ROBIN HOOD FLOUR better than ever. All grocers. 2131-3-3-1month. HORSES FOR SALE - Just arrived at Hedley Muttart's, Carleton, a car of choice western horses. J. W. Whitehead, owner. 2857-41. BEST QUALITY BLACKSMITH iron, bolts, nuts, etc., sold at Brace's. 2737-3-31-21. LOST - Fox, ear marks E.K.O. and 369. Robert Champion, Sherbrooke. 2734-21. TWO-TUB POWER washing and wringing machines at about the price of a one-tub, at Brace's. 2737-3-31-21. BEEF HEARTS, lamb hearts, beef tripe, horse meat - fresh stock frozen solid, order now at Brace's. 2758-4-1-21. WE ARE NOW TAKING ORDERS for Fertilizer at our offices Malpeque, French River and Kensington, all orders to be in April 7th. 2773-4-1-21. JUST ARRIVED car of Oilcake, wonderful quality. Write or phone for special prices. R. T. Holman Limited. 2758-4-1-31. NOTICE - To arrive at Freetown, April 2nd, one carload of horses, weighing from 1100 to 1900 pounds; from 5 to 8 years old. See them before buying elsewhere. A. C. Gardiner, Freetown. 2734-31. WRITE OR PHONE for special prices on our car of Oilcake just received. R. T. Holman Limited. 2758-4-1-31. POSSIBLE LANDING FIELD FOR SUMMERSIDE - Mr. Irving, who has been looking into the possibilities of a landing field in the vicinity of Summerside, was in Summerside last Friday and made a successful landing on Mr. Samuel Cannon's farm at the north of the town. He considered the field could be put into shape at very little cost. Members of the committee appointed to deal with the matter are going into the cost of preparing the field to make it a suitable landing place. Nothing definite has as yet been settled. Mr. Cannon is quite willing to sell his land for such a purpose. The mall plane made a successful landing on the proposed site twice on Saturday. S. DON'T FORGET that we have just received a carload of Oilcake. Write or phone promptly for special prices. R. T. Holman Limited. 2758-4-1-31. PERSONALS Many friends will regret to learn of the serious illness of Mr. John W. Hogg of Summerside. It is pleasing to report that his condition is somewhat improved. Mrs. John T. McKay has returned to her home in Sea View after receiving treatment in the Prince County Hospital. Mrs. McKay was the guest of Mrs. Stanford Gay during her visit to Summerside. Mr. J. E. Dalton, of Summerside, has returned from an extended visit to Boston and other United States cities. Mr. Edgar Milligan, of Northham, has returned from an extensive tour of the United States, where he has interests in a number of fox ranches there. Mrs. Benj. Rogers, Jr., of Summerside, is at present visiting her parents, Senator and Mrs. Greelman MacArthur, who are in residence at Ottawa. Mrs. Rogers will be away about five weeks. Nervous Dyspepsia Bad Liver, Headache of Years Vanish

Eastern Guardian

Her many friends are pleased to see Mrs. Henry J. Gaudet, of Summerside, out and about again after her recent serious illness. Mrs. E. C. Casley and daughter, Miss Jean, of Wilmet Valley, spent the week end in the city. FOR SALE - ONE CAR of choice selected horses, well broken, due to arrive in Montague April 7th. Can be inspected at Clay's Stables, MacGregor & MacLean, Montague. 2743-3-31-April 2-4. MOTHER SHIPTON'S PROPHECIES "A house of glass shall come to pass in merry England, but alas! War will follow with the work in the land of the Turk. And state and state in fierce strife struggle for each other's life. Carriages without horses shall go. And accidents fill the world with woe. In London Primrose Hill shall be the center of a bishop's see." (Primrose Hill now in the heart of London, was in Mother Shipton's time, twelve miles from the city.) "Around the world thought shall fly in the twinkling of an eye; Through the hills men shall ride And neither horse nor ass bestride. Under water men shall walk, Shall ride, shall sleep, shall talk. Iron in the water shall float As easily as a wooden boat. Gold shall be found and shown In a land that's now unknown. Fire and water shall wonders do. And England shall admit a Jew. Three times three shall lovely France Be led to dance a bloody dance, Before her people shall be free Three tyrant rulers she shall see, Each sprung from a different dynasty. And when the last great fight is won England and France shall be one. And now a word in uncouth rhyme Of what shall be in the latter time. Women shall get a strange odd craze To dress like men and breeches wear, And cut off their beautiful locks of hair. And ride astride with brazen brow As witches do on broomsticks now. Then love shall die and marriage cease. And babes and sucklings so decrease That wives shall fondle cats and dogs, And men live much the same as hogs. In eighteen hundred and ninety-six Build your houses of rotten sticks, For then shall mighty wars be planned And fire and sword sweep o'er the land. But those who live the century through In fear and trembling this will do; Fly to the mountains and the glens, To bogs and forests and fens, For tempests will rage and oceans roar. And Gabriel stand on sea and shore. And as he toots his wondrous horn Old worlds shall die and new be born."

