

GRAFT

Three year old son of the mighty Brazilian, No. 20214, record 2.19, half-mile track, dam Carrie Nation by Provider 2.18, second dam Teda by Administrator No. 357, third dam All Right. If not disposed of will do service at my barn season of 1911 where fullest particulars can be had.

GRAFT'S STATEMENT.

It has taken my owner some time to decide to sell me after having had numerous inquiries and as it is only the good ones that sell I am liable to change hands. Had I been foaled in Kentucky, I have breeding, looks and size for three thousand dollars. Buy me at a four figure price, show me in high class society, I will not only give you publicity but convince you that I can win myself out several times. First in the stud, second on the track, third in the ring.

An eminent auctioneer at Halifax last fall screamed it out to five thousand people that my Daddie (Brazilian) was the best horse ever imported into Canada. My full brother Israel Tarré did what no other colt ever did, winning as a two, three and four year old stake race at Halifax, taking a jogging record of 2.25 at four years. My next full brother Ed. C. divided second money at Halifax last fall with little or no preparation.

I have a half sister Lottie P. 2.14, Lina Bell 2.19, Baby Logan 2.18, Lina Miller 2.21, and half brothers Prince Louis 2.14, Billy "C." 2.23, Blomidon 2.21, Brazilian S. 2.26, Ozen B. 2.19, Dominion D. 2.26, three years, both the latter holding Maritime record to date.

My mother, Carrie Nation died after leaving three sons who will do her honor and was a daughter of Provider 2.18, his dam being Lill, the mother of Dot 2.18. As Dot was the fastest of Administrator's get it proves what a grandmother I had on my sire's side of the house. My grand-mother, on mother's side, was Teda by Administrator No. 357, etc., etc.

Provider was by Preceptor, he by Nutwood and he by the son of Belmont and Miss Russell. No other mare of her day or since has possessed such speed perpetuating ability as did Miss Russell. Her name is found in the pedigrees of 96 trotters and 147 pacers that have made records of 2.10 or better. Her son Nutwood is the greatest brood mare sire the world has ever produced. He is also famous as the sire of a greater number of stallions that has sired standard speed than any other horse that has ever lived. My photo was taken when two years old and does me no flattery.

Gentlemen: Graft is 1125 pounds now, almost sixteen hands, seal brown in color, and has lots speed on tap. Fine disposition, upstaid, stylish, fine action, good, clean eye, smooth made and fine at every point. Some forty mares offered at the Court of Graft last year, only twenty-two of which could be accepted owing to his age, eighteen are safely in foal. He will get the kind of stock that Horsemen, Farmers, and Gentlemen of all classes require as he has the size of Blomidon, his half brother.

Should he remain my property he will receive preparation for racing in his four year old form.

Commencing with the crop of foals get by this stallion in 1911 I will give to the owner of the first of Graft's get to go in the list in a race or against time, trotter or pacer, the sum of \$50.00 and will agree to hold myself responsible for above amount should Graft change hands.

Cape Traverse, March 29, 1911.

E. E. CROSBY.

For Sale Miss I. C. F. Registered Filly by Brazilian.

Miss I. C. F., bay mare, foaled in 1908 by Brazilian, No. 20214, dam Nelly by Provider No. 23698, grand dam Minnie by All Right No. 5817, great grand-dam Filly by Abadallah 4868.

This mare has a beautiful clean cut head, on a long, well formed neck after the All Right or Black Hawk pattern. Moreover she has a great flight of speed very stylish and highly finished in conformation, disposition and in action. Bred along the same lines as Graft, a 2.15 trotter when matured and oh what a brood mare when through racing.

Shown to hitch, registration papers in my possession. Write for price on this mare.

Cape Traverse, March 29, 1911.

E. E. CROSBY.

A Washing Secret.

A woman whose cotton clothes never seem to fade was induced to tell how she did it.

"In the first place," she said, "I am particular that all my colored clothes have the coloring set with sugar of lead or salt before washing, but my particular trick is adding a little coloring matter, such as is used for candies, to the rinsing water. Just a drop or two will make the materials come out bright and fresh looking."

Another woman uses a drop or two of cotton dyes in the rinsing water with equally good effect.

Scotch Broth.

Three pints of the boiling from mutton, one teaspoonful pearl barley, two teaspoonfuls of chopped carrot, turnip and onion, pepper and salt, and chopped parsley.

Free the stock from fat and put it on to boil with the pearl barley, which must be well washed. Cook for an hour and then add the chopped vegetables and let it simmer again for half an hour. Season with pepper and salt and serve. This is an excellent family soup and especially good at this season.

