### CROWDS THROG TO SEE THE FAMOUS AMHERST PIANOS

Hundreds of visitors to the Exhibition yesterday were attracted to the section devoted to musical instruments and the booth occupied by the Amherst piano company drew the great crowds.

Here was displayed the Cremona tone, the new player piano, that is winning praise for itself every day as the best player piano on the Canadian market. It is a faultless instrument—perfect in design, construction, finish, tone, action, scale and touch.

Besides the Cremona tone is shown three standard grades of the famous Amherst pianos. The rich, liquid tone and handsomely finished case of each captured the attention of all critics.

It is a fact that all provincialists should be proud of that such excellent pianos can be made so near to Charlottetown. They are made in Amherst—every part of them—by expert workmen and have shown in all tests to date that they are the equal in every way of any piano now before the public.

A cordial invitation is extended by Mr. McDonald, President of the company, to visit the Amherst booth today. You will find it at the extreme right on the ground floor of the building, near Miller Bros. display.
