WORLD CHAMPION HOCKEY TEAM HOME

MONTREAL, May 17.—The Winnipeg Falcons, amateur hockey champions of the world, arrived here on the steamer Gramplan. A reception committee including J. Merrick, chairman Olympic committee, Toronto; N. H. Crowe, secretary of the Amateur Athletic Union of Canada, and W. Northey Allan, cup trustee, went aboard and welcomed the team.

Today the team was dined at the Montreal Hunt Club and later entertained for Toronto.

BACCALAUREATE AT MOUNT ALLISON

SACKVILLE, N. B., May 16.—Closing exercises of Mount Allison are now in full swing. The attendance of visitors, which include nearly a hundred former students, is unusually large and shows the keen interest taken in Mount Al-

lison educational institutions. The weather today was beautiful and added much to the enjoyment of the day. Baccalaureate tonight was largely attended, and proved of unusual interest. An impressive address was delivered by Rev. Wm. Gifford, M. A., of Wesleyan Theological college, Montreal. Magnificent music was rendered by choral class under the direction of Prof. Noel Brunten, head of Mount Allison Conservatory of Music.

METALS AND THEIR USES—IRON.

The world's precious metals formerly applied to gold and silver almost exclusively, but in these modern days every metal is put to such good use that all of them may properly come under this head. From the standpoint of usefulness iron is the most important metal to be found under the crust of the earth.

Pure iron is a light gray color and is not found in natural formation. It is obtained by smelting the raw ore. On account of its weight the iron when melted runs to the bottom of the smelter. When enough has collected a plug is taken out and the red-hot metal flows out into steel molds or into a sandy place that has been furrowed off into molds. These form the iron when it cools into what are called "pigs." This pig iron, because it contains many impurities, is very brittle, so before it can be used for many purposes it has to be reheated. When it comes out of the furnace the second time it is known as wrought iron, which may be welded and molded into any shape desired. Years ago the principal use for wrought iron was in the making of stoves, but nowadays the cylinders of automobile engines require by far the larger amount, while its use has increased in the making of many other things that we use every day. Such small things as screws, different kinds of nails and ornamental iron

of this metal, are made in enormous quantities. It is worth noting that old metal, which we usually call scrap, can be melted again and thus become just as useful as it ever was. The world would soon be hard up for iron, as it is estimated that the known supply of raw ore would last less than one hundred years at the present rate of mining. For this reason there is much money being made in the collecting of scrap iron. A great disadvantage with iron, however, is that it rusts whenever exposed to dampness. Though the people of India at one time knew how to prevent this, the process has been lost.—Ex.

Protect the child from the ravages of worms by using Mother Graves' Worm Exterminator. It is a standard remedy, and years of use have enhanced its reputation.

HOW THE MONEY WENT

"Are you sending your wife to the seaside this summer?" Black asked his friend Green.
"No," he answered, "I can't afford it. It costs too much."
"But your wife's tastes are simple. Surely she can stay at the seaside without spending much money?"
"I know that all right," replied Green; "but last year, while she was away, I spent over fifty dollars a week!"

SPRING ADVENT

Winter now is slowly dying. Locks of hoar-frost, cold and grey, Wrap him in his icy mantle, Bear him to the North away.

Where the polar bear is sleeping Through the dreary Arctic night, And the Ice King ever reigneth "Neath the fitful northern light, Now his sweet and gentle daughter Comes with gladness in her train Meeting with her sunny glances All the terrors of his reign.

Dearest Maid, we long to greet thee Though thy glance is coy and shy, From the lap of Ancient Winter Stormy winds and chilly sky.

Naught can stay your winsome wooing, Nature wakes to life and glee; Birds and insects hail your advent Set from icy fetters free.

Bow we low, sweet Maid, before thee In thy early maiden reign And when grown to Summer's glory Sing with thee a glad refrain. —Robert Stark 123 Isabelle Street, Toronto.

POPULAR NOVELS A CENTURY AGO.

John Galt, who was born at Irvine in Ayrshire, on May 2, 1779, was a novelist whose writings perhaps are unduly neglected in these days. But his best work is of a high class character, and won for him a position at a time when Scott was still writing with little diminution of his power, although Galt removed to London in 1806, not without hope of distinguishing himself in literature, it was not until 1820 that he won his first real success with "The Ayrshire Legatees." By that time, of course, Scott had brought "Scotch novels" into fashion, and Galt probably benefited by what we should call the "boom" in them. At all events, he won a considerable public, which was led by the appearance of his masterpiece, "The Annals of the Parish," in 1821, to expect rather more from him than as it happened, he subsequently gave. He was a most unequal writer; and though at times he touched a high level, there are long and languid intervals. Still, there is plenty of interest in "The Provost" and "Sir Andrew Wylie," published in 1822. "The Entail," of 1824, and "Lawrie Todd," of 1830, after the last named, he produced no more novels; but he had done enough to show that he possessed a peculiar gift for the delineation of the life of small Scottish communities, a sphere in which he is not surpassed even by Scott. But though after 1830, he abandoned novel-writing, his "Autobiography" appeared in 1833 and his "Literary Life and Miscellanies" a year later. He died in 1839, and it is interesting to note, as a proof of his lasting quality, that an edition of his novel, in eight volumes came out as recently as 1895-6.