Shiloh's Cure

quickly stops coughs, cures colds, heals the throat and lungs. 25 cents

The Edison Phonograph is the wonder of the age—the most natural and popular sound reproducing machine the world has ever heard.

You have the concert hall, grand opera or vaudeville stage, bandstand, political platform or minstrel show in your home—seated in your favorite easy chair before a comfortable fire you have the world's best singers and musicians perform at your command.

Then, with the Edison, you can make records at home—one of the greatest of all good pastimes. You owe it to yourself and friends to possess an Edison. Let us give you prices—easy payments if desired.

Fish Croquettes.
Rub together three tablespoonfuls of flour and one of butter and stir into a half pint of rich milk. Add a teaspoonful of finely chopped parsley and a quarter teaspoonful of grated onion. Boil until it thickens, then stir in two cupfuls of cooked fish and let the mixture boil up again. Season with salt and pepper and set aside. When cold roll into croquettes, dip in beaten egg and bread crumbs and fry in hot fat. Serve with peas, cress or fresh string beans, garnished with slices of hard-boiled eggs.

Pumpkin Pies.

Mix one-half cupful of sugar, one egg beaten, two tablespoonfuls of stewed pumpkin and one-half cupful of fresh, rich milk. Season highly with powdered cinnamon and grated nutmeg. Add a pinch of salt and a small portion of pulverized ginger. Line individual heart-shaped pie pans with light, flaky puff paste. Fill these shells with the pumpkin pie mixture and bake in a steady oven. When done, cover with meringue, return to oven and brown to a golden color.

Call (Breakfast Dish).

Butter a pie dish and cover the bottom with a layer of grated cheese, then break as many eggs as may be required on the grated cheese, then sprinkle with pepper and salt, then another layer of grated cheese and on that some grated bread crumbs, and last of all a few pieces of butter. Bake this until the eggs are set—about 15 minutes. Very good.

Rolls Oats Pudding.

One and one-half cups raw rolled oats, small half cup of molasses, half cup sugar, one cup raisins, one quart milk, a little salt and cinnamon. Put hot with cream or hard sauce or cold with hot sauce.

CUT THIS OUT AND PASTE IT UP.

Almost every day The Guardian receives orders by mail to insert news matter of an advertising nature. In most of these cases the senders, who are frequently not known to any member of the staff and who have no account in the advertising department, write "Please insert the following and oblige," thus apparently implying that they think the items will be inserted free. Only a few weeks ago a reader wrote asking that his advertisement of Farm for Sale be inserted free from day to day until he cancelled it, as he is a subscriber to The Guardian. In this connection it may be said that the subscription price is not sufficient to even pay the actual cost of paper, ink, presswork, mailing, proofing and other expenses of the Circulation department proper, and thus subscribers have no

privileges of free advertising and are on the same footing as non-subscribers. Seldom ever does the sender state whether the item is to appear in the Morning Daily or the Rural Daily, whether for one or more times in either Daily, or in both, whether as a display advertisement, announcement, business local, classified ad or otherwise. When for church or charitable purposes they seldom ever say so, or do not enclose sufficient money to pay for same all of which will be returned by first mail in the event of the item not being chargeable; or if more money is sent than necessary to pay for the item the surplus will be returned at once, there being a greater discount for cash with order for advertising of churches & than for regular business. In all such cases

the Advertising department communicates with the sender as quickly as possible by mail or phone, often paying the messenger service to get them to the telephone if not too far distant, thus saving all possible time. People write this office to know if News, Letters to Editor, etc., are charged for, and to all such there is but one reply—all items etc. of a money making nature, even though they be somewhat of a news nature, are chargeable. For instance, the advance notice or notices of a concert, lecture, pie social, picnic, etc., are chargeable if an admission fee, silver collection, sale of pies or sale of food or refreshments, etc. Advance notices of purely religious services, even though a silver collection is to be taken up, are not chargeable. The

particulars of any of the above, after they have been held, are, however, news and thus not chargeable. The news of any past, present or future business, which is still being conducted, is chargeable, if it is apparent that the object is to make the business more widely known and thus increase it. Verses accompanying death notices are also chargeable. Even items which are actual news and not chargeable for but once in either Morning Daily or Rural Daily are both are chargeable for more than one insertion, as they are thus not news. The above facts are given for the purpose of assisting persons who have items, etc., to mail to this office, so that delay and disappointment will be avoided. 3-16drft.

Twenty Canadian Boys Going to Coronation

Probably the greatest offer ever made to the boys of Canada is the one to send twenty of them to the Coronation of King George in June. The trip will consume five weeks and every penny of expense will be paid by

These twenty boys will be selected in a Dominionwide competition. If YOU want to go on this trip, fill in the attached coupon and mail at once.

