MUST WORK.

LONDON, Feb. 10.—The first meeting of the Tunbridge Wells Colonization Association was addressed by Dr. Robbins of Canada, who said that in Canada land work offered homes for all but a man must put his shoulder to the wheel to succeed. Twenty lads leave for Canada under the association's auspices in the course of a month.

FOR 25 YEARS

Maxime Boucher Suffered, then Dodd's Kidney Pills Cured His Kidney Trouble.

HUNTERSTOWN, Que., Feb. 13.—(Special.)—That chronic Kidney Complaint yields readily to Dodd's Kidney Pills is shown by the case of Maxime Boucher, of this place. Mr. Boucher says:

"For twenty-five years I suffered with the Malady of the Kidneys. I felt always feeble and was often in pain. I read of many wonderful cures in Dodd's Almanac and decided to give Dodd's Kidney Pills a trial. I took twenty-five boxes in all and am now perfectly cured."

Dodd's Kidney Pills were the first Kidney Pill ever given to the public, and in all their long experience they have never met a case of Kidney Disease they did not cure.

THE SKIN KEPT LIKE VELVET

You need not question as to what to buy as a healing lotion for the hands or face. It is an open secret that our

FRIDAY, FEBRUARY 17, 1905.

AMERICAN AND BRITISH TRADE.

It may be of interest to note that the total exports from the British Isles in 1904 were $1,444,000,000, and those of the United States $1,451,000,000. Thus the export trade of the two greater English-speaking nations, one of forty millions and the other of eighty millions of people, were practically the same. Of manufactured goods Great Britain exported $1,188,000,000 and the United States $502,000,000. Here the proportion is over two to one in favor of the Mother Country, but the exports of manufacures by the United States show an increase of $80,000,000 over the previous year while those of Great Britain shows an increase of $45,000,000. Both nations had a prosperous year, but should both advance in a like ratio in future it will not be many years before the long precedence enjoyed by Britain as an exporter of manufactured wares will be overtaken by the Great Republic.

In the amount of imports, however, Britain surpassed the United States in the proportion of two and a half to one. British imports for 1904 amounted to the enormous total of $2,674,000,000 and those of the United States to $1,035,000,000. One reason for this difference is that Britain must import much of the raw material for her manufacturing industries, while the United States obtains most of its raw material at home. Again Great Britain imports foodstuffs to the amount of over a billion dollars annually. Such items form but 25 per cent of American imports and nearly half of the imports of the United Kingdom. The total exports of the United States for 1904 showed a falling off of over $100,000,000 in agricultural products as compared with the previous year. This was largely due to the smaller wheat crop. The above figures are on such a scale as to show how greatly the Anglo Saxon nations surpass all other nations in the enormous and growing volume of their trade.

Our freshest newspaper exchanges from the mainland are thirteen or fourteen days old. They have a flavor of antiquity. But think of the poor mainlanders who have been quite as long without a Charlottetown Guardian!

JAP TRANSPORT KOSHINO SINKING.

The sinking of another Japanese transport, the Koshino, off the coast of Japan, due west of Nagasaki, by Admiral Bezobrazoff with his flying Vladivostok squadron, has encouraged the Russians mightily, although it means nothing in the greater war game. Bezabrazoff is now the one point of contact with the Japs which is not a source of mortification and despair to his countrymen. His escapes from Vladivostok are not wonderful. Admiral Kaminura, his opponent, was ordered by Admiral Togo to let the Russians out as often as they would come. The Japs want to capture or sink this squadron, and their only chance is to catch the ships while on a marauding expedition. So far the Vladivostok fleet has been handled cleverly—a thing so surprising for Russians as to give the affair an unusual glamour in the war news and at the Court of St. Petersburg.

Continued from Page 1.

Many persons wonder that so young a man should have been appointed a Governor of his native province. They will wonder much more when they learn that, after passing the required examinations, he became a public school teacher at the age of thirteen years. But this is the fact. While still quite young, he became a pupil of the Uigg Grammar School, where he obtained the knowledge required, passed the Board of Education before he had completed his thirteenth year, and at fourteen became the teacher of the public school at Guernsey Cove. There he taught the young idea how to shoot for two years. Then he entered the Prince of Wales College in Charlottetown, of which Dr. Anderson was the principal, and obtained a first class certificate, upon the strength of which he taught the grammar schools at Springton and at Uigg until the year 1882, when he was articled to Malcolm McLeod, K. C., at that time one of the most learned and prominent barristers in the Maritime Provinces. In the mean time he took a course at Dalhousie University, where he obtained the degree of L. L. B.; and in the year 1887 he was admitted an attorney of the Supreme Court.

