

### Nervous?

There are many causes of nervousness, but poor blood heads the list. The doctors call it anemia. The blood lacks red corpuscles. At your first opportunity, consult your doctor about taking Ayer's Sarsaparilla. Ask him if he has anything better for weakness, debility, nervousness. If he has, take it. If not, take Ayer's Sarsaparilla. Get well, that's what you are after.

### LIVING OVER A VOLCANO

ST. PETERSBURG, July 28 — The government can hardly be blamed to the fact that it is living over a volcano and that the danger of an eruption is far from ended. For the last 48 hours the central committee of the social democrats, social revolutionists, peasant league, railroad men's union and telegraphers' union and the military committee have been conferring both separately and jointly with the parliamentary groups, not only on the question of calling a general strike, but actually on the question of attempting a counter coup d'etat by setting up a provisional government. No final decision has yet been taken, but practically all the proletarian organizations, including that of the railroad men, but excepting the telegraphers, have already pronounced in favor of this step. The members of the group of toll and social democrats of the outlawed parliament believe that another course is open, and are irrevocably committed on the surface, with the constitutional democrats, to discontinuing any active revolutionary step, but secretly they have agreed to support or join in it if it can be successfully inaugurated. Over a hundred of them met last night in Finland, under the presidency of Prof Mikuloff. Conferences will be held by representatives of other groups this afternoon. The possible extent of the support which a revolutionary movement will receive from the army is, therefore, vital.

At Helmsingtons, Finland, Tuesday night 1,500 soldiers and sailors of the garrison took an oath to fight on the side of the people. It is quite apparent to disinterested people that the government in entering on its present policy made a perhaps fatal blunder in lacking the hardihood to arrest the members of the outlawed parliament. This left them free to conduct a conspiracy against the life of the government. When the plot is complete and the signal has gone forth arrests will be useless and the government will again find that it acted too late in closing the political clubs, which has been followed by the closing of all the workmen's unions and suspected tea houses.

The prefect of police has issued another proclamation warning the population that persons guilty of armed resistance or attempts to commit political crimes will be court martialled, while the lesser offences like participation in the formation of leagues, incitement to strikes, etc. will be punishable administratively without trial by a fine of \$1,500 and imprisonment of from three to six months. The reports from the provinces indicate that the authorities do not fear to employ harsher measures than used at the capital. The editors of confiscated papers are compelled to give hostages as guarantees against attempts at illegal publication.

THE WONDERS OF THE BODY. Its mechanism, like delicate machinery, by even a slight error is so destroyed as to be practically useless. A headache is no trifling matter because the stomach kidneys and liver are sure to be affected. To cure the cause of headaches and prevent new attacks, use Ferrazole; it aids the stomach by supplying nourishing blood, vitalizes the nerves and brain instantly. Ferrazole braces—gives tone—elevates your spirits. No such health-bringer known. Fifty cents per box of fifty chocolate coated tablets at all dealers.
