look crossed her face. "We might as well make the best of it," she said. "There'll be no getting rid of this gang as long as there's anything to drink in the house. I'll order breakfast. We'll play tennis afterward. Can you loan me some of your things? I'll rustle 'em up." Tony said, with lifted brows "Does this sort of thing happen often?" "Nearly every night, somewhere," she said over her shoulder, as she started for the house. Her smile flashed out again; her brittle laughter seemed to smite him. "It's fun, isn't it?" It wasn't until later that Tony remembered that he hadn't thought of Elinor since tea-time of the day before.

FOUL PERSPIRATION ODORS HAVE DEEP-SEATED CAUSE

Every Woman can Protect Herself by a Simple and Inexpensive Treatment. Foul body-odors have a deep-seated cause which lies in the bowels and intestines. Until these organs discharge the corruption they are carrying, no relief can be expected. You can quickly make your body sweet and clean. You can easily get rid of nasty perspiration odors if you cleanse your system with Dr. Hamilton's Pills. These little pills bring down an astonishing amount of waste matter. They clean up your insides, rid you of headaches, overcome constipation, bring back rosy color to the cheeks, stir up the appetite and make you feel like you did in your youth. For regular, vigorous, happy health use Dr. Hamilton's Pills--just right for women's ills, mild, efficient and never cause distress. Sold everywhere in 25c boxes.

Have You taken your Nerve Food To-day? "Isn't it a scream? One of the men comes from Honolulu, so we played we were in Hawaii, and they crowned me queen. We're going out on the Sound to try to surf-board. Hurry up." She turned away. "Millicent!" he exclaimed exasperatedly, "I won't go down to meet that rattle---" "Rattle?" Her cool eyes met his. "They are my friends." "Well, from what I can hear of them, I should think you'd be ashamed to admit it. Haven't you an idea what your neighbors will say to all this noise before daybreak?" She chuckled. "Neighbors? That's a good one! All the neighbors, old darling, are down-stairs. Do drop the virtuous

Some one proposed that they go swimming, dressed as they were.

stuff and come on down, because I'll never be able to make them believe that I, of all people, have a dead 'un for a husband." She sped down the stairs, without waiting for further protest, and Tony, after swearing silently and fluently, dressed and descended, and an equal number of men, all in evening clothes and all wearing paper caps, drinking and shrieking at one another and laughing uproariously over nothing. Millicent, with a careless wave of the hand, said: "Here it is, people!" Every one seemed to fall on him at once. He was greeted with a yell. Then he was as quickly forgotten. Some one proposed that they go swimming, dressed as they were. There was a wild scramble, and Tony, with grimly tightening lips, watched from the veranda. Millicent, fleet of foot, even in her French-heeled slippers, was on the beach before the others. Regardless of her gorgeous gown, she plunged into the water. "Atta girl! NEW ANNAN SCHOOL

Standing for New Annan school for months of April and May are as follows. Grade VIII--1 Anna Haggerty 2, Arline Enman 3, Olive Moore. Grade VII--1 Mary Haggerty 2, Margaret Enman 3, Balfour MacKay. Grade VI--1, Gertie MacInnis 2, Ruth Moore 3, Gertie Haggerty and 4, Wallace Moore. Grade III--1, William Dalziel 2, Elmer Moore 3, Robert Dalziel 4, George MacKay. Grade II--1, Audrey Tuplin 2, Edna Dalziel 3, Dolera MacDonald 4, Francis MacKay.

New Method Of Cooking

Mr. W. J. Monaghan, formerly of Hazelbrook, has been giving a series of health talks, mostly under home conditions, in this city on the subject of "Food and its Relation to Health." After a visit to his old home at Hazelbrook five years ago, Mr. Monaghan went to St. Louis, Missouri, where he studied food chemistry. During his studies, a revolution was taking place in the method of preparing foods. The American Food Journal Institute published the results of their lengthy investigation and as a result a new method of cooking equipment was manufactured. Mr. Monaghan secured an appointment in the New Method Food Research Department with which he has been actively connected ever since with the exception of a few months leave of absence during the past winter. Mr. Monaghan is one of the leading food chemists and specialists in Canada today and his health talks are the topic of enthusiastic conversation. He is an interesting speaker and handles his subject "Food and its Relation to Health" in a competent manner. A tribute to his ability is the fact that he is Maritime lecturer for his Department. From here he goes to Halifax then to St. John. The thing that started the investigation which later developed "The New Method of Cooking" was a series of advertisements run by Metropolitan Life Insurance Company following the American public and called attention to the high percentage of school children who for one cause or another had physical defects. The general trend of the advertisements were such as to lead certain leading food chemists to believe that the proper selection, preparation and cooking of food would materially relieve the situation. They first went to the Mellon Institute, located in Pittsburgh, to find out what might be done along this line, and also to find out where to have the proper experiments conducted. The officers in charge of the Mellon Institute felt that they were not properly equipped to conduct the experiments required, and advised the chemists to engage the services of the American Food Journal Institute of New York City. This was done. Briefly, the work done consisted of having the same series of tests carried on in a large number of utensils of different types, makes, designs, etc., with the idea of determining what thickness of metal was best suited to the preparation of different foods, the sizes necessary, the temperatures required, and just which items should be included in the household equipment necessary to prepare healthful meals. One of the points upon which there was no difference of opinion was that fresh fruits, vegetables, meats, and fish should, if possible, be cooked below a boiling temperature without water or grease being added. It is necessary to prepare them this way in order to eliminate the loss of the essential mineral salts and vitamins during the cooking operation and to make digestion better. It was also agreed that such vegetables as potatoes, carrots, beets, etc., should not be peeled before being cooked. The results of this investigation and the Institute's recommendations were incorporated in a report which was submitted to a large company engaged in the manufacture of kitchen equipment, and the first "New Method of Cooking" equipments claimed to be an important invention of modern science, was made, some four years ago. In addition to the report of the Institute, the manufacturing company secured the services of Miss Helen Louise Johnson, at one time Secretary of the National Association of Home Economists. Tests have been conducted at the Modern Priscilla Proving Plant, University of Wisconsin, and by Miss Louise Johnson, in charge of the Home Economics Bureau of the United States Department of Agriculture. "The New Method of Cooking" was introduced in Canada in January of this year and just recently here in Charlottetown by Mr. Monaghan. He reports that a large number of our progressive people are adopting this method of cooking. All, especially parents with children at home, who have the opportunity of hearing one of Mr. Monaghan's health talks should make it a point to do so.

