HOW many millions are lost in speculation every year—in efforts to make money by taking great risks rather than in doing great service!

Only those who have much, or those who have little or nothing, can afford to take great risks. Certainly the average man with loved ones dependent upon him cannot.

Life insurance is without doubt the most certain asset in the householder's strong box. A Life Insurance policy cannot depreciate.

Mutuality in life insurance means that policyholders benefit by the company's profits. It reduces the cost. Let us send you The Mutual Book.
