# STANLEY BROS

Manitoba wheat contains more food value than any other. It makes the most wholesome, most nutritious Bread and Biscuits. But it contains so much Gluten (Nourishment) that the dough won't rise properly, and the bread is both heavy and gray. That is the reason, too, why Manitoba wheat flour does not yield good pastry.

Ontario wheat does not give as nutritious bread as Manitoba wheat. But what it lacks in food properties, it equals by the tasty lightness of its Biscuits, Cake and Pastry. For Pastry, alone, Ontario flour is better than any other flour made of a single variety of wheat. But there is no need to go to the expense of buying two flours.

## Beaver Flour

is both a bread flour and a pastry flour. It is a blend of Ontario Fall Wheat and Manitoba Spring Wheat. It contains just the right proportion of each to make the most nutritious Bread—the whitest Bread—and the lightest, most delicious Pastry of all kinds.

Beaver Flour also yields MORE Bread, etc., to the barrel, than any other.

No matter what other flour you are using, you are not getting the best results because you are not using the best.

Order a trial sack of Beaver Flour. The first baking will prove its quality.
