LOBSTER SEASON OVER—
Most of the lobster factories on the North Shore took in their raps last week and closed down. The extension was not of much advantage.

TRINITY CHURCH.—
There will be a celebration of the Holy Communion at 11 o'clock in Trinity Church, Georgetown the 7th Sunday after Trinity, July 15th, evening at 7 p. m. Rev E Malone M. A., incumbent of St. Peter's Cathedral, Charlottetown officiating.

A POPULAR SPOT.—
There is one place in Montague that is certainly deserving of the splendid patronage it has so long enjoyed, the ice cream parlor at the southern end of the bridge conducted by Mrs. H. McKinnon. Mrs. McKinnon has been in the ice cream business in Montague for a number of years and that her business has ever been on the increase is due to the fact that nothing but pure cream is used in the manufacture of her ice cream. There is nothing so cooling as a dish of her delicious pure cream ice cream.

QUEBEC'S SURPLUS WILL EXCEED A MILLION DOLLARS

MONTREAL, July 11.—The surplus of the province for the fiscal year that has just closed on June 30, will certainly exceed \$1,000,000 is the statement credited to Hon. Jacob Nicol, Provincial Treasurer in an interview with LeCanada. He refrained from comment when asked if \$2,000,000 would be nearer the mark. The report of the liquor commission will be made known in a few days and in this connection the provincial treasurer intimated that the operations of the commission had been increased considerably since the preceding year.

KPUFF BRANCHES CLOSE

DUSSELDORF, July 9.—Two branch factories of the Krupp works near Witten have been compelled to close down because of the lack of raw materials, and as a result of other restrictions ordered by the French as a penalty for the Duisburg train bombing. Several thousand men have been thrown out of work.

Nearly one-third of the stores in Dortmund, and a lesser proportion in other cities, are also closed because the blockade has cut off incoming shipments of goods.

The German authorities say the food supplies are diminishing, and that no eggs or butter are available while meat is scarce. The food shortage is due to the lack of transportation facilities and what supplies come across the frontier are moved mostly in motor trucks.

IN MEMORIAM

CATHERINE EUPHEMIA MAC-KINNON.

It is our sad duty this week to report the death of one of Strathburg's most promising young ladies. On June 20th, three passed away at her home, three miles west of town, Catherine Euphemia beloved and only daughter of Mr. and Mrs. E. MacKinnon, at the early age of eighteen years. The deceased was born May 31st 1905, four miles from Charlottetown, P. E. I. In 1911 she came to Strathburg with her parents and since then she has graduated from the Public Schools and this year would have completed her Third Year work in the local High School.

"Phemie" will be greatly missed in the home, the school, and in fact the whole district. Her agreeable personality and pleasant sunny manner won her a host of friends and made her a general favourite. The sympathy of the entire community goes out to the bereaved parents and six brothers.

The funeral service was held on June 22nd, at the home and in the Union Church and was largely attended. Rev. C. B. Lawson conducted the service and spoke feelingly to the mourners. Interment was made in the Strathburg Cemetery. The pall bearers were:—

- Mrs. Mary Wellband, Wilfred Dyck, Howard Frizell, Earl Newman, Harold Holman and Clarence Acorn. The following floral tributes attested to the late Miss MacKinnon's popularity. Pillow, father mother and the boys; spray, nurse Helen MacLaine; spray, her chums Mary, Eva, Evelyn and Dorothy; spray, Dr. and Mrs. Hotham; wreath Mr. and Mrs. A. Coles; spray, Mr. and Mrs. Clark and family; spray, Mr. and Mrs. A. MacKay and family; spray, Mrs. Dolson and Pearl; spray, Mr. and Mrs. G. A. Colquhoun; spray, Mrs. Lucke; spray, Mr. and Mrs. Balmforth and family; pillow, Mr. and Mrs. H. Newman; spray, Mrs. Henry and Mrs. Hazlett; spray, her Sunday School class; cross, Fourfold Club; spray, Sunday School; wreath, High School; spray, members of School Board; spray, Grain Growers Society; spray, Southcoote Sunday School; spray, Watriole Club; spray, Edulau School Board; spray, Edulau Women's Missionary Society.

