The Maritime Winter Fair

THE MARITIME WINTER FAIR AT AMHERST, DEC. 10TH-13TH, 1923.

The Twentieth Maritime Winter Fair and Fat Stock Show will be held at Amherst on December 10th, 11th, 12th, and 13th, next. From the point of view of entries and special features, this year's Show will excel all its predecessors. A number of Nova Scotia's largest stock breeders, for example, who have not heretofore exhibited at Amherst, are entering the lists this year with many of their choicest animals. The one factor that remains for the people of the Maritimes to supply in order to make the Fair a magnificent all-round success is attendance. On this point expectations are also running high owing to a number of reasons.

Special Features

One of the most interesting and promising ventures of the Dominion Department of Agriculture by way of promotion in recent years is the organization of Boys' Heifer Clubs and of Boys' and Girls' Pig Clubs. These are now flourishing in various sections of the three provinces and their work called forth the unqualified admiration of the Federal Minister of Agriculture on his recent visit. These Clubs will exhibit in force. Stock Judging competitions among and between these Clubs will be one of the features of this year's Fair. In the bacon hog section alone, fourteen prizes are offered, ranging from \$12.00 up to \$25.00, open to teams from the Swine Clubs of Nova Scotia and New Brunswick. A fine list of prizes is also offered to members of Heifers Clubs for the judging of dairy cattle. Some of the people who will visit the Fair will doubtless do so in the Holiday spirit. Every effort is being put forth so that there may not be a dull moment for these. Arrangements are being made for entertainments of a lighter nature each evening.

Railway Fares

This year's railway fares are more favourable than for some time past. Excursion rates are being provided by all railways for the whole period of the Fair. Besides, one day excursions, extending where distance requires it into the next day, at lowest first class one way fare, plus 15%, have been provided. This special excursion is offered to cover roughly speaking the Counties of Westmoreland, N. B., Cumberland, Colchester and Pictou, N. S., and all points on the D. A. R. Full information may be obtained at any station. There is a possibility that this may be the last year for the Maritime Winter Fair to be held at Amherst. The Show had outgrown its present accommodations and the matter of providing up to date quarters is now before the city of Moncton. Plan to attend and thus encourage the improvement of live stock in these provinces. 11-27-11.

There is Much Anxiety Over Children's Colds

WE do not mind so much having colds ourselves, for we imagine we can tell when they are getting serious and apply the remedy. But when the children cough it is different. Especially does the sharp, metallic cough of croup send a thrill through the mother's nervous system. The trouble is the child does not realize the danger, can-

not describe the trouble, and all depends on the prompt action of his elders.

Why not be on the safe side by always keeping Dr. Chase's Syrup of Linseed and Turpentine on hand for use in case of emergency?

Croup and bad colds usually develop in the night, when it is not convenient to send for treatment, even if you are within reach of a drug store.

Being pleasant to the taste, gentle and soothing in action, and composed of simple ingredients of well-known medicinal value, this medicine is especially suited for children, as a relief from coughs, colds, croup, bronchitis, sore throat, whooping cough, etc.

In very many thousands of homes it is the old favorite treatment which has proven its exceptional value so many times that it is depended upon absolutely.

Next to knowing what to use, the most important point is to apply the treatment promptly, and this is why we emphasize the necessity of keeping Dr. Chase's Syrup of Linseed and Turpentine on hand at all times. For this reason it is well to get in the way of buying the large, family-size bottle. This ensures an adequate supply.