At Last! a fine quality, foil wrapped cigar for five cents - try one today. 5c foil wrapped ARABELLA Cigar

STUDY POSSIBLE EFFECT POWDER DAM ON FISHERIES IN PASSAMAQUODDY WATERS

BUFFALO, N. Y., March 31 - The eyes of two governments, not to mention those of the scientific world, will be on two groups of workers from the Buffalo Museum of Science conducting scientific surveys of two widely separated spots on the Atlantic Coast. One group, working in conjunction with scientists from the Mount Desert Island biological laboratory and from Brown University, will continue the study of biological, chemical and physical conditions in the Gulf of Maine which it started last summer. Another group, including scientists from Princeton University, will make a similar study of conditions at Andros Island in the Bahamas. Announcing the projects for this year, Dr. Charles J. Fish, director of the museum, stressed the fact that too often an institution attempts to participate in too many fields and ends by finding its funds inadequate for the completion of its investigations. In order to avoid such a difficulty, the museum has selected two major subjects for research, oceanology and anthropology. Outstanding among achievements of scientists from the Buffalo Museum in the past are a biological survey of Lake Erie, a Bermuda expedition, made possible through the courtesy of Dr. William Dabbs, the Princeton-Buffalo expedition to the West Indies, analysis of biological and physico-chemical data collected on the recently destroyed ship "Carnegie" field work at Woods Hole, Mass., and last season's cooperative survey of the Gulf of Maine. The Gulf of Maine expedition last summer made 228 hydrographic observations and collected 90 specimens of microscopic creatures from water at both the surface and bottom of the ocean. This work will be expanded this year and carried out by a number of cooperating institutions. Dr. Fish expressed a hope that the expedition would be able to cover the area between Casco and Passamaquoddy Bays, an area which includes the richest fishing grounds in the entire Gulf of Maine, including the centre of the sardine or herring industry of the Atlantic coast. The herring fishery, with its tremendous importance to that part of the country, Dr. Fish pointed out, may be seriously affected by the erection of a proposed power dam in Passamaquoddy Bay, and both the United States and Canadian governments are deeply concerned over the

possible effect. It was thought advisable therefore, he explained, to determine the physical, chemical and biological changes that might take place after the erection of the dam. Among the subjects to be considered, he said, are such factors as water currents, movements of the water mass, availability of food, importance of the bay as a food source, and the particular type of food required by herring. These investigations and analyses lead to a study of aquaculture, like agriculture, a field in itself. That science, Dr. Fish declared, will be studied from the viewpoint of future conversation of life in the waters of the earth. He hinted at the possibility of being able some day, through conservation and scientific data, to control the product of the deep sea fisheries, just as the product of the land is now controlled through agriculture and forestry. Dr. Fish explained that he plans to extend the work to cover offshore regions; otherwise it will be concentrated along the shore waters. In the Bahamas, the scientists will study conditions in the 25,000 square miles comprising the "banks," conditions which, according to Dr. Fish, are found nowhere else in the world.

BIRTHDAY ANNIVERSARY

On the evening of March 22nd, the members of the North Tryon Institute and others met at the home of Mrs. Edward Sharkey to celebrate with her, the anniversary of her birthday. The evening was pleasantly spent in music and stunts. During the course of the evening, an address was read by Mrs. Wilfred Inman and Mrs. H. Calbeck, presented Mrs. Sharkey with a beautiful serving tray. Mrs. Sharkey then thanked her friends in a few well chosen words. Refreshments were then served by the ladies. The following was the address: March 22, 1930. Dear Mrs. Sharkey: We, your Institute friends, have gathered here tonight to celebrate with you the anniversary of your birthday. We take this opportunity of expressing our appreciation of your work in our Institute. Even though you are our oldest member, you are one of the "faithful few" who are always in your place when Institute night rolls around. Again on sewing afternoons, you are ready and willing to "do your bit."