"How sweet to sleep where all is peace. Where sorrow cannot reach the breast. Where all life's idle throbbings cease, And pain is lulled to rest."

Prize Essay

HOW TO ENCOURAGE TOURISTS AND SETTLERS TO COME TO P. E. I.

The accompanying essay was awarded the Daughters of the Empire prize for the best essay from Prince Street School in the Essay Competition conducted by them and was awarded the prize.

The question of how to increase our tourist trade and also induce immigrants to locate in Prince Edward Island is one of vital importance to the province, and should bring forth the best efforts of our Boards of Trade and other organizations, together with that of every private citizen in an endeavor to solve these two very important problems.

Few persons realize the value of the tourist traffic to the country. The genuine tourist is a person of wealth, touring the country at his leisure, and seldom careful of the money expended, so long as the necessary comforts and pleasures are forthcoming.

Prince Edward Island is undoubtedly one of the beauty spots of Canada and should certainly command its share of tourist traffic if a little effort was put forth in the right direction.

Considering the fact that in some of the other provinces during the past season several millions of dollars were spent by tourists, the question naturally arises, why cannot Prince Edward Island secure at least a portion of this very lucrative business? The tourist traffic could become one of our greatest industries, if properly developed as has been the case with other countries not any more attractive.

One of the chief things to attract tourists is plenty of good hotel accommodation. If part of the capital, that is yearly sent out of the province for outside investments, was used at home in an effort to develop the tourist trade, such as building good summer hotels and cottages, and ways in demand, the Island would be greatly benefited thereby; and the investor would not only receive good interest for his money, but would have the satisfaction of being able to see where the money was placed, and that it was helping to further the interests of the country in which he resides.

While the question of accommodation is perhaps the most important one, we must not lose sight of the fact that it is also necessary in order to attract and hold tourists here, that we furnish some entertainment as well; such as boating, bathing, fishing, shooting, golf, tennis and numerous other amusements.

Our fishing streams are largely leased to private parties, and as fishing plays a prominent part in the amusements of the tourists, this should be remedied, if we are to encourage tourists to come here. The general public should take an interest in persons coming to the Island, and do its share in making his or her stay as pleasant as possible.

The public highways of any country, and especially of Prince Edward Island, are a prominent part in the amusements of the tourists, this should be remedied, if we are to encourage tourists to come here. The general public should take an interest in persons coming to the Island, and do its share in making his or her stay as pleasant as possible.

Another hardship is the cost of transporting automobiles by the ferry and the delay occasioned thereby which should all be remedied. Transportation from New Brunswick to Prince Edward Island should also be improved. The necessary pullman cars should be operated between the Island and the mainland so as to create the best possible impression with the travelling public.

Special inducements must be offered before we can hope to secure our share of immigrants coming to Canada. The government should arrange some system of financing these people to a certain extent, as a great number of them are only in moderate circumstances. The government should also be in a position to obtain farms for these people when they arrive.

Some families who came out from the old country and settled here, found conditions so entirely different to what they had been used to, that they did not stay. Hence the necessity of giving these people all the necessary information so that they will have a thorough knowledge of the country. And then there will be no disappointments.

Burglars in Montreal Got Away With \$9,000 Or \$10,000

MONTREAL, July 11.—Furs, clothing, cash and fixtures to the value of between \$9,000 and \$10,000 were taken by robbers who broke into the premises of L. P. Lazare and Company, Ltd., furriers, 490 St. Paul Street west, and of the C. Hershorn Clothing Firm, 27 St. Catherine St. west, in the early hours of the morning.

In the first case three or four men who broke into the fur store fired revolver shots at operatives of the Dominion Messenger and Signal Service who gave chase to them in an automobile but the bullets went wide.

Victories Over Microbes

(By Dominion News Service.) LONDON, July 10.—A triumphant series of victories over diseases once believed incurable have brought mankind's war on microbes into a new phase. The results of a great drive against cancer, consumption, paralysis, and epilepsy, waged silently by scientists in laboratories and clinics in every civilized country, are now becoming known.

