### DOROTHY DIX SAYS—

(Continued From Page 2)

satisfied if they are good cooks. But they are human and vulnerable and they don't refuse the dish when a beautifully dressed and groomed secretary, who is gay and smart and full of pep, makes eyes at them and tells them how young and handsome they are, and how little their wives appreciate them.

Of course, there will always be men who are philanthropers and girls who are gold diggers, but the office romance is bound to end in disaster. Broken homes. Forsaken wives or husbands. Half-orphaned children. The wrecks that folly always leaves behind it. Sometimes the lover is mean enough to trade upon a girl's necessity of holding her job to force her to submit to his amorous advances. Sometimes a man, just for the sake of gratifying his own vanity of being a lady-killer, wins a girl's heart and fills it so full of love for himself that there is never any room in it for any other man, and then leaves her for other conquests. Sometimes the girl deliberately breaks up her employer's home just for the luxuries he can give her.

But, however it is, the love affairs between the married men and the girls who work for them are pure tragedy. Very often a man who was married too young and who has outgrown his wife finds his real mate in his intelligent, broad-minded secretary. Very often a woman finds in the man by whom she is employed the qualities of nobleness which she has found in no other man. But it is always too late.

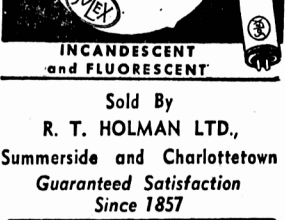

No wonder a business woman said: "The education of all office girls should include a course in hardening their hearts against the men for whom they are going to work."

### 20 YEARS FOR MANSLAUGHTER

SARNIA, Ont., Oct. 21—(CP)—Joseph Taylor was convicted of manslaughter at his second trial today in connection with the death of his wife Rita last November and was sentenced to 20 years imprisonment.

### York And Vicinity

Miss Alice Crockett, City, spent Sunday at her home in York.

Mr. and Mrs. Keith Rodd, City, were visitors to York on Sunday.

Miss Evelyn Underhay, York, was a visitor to the City on Saturday.

Miss Helen Lewis, employee of R. E. Mutch, is spending her holiday at her home in York.

Mr. Junior Rodd, City, spent Sunday in York the guest of his cousin, Donald Crockett.

Mr. and Mrs. Howard Watts, have as their guest this week, Mrs. Watts' mother, Mrs. Nicholson, Flat River.

Mrs. Milton Vessey has returned to her home in York after being a recent patient in the P. E. I. Hospital.

Mr. and Mrs. Gordon Rodd, and son Billie, City, spent Sunday in York the guest of Mr. and Mrs. Gordon Crockett.

Mr. and Mrs. John Granger, Sydney, C. B., are visiting in York, the guest of Mrs. Granger's sister, Mrs. Milton Vessey.

Miss Beverly Adams, City, was a visitor to York during the week-end where she was the guest of Misses Olga and Christine Proud.

Mr. Edwin Lewis, student of P. W. C. spent Sunday in York, the guest of his brothers, Ira and Claude Lewis.

Mr. and Mrs. Jack Cooke, and two daughters, Constance and Helen, City, spent Sunday in York the guest of Mr. and Mrs. Leth Brown.

Mrs. Robert Crockett, York, is visiting in the city the guest of her daughter and son-in-law, Mr. and Mrs. Neil MacInnis.

Mr. Willard Murray, Pleasant Grove, spent Sunday in York the guest of Mr. and Mrs. Gordon Crockett.

Mr. Wendell Kelly, Stanhope was a visitor to York on Sunday the guest of Mr. and Mrs. Westley Matthew.

Mr. and Mrs. Lloyd Vessey and Mr. and Mrs. Harry Lewis have returned to their homes in York after spending a few days in Moncton, N. B.

Mr. and Mrs. Ira Lewis, York, were visitors to the city on Sunday, the guest of Mrs. Lewis' parents, Mr. and Mrs. William Watts.—C.

While Donald Crockett was picking potatoes at Lewis Brothers, he picked up a potato that weighed 2-1/3 lbs and was 17 inches long and 13 inches wide. Beat this who can.

Mr. and Mrs. William Crockett, York, motored to Orwell Cove on Sunday, where they were the guests of Mrs. Crockett's mother, Mrs. MacPherson, they were accompanied back by Mrs. Crockett's sister, Hazel MacPherson.