Follow these Simple Rules 1. Write your answers in pen and ink only, on one side of the paper. Put name and address in upper right hand corner stating whether Mr., Mrs., or Miss, also name of this paper. Write anything else on separate sheet. Don't send fancy drawn, or typewritten answers. 2. Contestants must be 16 years or over. 3. Employees of Banner Hosiery Co. or friends and relatives of employees are forbidden to enter. 4. Three entries may be submitted but only one can win a prize. 5. Different members of a family may compete but only one prize will be awarded to any one household or group. 6. Final awards will be made by a committee of three prominent Toronto business men who are in no way connected with this firm. Their names will be made known to all contestants. Contestants must agree to abide by the rules. 7. If you find the correct answer to the puzzle you will be awarded 950 points, and we will send you by mail, a simple setting charade puzzle game on which you will be awarded all the final points. No points are to be awarded for neatness, handwriting, or general appearance, nor are points to be awarded for orders unless sent optionally to a limited amount to take the place of missing or doubtful answers. You are neither obliged nor required to buy or sell a single thing to win the highest prize. 8. Contest closes 5 p.m., Friday Aug. 31st, 1928. Entries should be forwarded promptly.

Gay's Plants

Flowers have been so much improved of late that the old time flowers can hardly now be recognized. Time for planting--Annuals--do not plant before June. Perennials and Biennials are hardy plant when ground is fit--now! Early Cabbage and Cauliflower from May 20th to June 31. Tomatoes and Celery not before June. Late Cabbage, Cauliflower and Celery from June 20th to July 31st or later. Please take notice that we will not accept an order by mail, express or freight for less than two dollars. This can be arranged by having a neighbor or two to join in the order, when requiring small quantities. Our terms are cash with order. Annual bedding flower plants--Aster, Phlox, Stocks, Petunia, Verbena, Zinnia, Balsam, Salpiglossis, Scabiosa, Snapdragon, Cosmos, Marigold, Alyssum, Golden Feather, Cineraria, Kochia, above 25c doz. Seedling Pansy, Sweet William, Forgetmenot, and seedling Carnation at 50c per doz. Wintered over Perennials and Biennials--Pansy, Daisy, Sweet William, Forget-me-not \$1.20 per dozen. Perennial Larkspur, Digitalis or Fox Glove and Canterbury Bells at 25c each, \$2.25 per dozen. Double Holychoes, 20c each, \$1.75 per doz. Vegetable Plants--Extra early Cabbage, Cauliflower and Celery, 20c doz. 50c doz. Extra early Tomato, 60c doz. second early 40c doz. 1st early 30c doz. Includes

50 doz. for postage. Cucumber, Squash, Pumpkin, Lettuce, Peppers, 25c doz. 5c extra for postage. Carter's Seed Store, 72-74 Queen Street, W. F. Burke in our old stand east end of market and M. Fraser, Kent and Great George Street, handle our plants and fresh plants are delivered to them daily. We will be pleased to have customers call at our garden, Head of Prince Street and personally select plants, Bring basket or boxes to hold plants. Wintered over Perennials and Biennials by mail postage must be included to the extent of 25c per doz. Early Cabbage, Cauliflower and Celery 20c per 100 for postage.

WIN A New 1928 Ford Sedan \$1500.00 in Cash Prizes

Table with columns for prize amounts and descriptions: FIRST, 1928 Ford Sedan, Value \$750.00; Second, \$250.00 Cash; Third, 150.00; Fourth, 100.00; Fifth, 75.00; Sixth, 50.00; Seventh, 25.00; Eighth, 10.00; 9 to 26, 5.00 Each.

One night Professor Gazor, the great astronomer noticed through his telescope that various stars in one of the great constellations had different numbers of points to them. He was able to group these odd stars. This discovery so startled the scientific world that it was decided to find out what it all meant. After tremendous research he was using this method to send the world an important message. By mathematical calculation Professor Gazor was able to decipher the message. His colleagues naturally wanted to know all about it, but he would not give them the message. He told them to work it out for themselves. How He Did It "You will notice," the professor told them, "some stars have three, four, five, or six points, some five, or six points, others four points, some five, or six points. The number of points each star has determines what letter of the word of the message that star stands for. For instance if a star has three points it is either d, e, or f. Some stars represent only one letter, some 2 letters and some 3 letters. I have worked out the table code for you, now you count the number of points on each star and try to find what letter each star stands for, by referring to the table code. I have correctly arranged the stars so that each row of stars spells a word of the message. In order to help you a bit the first word is "Greatest."