Striking gains have been announced in the last few days. Dr. Georges Droyer, professor of pathology at Oxford, made the dramatic statement in a lecture at St. Mary's Hospital that he had developed and brought into action a weapon which strips the tuberculosis microbe of its armour. This weapon has been used in the London Hospital with great success.

Epilepsy—Its Cause and Treatment

The coming defeat of epilepsy, another "incurable" disease, is anticipated by other scientists who have worked on the theory that it is caused by the function failure of the parathyroid glands. It is now proved that these glands can be stimulated by the injection of an alkaline solution and by careful supervision of diet.

Science, mindful of the danger of raising unfounded hope has not made these announcements rashly. They are as carefully worded as a general's official statements during a war. Their significance to humanity is immeasurable. It is not long since consumption "cures" were promised only by quacks, who knew that they could not fulfil their promises. Today they are discussed by eminent men of science, who know what they are talking about.

Consumption—London Hospital Successes

Professor Georges Droyer made his announcement before an audience of his learned colleagues. He told them that he had discovered a way by which active microbes such as tuberculosis might be injected into the body of an individual, rendering him immune to the disease, or curing him if he were tubercular.

"Tubercular and certain other microbes are protected by a fatty substance so that the body has not hitherto been able to digest them. Injected dead, and has therefore not been able to produce the antibodies in the serum to fight the living microbes.

Professor Droyer treats the microbes with formalin and acetone, thus eliminating the fats and making it possible for the body tissues to absorb the germs and throw off the beneficent antibodies. The Cases of lupus have been healed by this treatment in the London Hospital, and good results have

Edinburgh. The medical world thanks to this drug, is satisfied that diabetes is no longer an incurable disease. Paresis.—New Curative Agent. Even paresis, a terrible scourge which paralyzes and kills hundreds of thousands of people every year, is less terrible today than it was only a few weeks ago. Science has discovered a new curative agent called trypanosol, of remarkable potency. A violent patient who destroyed furniture and had to be kept in bed with hot packs, resumed his trade of carpenter within three months after the beginning of his treatment with trypanosol. Another had the delusions of a madman. He was cured in four months. The war against paresis has been going on since 1919, but not until recently have scientists disclosed the extent of their victories. Smallpox.—A scourge no longer. The defeat of smallpox, typhoid fever, and many other diseases once dreaded are among recent victories of science. Once they were among the commonest diseases. Today they are so rare that a handful of cases is called an epidemic. This result has been achieved by vaccination and inoculation. At the same time Professor Wagner-Jurek, the eminent Austrian neurologist, has fought with paralysis, and his results were an

Public Now Prefers Vegetable Laxative
ANY FAMILY MAY TRY IT FREE
Thousands of parents are asking themselves, "Where can I find a trustworthy laxative that anyone in the family can use when constipated?"
Dr. Caldwell's Laxative Syrup Pepsin
table compound of Egyptian senna and pepsin with pleasant-tasting aromatics, and has been satisfactorily sold for 30 years. Unlike the harsher physics it does not produce a habit, and increased doses are not required; in fact, it so trains the stomach muscles that in time medicines of all kinds can be dispensed with.
Many take a teaspoonful of Syrup Pepsin once a week as a health safeguard. Others use it only when required, as, for example, Mrs. Jack Turtle of Cherry Valley, Ont., who finds it equally valuable for herself and the children, and Mr. H. S. McLaren of Montreal, Que., who uses it regularly. Try Dr. Caldwell's Laxative Syrup Pepsin in constipation, biliousness, piles, headaches, sallow complexion, and to break up fevers and colds. A generous-size bottle can be had at any drug store, and it costs less than a cent a dose!

Sugar-Crisp CORN FLAKES
Thin, tempting flakes of selected corn, sweet and crisp in flavor and texture—their wonderful appetizing qualities brought out by delicate toasting. A new, flavory food of satisfying goodness. Enjoy them. 12c. a package.