THE DIFFICULTY

"Do you think dearest, that you could manage on my salary?" the fond youth asked.
"Why, yes; I think I could, darling," the sweet girl responded; "but how in the world would you get along?"

ONE POINT OF ARGUMENT

"How unworthy I am of you dear," he murmured as he held her close.
"Oh, Fred," she sighed, "if you and father only agreed on everything the way you do on that, how happy we would be."

—Drives Asthma Like Magic. The immediate help from Dr. J. D. Kellogg's Asthma Remedy seems like magic. Nevertheless it is only a natural remedy used in a natural way. The smoke or vapor reaching the most remote passages of the affected tubes, brushes aside the trouble and opens a way for fresh air to enter. It is sold by dealers throughout the land.

—SERIOUS FIRE: The large dwelling house beyond the Eastern boundary of the town, owned by Mr. Arthur McEwen was burned to the ground on Monday night. Mr. McEwen and family had retired for the night when shortly before midnight, a hired man who slept over the kitchen, was awakened by the smell of smoke, and jumping out of a window succeeded in arousing Mr. McEwen and family, who had barely time to escape leaving behind most of their clothing. A call of help was rung to the town and firemen with many citizens promptly answered the call and succeeded in saving the bars and out houses and part of the furniture. The cause of the fire is supposed to be from the kitchen stove. The loss to Mr. McEwen is a heavy one, as it is understood he carried only a small insurance. H.

Summerside Fox Men Hold Meeting

A monster gathering of fox men of Summerside and surrounding districts assembled in the Town building last Saturday night to discuss the now famous fox tax and also to hear the report of the delegation sent to Charlottetown in the interests of this fox tax and their cool reception at the hands of the government. Mr. Neil McLeod was chairman for the evening. Messrs T. Carruthers, P.G. Clark and Ed. Manson the appointed delegation mentioned above each gave a clear and distinct account of the proceedings and protested very strongly against the treatment accorded them by Attorney General Johnston. Among other speakers were Messrs E. H. Raynor, Mr. N. McFarlane, Rev. Mr. Harding, Mayor Campbell, Lawyer Wyatt. Each one expressed their views of the tax and were very strongly opposed to the treatment received by the delegation. Messrs B. Gallant, A. C. Saunders and C. McArthur as representatives of the government were then called upon to give their views of the matter. Each one expressed their regret at the manner in which Mr. Johnston used the delegation but explained that his fit of temper was due to over train and hard work, being working night and day to arrange this tax suitable to the people and as to the tax itself they expressed that they were all open to criticism and any suggestion to the good of this fox tax would be gladly received by them and their assurance of the rest of the members.

They gave as their explanation for the levy of taxes for one thing the increase of teachers salaries the high cost of living and the enlarging of Falconwood Hospital, labour, etc. In the course of Mr. McArthur's speech, he gave great praise to Hon. A. E. Arsenault who he said was always the first at the House to take his chair every morning and doing all he could by his past experience in the House to help the Government along. A motion by Mr. E. H. Raynor, that the report of the committee be adopted but with a strong protest at the reception accorded the delegates by the government, seconded by Mr. N. McFarlane and unanimously supported. Another motion by Mr. E. H. Raynor that a committee of three members be appointed to wait on the government on the special tax on fox, seconded by Mr. Norman McLeod and unanimously supported.

Following are the committee appointed:—Mr. E. H. Raynor, Mr. P. G. Clark, Mr. E. W. Manson.

The meeting was then adjourned just as the clock was striking twelve.

DR. DE VAN'S FRENCH PILLS Reliable regulating Pill for Women. 25¢ a box. Sold at all Drug Stores, or mailed to any address on receipt of price. The Seabell Drug Co., St. Catharines, Ontario.

PHOSPHONOL FOR MEN Restores Vm and Vitality for Nerve and Brain; increases "gray matter." Tonic—will build you up. 25¢ a box, or two for 50¢ at drug stores, or by mail on receipt of price. The Seabell Drug Co., St. Catharines, Ontario.

Stone Churns

Very convenient. They are used to gather the cream as well as to churn it.

All sizes. 3 to 8 gallons.

KEEPING WELL SPRAY ED—MEANS—MORE MONEY HERE

Rapid Potato Spraying Outfit

P6870—This is a modern Spray Pump Outfit that will work rapidly and effectively. No expense has been spared in the construction of the pump: the inside cylinder is brass-lined with brass plunger piston rod and brass valve seat. Fitted in this way there can be no rust and you are sure of having a pump that will give satisfaction. It has a liquid agitator, keeping the fluid always mixed up, thus giving a strong evenly mixed spray. It is fitted with rubber hose connecting barrel with 1-4 inch spray pipe, fitted with twelve spray nozzels as cut, which spray both overhead and underneath plants saturating them with a finely diffused vapor shower, doing the work economically and thoroughly. The length of spray pipe is 8 3-4 feet, length of underneath spray pipe 13 inches. Lower sprays can be stopped by inserting thick cardboard, or similar substance, when the sprays are not required. The outfit includes a pump rubber connecting hose, spray pipe and spray nozzels as illustrated. Complete without barrel or cart. Freight paid. Price \$24.90

P678—Above outfit with 25 gallon barrel. Freight Paid. Price \$28.40

Orchard extension extra. (Write for prices.)