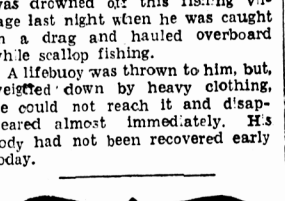

Service was held in York Church on Sunday evening. The guest preacher for the evening was Rev. M. Wilson, Covehead, who exchanged services for Sunday, with Rev. Mr. MacCallum, which was very much enjoyed by all.

**N. S. Man Drowned While Scallop Fishing**  
GULLIVER'S COVE, N.S., Oct. 21—(CP)—Eldon Conrad, 31, crew member of the motor vessel Tancook II out of Lunenburg, N.S., was drowned off this fishing village last night when he was caught in a drug and hauled overboard while scallop fishing.

A lifebuoy was thrown to him, but, weighted down by heavy clothing, he could not reach it and disappeared almost immediately. His body had not been recovered early today.

### Secrets Of Flies Are Revealed For First Time

By Henrietta Leith  
NEW YORK, Oct. 21 (AP)—The common drone fly now is "top secret."

Thanks to some new fast pictures—3,000 to a second—scientists at the American Museum of Natural History are finding out what the common fly has known for several hundred million years.

They've discovered how the fly knows where he is when he can't see where he is going, how he can fly through fog when a bird can't, and what it is that, when he loses it, causes him to make a sudden crash landing.

The movies were made at the request of the Sperry Gyroscope Company.

Dr. C. H. Curran, museum insect expert, worked with photographer Henry Lester for several years before they got the pictures they wanted.

In the movies you can see the 300 beats a second of the fly's wings and—more important—the halters or vibrating balances just under its wings.

The fly's balances, sticking out under the wings like a pair of lady's hampers, go up when the wings go down in their sculling, oarlike motion.

This, said Curran, is one of the things scientists don't know before the pictures were made. And they are just beginning to get into the study of how the little balancers work, maintaining the fly's equilibrium like the fluid of the inner ear does a man's.

The halters are different from the modern gyroscope that keeps compasses on ships and planes balanced with the earth's axis. The fly's balancers move up and down at a 90-degree angle, while a gyroscope rotates.

But the halters are just as effective—they tell the fly just as accurately which is up and which is down.

At the end of the movies, which takes several minutes to run but show the action of a few seconds, the fly dies—another martyr to science, slain by the heat of the photographic lights.

But, says Curran, these "most amazing pictures ever taken of insects in motion" have unlimited possibilities in industry. Even more avid attention is coming from the military.

"But beyond that I cannot go," said Curran. "Top secret, you know."

### New Clue To Polio Secrets Reported By American Doctor

NEW HAVEN, Conn., Oct. 21—(AP)—A new clue to why polio infections sometimes kill or cripple and at other times have no effect is reported by Dr. Wendell M. Stanley, pioneer in virus research at the Rockefeller Institute of Medical Research.

Polio, or infantile paralysis, is one of many diseases caused by viruses—tiny chemicals that exist in the twilight zone of life. Viruses breathe, eat, and reproduce themselves but can do these things only when they are within certain cells of human, animal, or plant bodies.

Dr. Stanley described promising new studies on viruses in a lecture at the centennial of Yale's Sheffield scientific school.

In one study, seven different strains of a virus that causes tobacco mosaic disease were compared with the regular virus. Slight differences were found, he said, in the contents of amino acids, the "bricks" of which all proteins are made.

Although these differences were slight, the differences in virus activity were great. One strain killed tomato plants, while the regular virus did not. Yet it differed from regular virus only in small percentages of two out of the 16 different kinds of amino acids that each contained.

The difference between a mild and deadly kind of polio virus might also be due to slight changes in amino acid contents, Dr. Stanley said. Perhaps a mild type of virus might exist in the body, suddenly becoming deadly when it either lost or gained in supply of one or more amino acids.

### Color Trend Shows Wedding Influence

By DENISE DALTROFF  
Canadian Press Staff Writer  
LONDON, Oct. 22—(CP)—Fancy hats were on display at the fall show of Erik (Paris) Ltd., with three colors predominating—black, winter white and wedding white, the last intended as a compliment for the forthcoming royal wedding.

His models were designed to sit straight on the head, and his trimmings were a variety of high-standing feathers, a profusion of winter flowers or a narrow sequin band around the base of the crown.

Black Poodle was his name for a new fur fabric used for some of his models. It has a bushy appearance like the fur of a French poodle.

