Bank of Montreal Deposits, Total Assets Increase

Annual Report Issued to Shareholders Shows Advance in Surplus

MONTREAL, Nov. 27.—Showing an increase in deposits and in total assets, a reduction in call loans and in current loans, a decrease in profits but an increase in surplus carried forward, as compared with last year, the annual report of the Bank of Montreal for the year ended October 31, 1930, was issued to shareholders today.

The statement of assets and liabilities was unusually strong. Total assets were reported at $826,969,537 as compared with $822,599,648 last year Of this total liquid assets amounted to $438,192,479, or 59.32 per cent. of total liabilities to the public.

The profit and loss account showed profits of $6,519,031, compared with $7,070,892 in the previous year. The profits added to the amount carried forward, made the total available for distribution, $7,254,612, allotted as follows: Dividends and bonds, $5,047,586; provision for taxes, $459,979; and reservation for bank premises, $800,000, leaving a balance to be carried forwards of $947,047 as against $735,582 at the end of the previous year.

CALL LOANS

Due to general market conditions call loans had been substantially reduced, the report showed, amounting to $17,840,690 in Canada, down from $27,460,856; call loans in Great Britain and the United States declined from $68,028,615 to $60,921,712. A substantial increase is shown in Dominion and Provincial Government securities held by the bank.

The smaller volume of business being done in the country is reflected by a reduction in current loans in Canada to $290 872,423 from $335,301,194, while current loans outside of Canada held fairly steady.

A constructive feature is shown by the tendency of deposits to increase. Total deposits amounted to $697,305,742 in the present report compared with $688,067,754 last year.