WOMAN BURIES ANCIENT SCARAB AFTER 7 YEARS CONTINUED MISFORTUNE

BRADLEY, England, March 31 - A scarab taken from an ancient Egyptian tomb was buried by Mrs. John Bertram Parkes for seven years of poverty and misfortune, culminating in widowhood. So she buried the thing in the woods near her humble home here. The scarab was inscribed with part of the 64th chapter of the Egyptian Book of the Dead, which identified it with the heart of the deceased person and urged it not to betray him at the judgment before Osiris. It was found by her husband when he was in Egypt as a colonel in England's crack Grenadier Guards. Shortly afterwards, he was demobilized. For a time he worked, first as a coal dealer and later as a market gardener, toy maker and firewood seller. Then for seven years he was unable to land a job of any sort. Finally he was forced to build a two room shack in the woods here in order to have shelter for his wife and four children. Then he died, leaving his family destitute. Mrs. Parkes said her husband blamed all his misfortunes on the scarab. "He was too superstitious to throw it away, but he asked me to get rid of it," she explained. "He felt sure it was a curse." When he fell sick an ironic fate sent him half a dozen offers of lucrative employment. But he was already on his death bed. A price war has caused the reduction of the cost of gasoline in Persia by 30 percent in the last year.

HALIFAX PORT FIGURES GROW

HALIFAX N. S. March 28 - Tonnage figures for month of February indicate a distinct growth at Halifax in shipping handled during the winter port season, when the ice-locked St. Lawrence is forsaken by water-borne traffic in favor of berthing piers in the harbors of Saint John and Halifax. Records show that 1,620,464 tons of cargo were handled at this port during the short month, 50,000 in excess of the figures for January, and a considerable increase over the same month last year. Busiest of all the water front berths were the big piers at Deepwater and the Ocean Terminals, where the longest seawall on the North Atlantic affords adequate facilities for the simultaneous docking of three liners. British ships outnumbered vessels of foreign registry by more than three to one. During the month 118 vessels flying the red jack were handled at Halifax, together with thirteen Norwegian, seven Danish, four Swedish, three German, two United States, and one Greek, the first ship to call here under that flag in many years. A summary shows that thirty-four ships of over ten thousand tons called here to take on or unload cargo, with the same number between six and ten thousand tons. Ships from one to five thousand tons numbered forty. Among the large cargoes landed was 7,000,000 pounds of butter and meats from the freighter Surrey, New Zealand to London. A number of county line boats called enroute to and from Antwerp, discharging large amounts of fertilizer and general cargo. Special trains to convey mail to Montreal and the West were necessitated by heavy landings of mail from liners on the Southampton run. Coastal shipping during month 1930.

HOW TO BUILD A COLONY UP FOR THE HARVEST

(Experimental Farms Note.) To gather a maximum crop of honey the colony must be exceedingly strong in bees at the same time as the major honey plants commence to secrete nectar. Furthermore, the majority of these bees must be of the right age to become gatherers at this particular time and 'o be of the right age they must be produced during the eight weeks just prior to the honey harvest, which means during the spring and early summer. The spring is the most critical period of the year for the beekeeper because it is during this period that his colonies are usually at their weakest in bees, lowest in vitality, short of stores, and at the same time are required to produce the largest amount of brood. Young bees cannot be produced in large numbers without (1) a good prolific queen to produce the eggs, (2) a plentiful supply of food to feed the oncoming generation, (3) sufficient room for the queen to reach her maximum egg production, (4) adequate protection, especially from cold winds and (5) a force of bees strong enough to care for all the brood the queen can produce. It is up to the beekeeper then to see that these essentials are supplied. As soon as possible in the spring look over the colonies and replace all old and useless queens, supply each colony with enough food either in the form of honey or sugar syrup and see that there is sufficient room for the normal expansion of the brood nest. Bees wintered outside will have protection enough but those wintered in cellars should have at least protection from the wind when they are moved to their summer stands. All colonies that are weak in bees should be united or have a two pound package of bees added to them. Remember that every check in the spring brood rearing will mean less bees for the harvest. For further particulars, write for Experimental Farms Bulletin No. 33, New Series. Dominion Apiarist. C. E. GOODERHAM. Nearly twice as many phogographs are being imported into Venezuela as a year ago. Several state governments of Mexico are giving official encouragement to sports.