He opened a law office in the town of Georgetown; and there he practised his profession for ten years, and there he espoused his wife, Adelaide Beatrice Louise, eldest daughter of Charles Owen, Collector of Customs. While in living at Georgetown he also entered into politics. In 1895 he became the representative of the neighbouring district of Murray Harbor in the Legislative Assembly and in 1897 he was re-elected. But at a by-election in 1899 he was defeated by a majority of thirty votes.

Having come to reside in Charlottetown and having entered into partnership with A. B. Warburton, at that time leader of the Government, he was, upon the formation of the Farquharson Cabinet in the year 1899, appointed Attorney-General of the Province. He held this position for one year. In the year 1900 he became a member of the House of Commons for East Queens, and held the seat until he was appointed to the high office which he now fills.

A CONSTRUCTIVE STATESMAN.

As a politician Mr. McKinnon was a promoter rather than a critic. In the Legislative Assembly and in the House of Commons, alike, he rendered effective service on behalf of the construction of the Belfast and Murray Harbor Railway, running through the large and wealthy district that he had the honor to represent. In this connection he also promoted the Hillsborough Bridge—a combined railway, vehicle and foot passenger bridge extending for a mile from shore to shore of the Hillsborough River—an expensive and important improvement, which he was largely instrumental in obtaining. Several other improvements affording up-to-date conveniences for the people of the province, and tending to advance their agricultural and fishing interests, received his powerful support. He was one of the leaders in the company by which the town of Montague was given the advantage of a first-class electric light system.

THE TELEGRAPH SERVICE.

The telegraph service between the Island and the Continent was an old public grievance. Mr. McKinnon prepared a brief of the question, and on being consulted by the Ministers advised that the system of sending messages over lines owned by different companies was the cause of the trouble and that either one company should operate eastern lines, or, instead of attacking the Anglo-American Company, as had formerly been done, a compromise of rates be attempted. One of the Ministers corresponded with the different companies. Accordingly a conference was held in Ottawa when other Island members, a committee of the Cabinent and representatives from the Western Union, Great North Western and Anglo-American were present. As a result, the telegraph service is put on a satisfactory basis.

Physically and mentally, Governor McKinnon is a large man, who takes large views of large things. He has many personal friends in both political parties and in all parts of Canada, and his tenure of office has been auspiciously begun.

In his charming wife he has a worthy helpmate. Mrs. McKinnon is "to the manor born." One of her aunts, Mrs. Laird, was the wife of a former Lieutenant-governor of the Northwest, and another, Mrs. A. A. McDonald, as the wife of a former lieutenant-governor of Prince Edward Island. She is a lady of taste and discretion, and will without doubt, adorn the high position in society to which she has been called.

Lieutenant-Governor and Mrs. McKinnon are blessed with a family of two sons and one daughter.

Their residence—"Government House"—is a fine old-fashioned mansion, built in the year 1831, overlooking Charlottetown Harbour and Hillsborough Bay, and commanding a broad and very beautiful rural landscape. Many of the highest dignitaries in the Empire, including the King himself, and the British Minister of Foreign Affairs, Lord Lansdowne, have been hospitably entertained within its walls—which have often resounded to song and music and the sounds of merry feet upon the floor of its grand old hall.

Just a little too far and the woman who reaches over the cliff for the coveted flower goes crashing down into the abyss below. Just a little too far and the woman, who, day by day, neglects to cure the womanly diseases which weaken her is prostrated upon a bed of sickness.

No woman should trifle with the diseases peculiar to her sex. Neglect to-day means a worse condition to-morrow.

Dr. Pierce's Favorite Prescription is a safe and reliable remedy for the cure of diseases peculiarly womanly. It establishes regularity, dries enfeebling drains, heals inflammation and ulceration and cures female weakness.

"My wife, Mrs. Mary Estes, has been taking your medicine and received great benefit from it," writes Mr. Geo. Wm. Estes, of Springgrove, Va. "Was troubled with female weakness, heavy, bearing-down pains, severe pain in back and head, and a tired, worn-out feeling all the time. Tried all the remedies we could hear of, but they did no good. Finally we wrote to you and my wife commenced taking 'Favorite Prescription.' Took ten bottles, and is in better health than before in a long time. We shall always recommend Dr. Pierce's Favorite Prescription to all who are thus afflicted."

"Favorite Prescription" makes weak women strong, sick women well. Accept no substitute for the medicine which works wonders for weak women.

The Common Sense Medical Adviser, 1008 pages, in paper covers, is sent *free* on receipt of 31 one-cent stamps to pay expense of customs and mailing *only*. Address Dr. R. V. Pierce, Buffalo, N. Y.
