BRITISH COLUMBIA PACKERS LIMITED VANCOUVER, CANADA

Bristol and Vicinity

Mr. and Mrs. B.W. McEwen have moved to the city for the winter.

Two cases of scarlet fever are reported in this vicinity, one case in Bristol, and another in Morrell village.

Miss Mabel O'Brien, principle at Morell Graded school, is indisposed and friends here wish her a speedy recovery.

The younger boys are waiting for the colder weather to get the Bristol rink underway. The rink will require some repairs this season.

Mrs. Stannis Lapierre is doing considerable repairing to his house. The building has been lifted, new sills put in, and the entire house shingled.

The large dwelling house of Mr. H.H. Cox, Morell, is reported as about sold to a young man in the village. Mr. Cox will take up residence in his new bungalow shortly as a permanent home.

Mr. John Keefe, who came to Bristol to reside a few years ago, has decided to leave again, having purchased a farm near Peakes Station. It is understood a veteran from the City will purchase his property here.

Two fishermen from here, who want their names withheld, had a brush with death on the last days of the fishing season when they ventured too far off shore and were trapped when a storm came up. They spent a long weary night on the rough sea before being picked up many miles away.

Mr. Angus Lapierre, and Mr. Charles Mosher, king fur men, are busy at the trapping. The season opened and each man has captured several minks and raccoons whose furs sell at a good figure. One large mink brought fifty dollars, a good

morning's catch. These boys will also add a large number of rats to their seasons haul before the closing day. Mr. Lapierre was a noted trapper in Quebec before coming here.

Mr. Joe McDonald, who has purchased the property of the late Wallace McVarish from James McDonald, the latest owner, will move to his new estate this week to reside with his sister Mary for the present.

It is understood that James McDonald has purchased a new house from Dan Matheson, built a few years ago, but never finished. He will have the building moved to his farm at St. Peter's Harbor this winter.

Friends of popular Gerry McAdam, owner and manager of the Adams Transfer, with several trucks, will be sorry to learn he has been unable to do any work for some weeks. Gerry will also be missed from the rough end of the hockey this winter and in general, his friends wish him a quick recovery.

FORTUNE BRIDGE W. I.

The November meeting of the Fortune Bridge Women's Institute was held at the home of Mrs. Lewis Higginbotham on Wednesday evening, Nov. 20th.

The vice-president presided and the meeting was opened with the Ode and Creed.

Eight members were present and answered roll call by paying dues for 1946. The minutes of the last annual and regular meetings were read and approved. The secretary read the financial report for the year. Balance in funds, \$28.39.

It was decided to have the older school girls make a collection for the orphanage as soon as possible. There was some discussion on holding a dance but it was left till the next meeting.

Collection amounted to .60 cts. \$2.50 dues were received. Mrs. George Jackson invited the members to her home for

Annual Meeting of King's County Board of Trade

The annual meeting of the King's County Board of Trade was held in the Council Chambers at Montague, Tuesday afternoon Nov. 26th with a good attendance present. A resolution was passed to ask the Minister of Highways for more up-to-date snow removal machinery for this district for the coming winter season. The present slate of officers were re-elected and one new Councillor added, Mr. Earl McLaren of Georgetown. The new council is now comprised of the following: Keir Clark, Montague, President; A. G. Parks, Montague, Vice-president; Oyrus A. Shaw, Montague, Sec'y-treasurer; Senator John A. McDonald, Cardigan, Crilly Lea, Murray Harbour; M.N. McGowan, M.L.A., Kilmuir; L.H. Poole, Montague; Ethan H. Stewart, Montague; and Earl McLaren Georgetown.

A resolution was passed protesting to V.A. Ainsworth, Manager, Maritime Electric Co., against the frequent cutting of electric current to this region whereas other districts have not been cut off at all. An appeal for fairness in this matter is asked during the present emergency.

A further resolution called for joint action between the King's County Board of Trade and the Charlottetown Board of Trade in the matter of dealing with the services of the Maritime Electric Co. Ltd. The matter is being referred to the Charlottetown Board.

A further resolution was passed to ask the Town Council of Montague to put into effect without further delay the matter of a Town Planning Commission and endorsing the scheme.

Mr. Harry Lane of Montague was authorized to make an investigation as to the possibilities of holding a King's County Exhibition at Montague next year and to contact farmers and others interested to promote a two day show.

The matter of pasteurized milk was discussed and the president and Mr. Parks were asked to begin negotiations with people or firms who might be interested in establishing a Creamery at Montague to pasteurize fluid milk and the manufacture of other milk products.

A discussion regarding highways and roads took place but no action was taken at this time pending the results of financial arrangements between the Province and the Dominion Government.

The next meeting. Roll call to be answered by an exchange of Christmas gifts. Mrs. Alfred Higginbotham offered to help with the lunch.

The following officers were elected for the ensuing year: President—Mrs. George Dingwell.

Vice President—Mrs. George Jackson.

Sec.-Treasurer—Mrs. Lewis Higginbotham, re-elected.

Directors—Mrs. Jack Aitken, Mrs. Alfred Higginbotham.

Auditors—Mrs. Ernest Aitken, Mrs. Harvey Aitken.