THE CANADIAN CENTURY planned originally to send twenty Boy Scouts to the Coronation, but, meeting opposite from the Dominion Council, the plan has been changed. Boy Scouts who had been forbidden to compete before may try for one of these trips now as individuals.

Contest Manager THE CANADIAN CENTURY Montreal. Please send me information on how I can go to the Coronation without any expense to me. Name.....Age..... Street and Number..... City or Town.....Province..... Charlottetown Guardian

Watrous Is Alive and Coming

Watrous is first of all an excellent new city with an unusual number of points in favor of its rapid growth. Watrous is the Central Prairie Divisional Point on the Transcontinental Line of the Grand Trunk Pacific—situated in a splendid farming country, and a natural distributing centre. Watrous also has Little Manitou Lake—a body of water twelve miles long, sufficiently charged with mineral and curative properties so that it serves as a panacea for various ailments of mankind. Watrous has already made marked progress—having grown to 1,500 inhabitants in the first two years of its existence. But the greatest outlook for Watrous is in its future—especially during the next two or three years. Indications are that this whole country along the Grand Trunk Pacific will be settled at a marvellously rapid rate. Shiploads and trainloads of newcomers are constantly announced, and it is certain that no district possesses greater attraction for these than the fine virgin country along the Grand Trunk Pacific—a goodly part of which is served by Watrous. Watrous is confident of its own future, and is adding public improvements of a lasting character, and on a considerable scale.

The Central Divisional Point On the Transcontinental Line of the Grand Trunk Pacific

City Water and Electric Light Sewage Plans have just been approved by the Watrous Council for bringing in a plentiful supply of drinking water. This water has been tested, thoroughly as to purity and fitness and has sufficient quantity and flow, so that there will be enough for manufacturing purposes as well. Splendid water is also to be had at about forty feet. An Electric Light plant will also be installed in connection with the water supply. The worst mistake committed by a new City is to let the matter of Sewage be delayed until an epidemic of sickness forces action in the matter. It is typical of the up-to-date spirit which has actuated the building of Watrous up to the present time, that this matter of sewage has had early consideration, and it is expected that an early meeting of the Council will vote Bonds for the installing of a modern sewage system.

Watrous is Taking its Place in the Forefront of New Cities In the meantime the Grand Trunk's Property at Watrous is priced exceptionally low—Watrous property is exceptionally good buying. The lots which we are selling at Watrous are the property of the Grand Trunk Pacific Railway, and are sold at their prices. All payments may be made direct to the Land Commissioner of the road, and title under the Torrens System will be issued by the Land Department of the Grand Trunk Pacific. Terms are exceedingly easy—a fifty foot lot can be bought with as little as \$7.00 a month. We are also putting out a Combination Offer, covering lots in five of the best Grand Trunk Towns, with payments extending over twenty months. Full particulars if interested.

Increase Your Crops With Unmixed Fertilizers

The man who wants to make a success of his farming without the aid of these unmixed English fertilizers is bound to meet many disadvantages and obstacles that will make his most strenuous efforts fruitless.

Profits are plain as the road to market if you use these fertilizers, but successful farming without them is as impossible as Aladdin's Lamp or the Fountain of Youth

When the country's leading farmers and agricultural experts most vigorously endorse these fertilizers—when they prove to all interested that they increase the crops as no other plant food can—that should be proof enough for any enterprising farmer that these unmixed fertilizers are absolutely essential to an increase in crops

We have some interesting and valuable booklets that will aid you in producing more profits from your farm. Write for them—they're free.

AULD BROS.

Lower Queen St. Charlotteown. dsrtstf.

A Point on Fertilizers

Some people may contend that where a large supply of farmyard manure is available it is unnecessary to apply artificial fertilizers, but this argument does not always apply. Take, for example, the turnip crop, the success of which depends so much on a large readily-available supply of phosphoric acid; to apply the required quantity of farmyard manure, supplying the necessary amount of phosphoric acid, would incur a waste of nitrogen—the latter ingredient being much in excess of the needs of the crop. It is quite evident, then, that the most economical practice will be to apply a light-dressing of stable manure, balancing the same with some artificial fertilizer containing phosphoric acid and potash and the extra stable manure could be profitably applied to another part of the farm.

Turnips seem to have most difficulty in getting their phosphoric acid and therefore respond readily to an application of phosphoric acid in an easily available form, such as acid phosphate (superphosphate).

Of course some nitrogen and potash ought to be applied but phosphoric acid is the dominant ingredient in a fertilizer for turnips. Potash is an important ingredient of a fertilizer for all crops, especially for clover, peas, beans, and root crops and is the dominant essential in a fertilizer for potatoes, tobaccos, etc.