For wearing with tailor-made he showed many hats designed on the style of best-eater models. A small crown and small straight brim curving slightly upwards in front. The crowns were almost

### To Banish V D In Nine Days

NEW YORK, Oct. 21—Veneral disease could be banished from the country in nine days if the power of penicillin were used in a concerted national effort, Dr. Thomas Parran, Surgeon General of the United States, reports in a signed article in the November issue of the Woman's Home Companion.

"With this new drug it is possible to make syphilis and gonorrhoea as uncommon in the United States as smallpox, typhoid fever—even as rare as bubonic plague—in nine days," writes the Surgeon General. "But the only way it could be done would be to have every man, woman and child in the country take penicillin simultaneously under the supervision of the nation's physicians."

Today, with penicillin, treatment is no longer the most difficult problem, Dr. Parran says. The great problem is to find the victims of disease who are still undiscovered, and who will be the source of infection for the quarter-million new cases of syphilis and over a million of gonorrhoea that will develop this year alone. More shocking is the fact that private physicians and public health clinics will find and treat only one-half of the new cases of syphilis and less than half the new cases of gonorrhoea.

Dr. Parran visualizes a nine-day campaign preceded by months of intensive preparation by the nation's health forces and by nationwide education through newspapers, magazines, motion pictures and radio. Then on a certain day, the nation's press would announce the beginning of the campaign and from six in the morning until nine at night, every doctor's office, every hospital clinic, public school, firehouse and police station in the nation would be open to give free penicillin to the population.

"If everyone received penicillin simultaneously no venereal disease would be to have every man, woman and child in the country take penicillin simultaneously under the supervision of the nation's physicians."

### Missionary Receipts Up

TORONTO, Oct. 21—Dr. Denzil G. Ridout, Secretary of the Missionary and Maintenance Committee of the United Church of Canada, announced today that the receipts for 1947 for the missionary enterprises of the Church had passed the million dollar mark and were now \$7,000,000 ahead of the same date last year. Dr. V.T. Mooney, the Treasurer of the United Church, expects the total to reach \$2,175,000 this year.

Dr. Ridout, announcing the completion of Presbyterian Gatherings in Central and Eastern Canada, said there was displayed unusual interest on the part of laymen in the missionary work of the Church.

### New California Fashion Designs Are Out Of This World

By RALPH DIGHTON  
HOLLYWOOD, Oct. 21—(AP)—What California designers think clothes will look like in the predictable future is pretty close to being out of this world.

And if it isn't, it should be, if style trends displayed at Monday night's "fashion futures" show are a fair sample.

Nearly 100 designers modelled their forecasts in Earl Carroll's night spot.

The new longer look prevailed. Not even Adrian—Hollywood's last holdout against dropping hemlines—challenged the controversial trend. "Cover 'em up" was the motif of 1948 California-made fashions, except in a few instances in which designers made up for hiding the legs by baring the bosom.

One notable creation of this nature was a wool broadcloth suit by Jean Louis of Columbia Studio. The black jacket was slit to waistline and revealed a bare tummy underneath. In the dress rehearsal, the model removed the jacket and something awful happened. Monday night, the model did not remove the jacket.

MEMBER OF MAJORITY  
The word "bolshhevik" in Russian means a member of the majority.

### Say Girl Readers Sharper Than Boys

MONTREAL, Oct. 21 (CP)—You can take the word of the Provincial Association of Protestant Teachers of Quebec—girls are sharper readers than boys.

A reading test was given 1,000 students, chosen at random from Montreal, Quebec and Sherbrooke and from rural districts of Ormstown, Lennoxville and Knowlton. Reading ability and ability to absorb what was read were probed and in most tests girls were better than boys and country students were better than those in cities.

### SWINGING ON THE BAR ROOM DOOR

"Oh poor little Willy, your face we'll see no more, swinging on the bar-room door. Your mother sits at home, the stove is cold, and little Willy shivers in his rage so cold."

The poor little fellow, is standing starved and pale, waiting for his father to drink his pint of ale. I s'pose your going to tell me, you think this isn't true, well I would like to take you to a dive, or two.

It isn't just the ale, but there's love of "shine". I know, because it happened to a friend of mine.

The boys drop in, every night, just for a drink. When the cops make a raid, they pour it in the sink. There are many more like Willy looking sad and pale. While father is a Big-shot, and drinks his pint of ale.

One night we found little Willy lying dead on the floor. So no longer will we see him, a swinging on the door. 'Cause the poor little fellow, just isn't any more. If I go to Heaven, there's one I'm looking for. And I hope I find him swinging, on Old St. Peter's door. —Marge Williams, Provincial Sanatorium.