Mrs. Joe Dingwell and Mrs. Jocelyn Coffin were appointed to the sick committee.

At the close of the meeting lunch was served by the hostess, assisted by Mrs. George Dingwell, and a pleasant social hour spent. (Patriot please copy)

NEW POST FOR PILOT

DUBLIN (CP)—Captain J. C. Kelly-Rogers, pilot on the first regular trans-Atlantic flight in 1933, has resigned his British Overseas Airways post to become technical manager of the new Irish trans-Atlantic air service.

Canada Year Book For 1946 Is Published

OTTAWA, Nov. 28 (CP)—A book that can claim rank with the driest and the surest sellers of the Canadian literary lists is out gain.

It is the Canada year book of 1946, the current annual issue of an official statistical giant that has been emerging under various titles since Confederation. Within its 1,224 pages is packed a wealth of information on the economic, social and physical Canada now shaping herself into a slowly hardening post-war mold.

Twelve thousand copies of the big green book will be distributed, some of them finding their way to many parts of the world in exchange for similar national statistical compilations.

Of the 12,000, some 8,000 will go free outside the country or, inside Canada, to libraries and newspapers and other authorized sources. Three thousand will be published with paper covers for sale at 61 apiece to students and the rest will be sold to the public at 83 apiece, actually considerably less than they cost to produce.

In recent years, the total number of copies issued annually has increased markedly and there is no indication that the demand will lessen this year. In 1945, for instance, the public swallowed up the available copies within three months.

The year book is published under the authority of Trade Minister James MacKinnon. The Dominion Bureau of Statistics already is deep in the job of preparing the 1947 edition. The emphasis in the new edition has been placed on the steps planned and now being taken to bring trade and industry back to a peace-time basis.

70-year Scheme To Rebuild Hull

HULL, England, Nov. 28 (Reuters)—A 70-year plan for the rebuilding of Hull, one of England's worst blitzed cities, has been announced.

The work of Sir Patrick Abercrombie, leading British town-planner, it provides for an increase from the present 320,000 population to an ultimate 500,000, with a "green belt" around the city limiting further expansion and safe-guarding agriculture.

Highlight of Sir Patrick's plan is a 1,500-yard suspension bridge over the Humber. It will cost \$5,000,000 (\$24,000,000).

The plan provides 300 per cent more acreage for open spaces within the city than previously, and a shopping centre to serve 500,000 people. Slums behind the docks are to be eliminated and Sir Patrick says his plan envisions a two-storey house for everybody.

While observing that the "medieval part of Hull is still living and has been retained in the plan," Sir Patrick's report, already approved in principle by city council, recommends a "bold proposal" for damming the River Hull, increasing its connection with the Humber docks and extending its industrial frontage.

NEW MACHINE FOR SPRAYING ORCHARDS

If experiments now being conducted in the Okanagan Valley in British Columbia prove successful, air blast utilization by a simple, light and economic machine may be the answer as to what future methods of spraying orchards and fields may be. A sprayer-duster of this type has been brought into the Okanagan Valley by the Division of Entomology, Science Service, Dominion Department of Agriculture, under Dr. James Mar-

shall, of the Division at the Summerland Laboratory, and is being operated at Summerland, Penticton, and Kelowna. It is still in the experimental stage and consequently has undergone a number of adjustments and alterations.

Even now it is not suitable for the use of the commercial orchardist. It requires a change in spraying procedure quite apart from the fact that it operates with entirely new types of spray concentrates.

Nevertheless, it is less expensive, much faster, and more easily operated than a high pressure machine. At the same time, it indicates that the new type of spraying and dusting equipment will be light and moderately priced and probably operated by one or two men at a speed five to twenty times that of conventional two-gun high pressure equipment.

The future machine may utilize the air-blast principle, whereby fairly concentrated solutions or dusts, or perhaps both together

are pumped or injected at little or no pressure into a powerful current of air.

Gives Advice Re German Measles

NEW YORK, Nov. 28 (AP)—Dr. Herbert C. Miller, of the University of Kansas School of Medicine, said today German measles was a dangerous disease—and young girls should deliberately expose themselves to it.

Explaining this paradoxical advice, Dr. Miller said that the danger of measles was to a child whose mother contracted the disease during pregnancy, not to the measles patient. Previous exposure would produce immunity.

Dr. Miller told the annual con-

ference of the National Society for the Prevention of Blindness that doctors had learned recently that German measles, previously regarded as relatively unimportant, was a major cause of cataracts, deaf mutism, heart disease and dental defects in infants born to mothers who contracted the disease during pregnancy.

GREATLY INCREASED VITAMIN "D"

THE vitamin D content of Carnation Milk has been increased from the former 162 to 400 international units per reconstituted quart (half Carnation, half water) . . . nearly 2½ times as much as before.

This additional irradiation assures a margin of safety for the prevention of rickets in normal infants, and provides the vitamin D needed for good bone and tooth development and excellent growth.

So now, more than ever, Carnation Milk ranks as a preferred food for bottle-fed babies, for their growing brothers and sisters, and for grown-ups, who also need "sunshine" vitamin D. This greatly increased amount of essential vitamin D is provided at no extra cost.
