The Green Cloak

(Continued)

He turned back to the telephone and called up police headquarters, attempted, rather, listen a moment to something that was being said to him, and then turned away with a very wry face.

"Well, our friend Wilkins is playing in luck all right," he said. "The local operator tells me that we have no outside connection at all. Both the telephone and the local station here of the Western Union are out of commission on account of this confounded sleet."

"Do you think she's with him?" Before he could answer, the telephone bell rang sharply, and the quickness with which he turned and snatched the receiver off the hook betrayed the tension of excitement under which he was laboring. "Been looking for me!" he exclaimed. "A man named Mallory! Well, why didn't you try these apartments sooner? Where is he now?"

"All right. Don't waste any more time." "That you, Mallory?"

"What's that you say? You've got the girl. Came back to her room, did she?"

"What's she like? Violent at all?"

"Well, wait a minute. Hold the wire. I'll tell you what to do with her." He turned round then, and began speaking rapidly to Doctor McAllister. "The girl went to her room and Mallory has got her. He says she's perfectly quiet, not violent at all, that is but she's taking on a great deal, protesting that her arrest must be a mistake. So it's clear she hasn't gone

LOVELY NEW RUGS FOR EVERY ROOM IN THE HOME

First Fan: What is winter? Second Fan: The intermission between seasons.

"What do you think is the most difficult thing to learn about running an automobile?" "How to sell it."

BLASTED HOPES

He married a girl who couldn't cook, and thus his hopes ran high: But, alas; she bought a recipe book And just began to try. Poor chap; She just began to try.

"Won't you consider becoming a life partner of mine?" "How much capital can you put in?"

"Here She Is," He Said Briefly. "Do You Want Me?"

off into one of those subjective states of hers. But what are we to do with her? Do you suppose she'd be of service to us in getting track of Wilkins? She'd probably take pretty good care not to get him into trouble, I suppose, if she suspected that we really wanted him.

"Tell him to bring her here," said my chief, his eyes shining with excitement. "We shall be able to use her, never fear. Yes, have Mallory bring her to this room."

Ashton hesitated for an instant. Then transmitted the message, word for word, to Mallory, and hung up the receiver.

"I don't quite see it," he went on thoughtfully. "Unless Wilkins took her into his confidence, she won't know anything about him. It he did, she'll be on her guard not to betray him, and a stupid, stubborn person like that something makes a lot of trouble."

The doctor's only reply was a comment, which sounded a little irrelevant.

"I told you, didn't I," said he, "that in her subjective states her whole system of sensory nerves seems to be abnormally stimulated, almost to a hysterical degree?"

I had it on my tongue to ask him what he meant, when the sound of footsteps approaching along the corridor, cut the question short. The next moment there was a tap on the door

the detective, Mallory, ushered Jane Perkins back into our sitting room. "Here she is," he said briefly "Do you want me?" "Yes," said the doctor; "sit down. You sit down, too, Perkins; here in the easy chair where you were before. No, my poor child, there's nothing to be frightened about. Don't cry. We're not going to hurt you." The perfect poise and balance of his own nerves gave him a tremen-

deus power of calming the nerves and quieting the fears of others. That single sentence, spoken in his calm resonant voice did more to reassure the girl than I could have done in an hour. "Now you're not afraid any more, Jane," he went on. "This little mirror, swinging so, makes you calm again, even makes you sleepy. You're going to sleep already. Your eyelids

are heavy. Your hands are heavy, too, and quite relaxed, just as they are when you go to sleep. You're asleep now; fast asleep." Once more, and only once, the doctor hummed the strange, droning tune of the death chant, and I saw, by the little shiver that went over the girl's body, that the transformation of her personality had already taken place. "Watch," said I to Ashton, "watch

the girl's face." "You've been showing me wondrous tonight," he said in a voice that I dulled with amazed bewilderment "but this is a wonder that out-does them all." All that was true, for there, under his eyes, he saw, reappearing in the body of this English chambermaid,