MR. JOHN R. HARDING

The death of John R. Harding, a lifetime resident of Norboro, took place at the home of his son, James Archibald, on Friday, Feb. 14th, at the advanced age of 88 years. Deceased had been in his usual good health till within a few hours of his death. He was suddenly stricken with an attack of heart trouble and passed peacefully to his eternal reward. He had many sterling qualities which composed the kind husband, loving father, good neighbor, and a gentleman in all his dealings. He possessed a genial and hospitable disposition and was ever ready with a joke, which never savoured of sarcasm or vulgarity. The deceased was first married to Catherine Murdoch of Kelvin, to whom seven children were born, who today mourn his passing, namely: Mrs. Janet Pickering, Clinton; Mrs. Richard Pillman, Castor, Alta.; Mrs. E. J. Jenkins, Mrs. A. E. Hall, and David S., all of Arlington, Mass.; Ernest J., Elkland, Pa., and James A. of Norboro. His second wife was Bessie McFadyen, of Inverness, Lot 10, who predeceased him six years ago. Since then he has been lovingly cared for by his son James Archibald and his wife, and three grand children, Mrs. Chesley Robertson, Miss Hazel and Clarke Harding and one great grandchild, Ernest Robertson, to whom he was very much attached and will have the sympathy of a wide circle of friends. The large assembly of people, who came from far and near to do honor to one whom they had learned to respect and admire, testified of the esteem in which he was held. After prayer and the singing of his favorite psalm at the house, the funeral procession wended its way to Summerfield Church, of which the deceased was a member. The service was conducted by his pastor Rev. J. R. Saint, who spoke words of comfort to the bereaved. Mr. G. Roy Phillips sang very feelingly "In the Sweet Bye and Bye." Miss Dorothy Mayne presided at the organ, and a special choir led in a beautifully appropriated service of praise. The following were the pall bearers: Walter Connick, Cecil Hughes, Jas. Somers, Wilfred Pickering, Strirling McKay and William Harding. The following sent floral tributes: Norboro Women's Institute, Mrs. E. J. Jenkins, David Harding, Mr. and Mrs. A. E. Hall and Mr. and Mrs. John Williams. Messages of sympathy were sent from Mr. and Mrs. Kelly and Mrs. Harry Harding. (Patriot, please copy.) Construction projects planned for the Panama Canal Zone aggregate \$25,000,000. Petroleum, produced in Venezuela last year totaled 106,000,000 barrels which is more than five times that of 1924.

BALDWIN THE BOOKMAN

Continued from Page 4 modern author, or revealing the qualities of a nineteenth century master of romance, he is equally felicitous and refreshing. As a literary influence British publishers place him above the leading critics and reviewers. What he did for the works of Mary Webb is well known. His recent address in Scotland on the author of the Waverley novels has caused, it is said, quite a revival of interest in Scott, and booksellers are confidently anticipating that his forthcoming discourse on Dickens will result in a boom of "Box." Whatever may be Mr. Baldwin's fate as a political leader, it is safe to predict that he will continue to be in demand as a really engaging and popular interpreter of literature. WEEK END SHIPPING HALIFAX, N. S., March 31 - In preparation for the transatlantic flight of the giant British dirigible to Canada which it is understood will take place shortly, chief petty officer G. H. Kinch of the royal navy landed here yesterday en route to St. Hubert airport just outside of the city of Montreal, to go on duty there at the huge mooring mast that has been erected for the reception of the dirigible. Among the ships arriving were the White Star liner Baltic, Cunarder Alaura and Anchor liner Cameronia, coming here under Canadian National Railways auspices. The Baltic disembarked 605 passengers the largest to land from any ship at Halifax this season. STATION FOR TELEVISION CHICAGO, March 31 - Television is beginning to "break," at least as far as Chicago is concerned. Announcement has just been made by W. S. Hedges, president of WMAQ, owned by the Chicago Daily News, that his station is planning the simultaneous broadcasting of television and sound within 60 days. The television signals will go out over the short wave station W9XAP on 6040 kilocycles, while the sound will be sent on WMAQ's broadcast wavelength, 670 kilocycles. According to present plans, television presentations of some of the regular sound programmes will be made daily.
