TREE GROWING.

Forestry Branch will give Advice and Seed.

Why not grow your own maple and ash trees for yourself, if you want to make forest plantations, or even to plant shade trees? Anyone who has had any experience in gardening can do this without difficulty and the trees, when they come to be planted, will not have to meet the risk of a long journey by railway and possible delays which may injure, or even kill them. The Forestry Branch of the Department of the Interior will gladly give advice in the matter, and even send the seed free, as long as their supply holds out.

This recommendation is made in the annual report of the Superintendent of Forestry, which forms part of the annual report of the Department of the Interior, lately issued.

One caution must, however, be given. The seed used should always, if possible, be that taken from trees grown in the Canadian Northwest. Seed obtained from the eastern provinces of the Dominion, or even from the prairie states, cannot be depended on to produce good, hardy trees.

A recent experience of the Forestry Branch gives good evidence of this. In 1906 the crop of Manitoba maple seed was a failure throughout the Canadian prairie provinces. The supply of seed for sowing the following spring had to be obtained from Dakota, and this was duly sown in the spring of 1907.

Trees which sprang from this seed were sent out in the spring of 1908, and many reports have been subsequently received of these having been badly "winter-killed." In some cases the entire tree, roots and top, was killed during the severe weather;

Recipe for 16 Ounces of Cough Syrup

No Better Remedy at any Price. Fully Guaranteed.

Make a plain syrup by mixing two cups of granulated sugar and one cup of warm water and stir for two minutes. Put 2 1/2 ounces of pure Pinex (fifty cents' worth) in a 16 oz. bottle, and fill it up with the Sugar Syrup. This gives you a family supply of the best cough syrup at a saving of \$2. It never spoils. Take a teaspoonful every one, two or three hours.

The effectiveness of this simple remedy is surprising. It seems to take hold instantly, and will usually stop the most obstinate cough in 24 hours. It tones up the indolent appetite and is just laxative enough to be helpful in a cough, and has a pleasing taste. Also excellent for bronchial trouble, throat tickle, sore lungs and asthma, and an unequalled remedy for whooping cough.

This recipe for making cough remedy with Pinex and Sugar Syrup (or strained honey) is a prime favorite in thousands of homes in the United States and Canada. The plan has been imitated, though never successfully. If you try it, use only genuine Pinex, which is the most valuable concentrated compound of Norway white pine extract, and is rich in gualic acid and all the natural healing pine elements. Other preparations will not work in this recipe.

A guarantee of absolute satisfaction or money promptly refunded, goes with this recipe. Your druggist has Pinex or will get it for you. If not send to The Pinex Co., Toronto, Ont.

sometimes only the tops were killed.

Usual:

Usually the Manitoba maple has been found a hardy tree in almost every part of the West; that so many have died in this case is doubtless due to the fact that the seed from which they originated was obtained from regions farther south. Some years ago the Branch had a similar though not so disastrous, experience with elm seed obtained in the East.

Sometimes, of course, when the supply of Western seed fails, seed from the East must be used even with the accompanying risk of failure.

The work of the Branch in the free distribution of trees continues to develop. The number of trees sent out from the Indian Head nursery has for several years remained practically stationary at about two and a half million annually. The capacity of the nursery has been almost, if not quite, reached, and if trees are to be distributed in greater numbers either the present nursery must be enlarged or new one will have to be established.

The number of applications for trees has considerably increased, namely, from 2,010 in 1909 to 3,173 in 1910 (nearly 60 per cent.). At the same time the average number of trees to each applicant has had to be cut down; in 1908 the average number of trees sent to each was 1,400, but in 1910 only 800 could be sent to each applicant. In 1909 the number of new applications received was 2,235; in

1910 the number of these was 3,832.

Many other interesting facts regarding this and other aspects of the forestry work of the Dominion Forest Service are given in the report mentioned. Copies may be had free of charge on application to R. H. Camu bel, Superintendent of Forestry, Ottawa.

THE SQUARE CLUB.

It is hard to say what significance can be attached to the fact that boys who spend considerable time in athletics and in other forms of recreation are able to make an exceptionally fine showing in scholarship. It may be only a coincidence or it may be a natural tendency of the boys who lead in one thing to show the same qualities all through.

The Association has been often criticized by teachers of the High Schools as having a tendency to divert the minds of the scholars from study, and when it was proposed to organize a club within a Stratford, Ont., school under the auspices of the Association, it met with very little encouragement from the masters. The club was organized, however, and known as the "Square Club" carried on a course of study in Life Problems of High School Boys, at the same time standing for honesty in examinations, clean athletics and the all-around clean life. At the close of the season the two scholarships at the University of Toronto were won by two boys who were officers of the club and taking an active part in the athletics of the Association all the way through. The club bids fair to be in greater demand this year than last.

The Small Dealer and the Phone---

Are you satisfied with your present profits Mr. Small Dealer? Are you satisfied that you are getting as much business as can be secured in your district?

By installing a phone we are certain that you can greatly increase your business and make people the city over familiar with you and your goods. The phone will give you most of the advantages the large stores hold at present. It will keep you alive to market quotations, will enable you to keep fresh goods on your shelves at all times and to secure the best class of customers—the telephone users.

The phone in your store will give it the appearance of up-to-dateness and hustling activity that will turn the customers from rivaling stores to yours. "A phone means more business." Ask Contract Dept. to-day about the rates—they're low.
