

Dry, Hacking Cough Was Caused By A Bronchial Cold

Mrs. A. Primm, 36 Ingram St., Chatham, Ont., writes: "I am pleased to take this opportunity of telling you of my experience with

Dr. Wood's Norway Pine Syrup. "Early last winter I suffered from a severe bronchial cold that left me with a provoking, dry, hacking cough. After being bothered with it, both day and night, for some time I had a professional nurse recommend the above cough syrup which I took with wonderful results, and now, it is the only remedy I ever use for colds."

Price 35c a bottle; large family size 60c. at all druggists or dealers. Put up only The T. Millburn Co., Ltd., Toronto, Ont.

Mt. Stewart Notes

Winter gradually beginning to assert itself. The Hillsboro skinned across with ice up at the "S" and above the R. R. Thursday morning.

Mr. Peter Dwyer evidently contemplating "speed" this winter has given an order to Mr. Daniel Birt, Carrage-builder, to build him a sleigh to suit his requirements.

Mr. R. C. Clark having had one of his gas filling stations run into and injured by a car recently found it necessary to remove it to Charlottetown to have it repaired.

Miss Beattie McLeod, Teacher spent the week-end at her home in Valleyfield.

Mrs. George Clark spent Sunday in Charlottetown.

W.D. Gillis & Co. COAL PHONE 176. You not only want to be prepared against a cold winter, but also, you want your coal supply in before bad weather sets in. Be prudent and place your order now.

W.D. Gillis & Co. COAL PHONE 176. The many friends of Mrs. John Gallant (nee Mary Ellis) of East Royalty will be sorry to learn that she is seriously ill in the City Hospital. (Summerside papers please copy.)

CENTRAL ROYALTY—The Annual meeting of the Central Royalty Women's Institute was held in the school on Friday, November 23rd, with an attendance of seven members. Meeting opened by saying the creed. Minutes of October meeting and last annual meeting read and approved. The President then gave her report and the financial statement was read by the Secretary. The following officers were elected:—President, Mrs. Fred T. McRae; Vice President, Mrs. Corham Cook; Secretary and Treasurer, Miss Laura Cullen; Directors, Mrs. Henry Chowan, Mrs. Major McRae and Mrs. W. P. McLeod; Auditors, Mrs. Russel Roper; Mrs. Alex. Agnew. Delegates to Convention, Mrs. Major McRae, Mrs. Henry Chowan. Substitutes, Mrs. Cecil Wood, Mrs. W. B. McLeod; Entertainment Committee for next meeting and School Comm. were appointed. Roll call for next month "Payment of Dues." The meeting then closed. Mrs. Fred McRae kindly invited the members to her home for the December meeting.

The many friends of Mrs. John Gallant (nee Mary Ellis) of East Royalty will be sorry to learn that she is seriously ill in the City Hospital. (Summerside papers please copy.)

Livestock Market (Canadian Press). MONTREAL, Nov. 27.—There was 617 cattle, 155 sheep and lambs, 1479 hogs and 203 calves, for sale on the two markets and in addition several cars of cattle, held over from yesterday.

Cattle were slow, good steers on yesterday's market sold \$9.50 to \$9.50 and common light steers as low as \$6.50. Several lots of medium quality steers averaging close to \$10.00 were sold for \$8.00 to \$8.25. Cows were from \$5.00 to \$8.00, and canners and cutters from \$3.75 to \$4.75. Bulls brought from \$5.25 to \$6.50. The bulk of the grass calves brought \$6.50 with very thin ones as low as \$6.00. Medium quality veals sold for \$11.00 to \$12.50, with odd tops up to \$14.00. Lambs of good average quality were sold up to \$10.75, bucks included.

Good ewes and wethers were quoted up to \$11.00, cull as low as \$8.00, sheep from \$3.50 to \$6.00, hogs were easier, \$10.00 was the ruling price for hogs of good weight fed and watered with occasional sales up to \$10.25. Sows were from \$7.50 to \$8.50.

Splendid Recipe To Stop A Cough That "Hangs On"

The best cough remedy that money could buy, can easily be made at home. It saves money and gives you the most reliable, quick-acting medicine you ever used. The way it takes hold of stubborn coughs and chest colds, giving instant relief, is truly wonderful.

Any druggist can supply you with 2½ ounces of Pinex. Pour this into a 16 oz. bottle, and fill up with plain granulated sugar syrup or strained honey. It's no trouble at all to mix, and when you once use it, you will never be without it. Keeps perfectly and tastes good—children really like it.

It is surprising how quickly this home-made remedy loosens the germ-laden phlegm, and soothes and heals the inflamed membranes. At the same time, it is absorbed into the blood, where it acts directly on the bronchial tubes, and helps the system throw off the whole trouble. Even those severe coughs which usually follow the "flu," are promptly ended.

Pinex is a highly concentrated compound of genuine Norway Pine, containing the active agent of creosote, in refined, reliable form. Nothing known in medicine is more helpful in cases of severe coughs, chest colds and bronchial troubles.

Do not accept substitutes for Pinex. It is guaranteed to give prompt relief or money refunded.

The Daily Argument

AUNT HET BY ROBERT QUILLEN

"Ever" woman has days when she's tired and thinks maybe she might do better if she had the courage to wait instead of marryin' when she did."

POOR PA

"I don't know whether Beula married for money or not, but ever since her husband lost his fortune she's acted like she was a widow."

IN MEMORIAM

MISS ELLA MACNEILL. At Lyndale P. E. I. on November 10th, 1928 there passed to her eternal reward Miss Ella MacNeill aged 37 years and six months. She had been a patient suffering for 50 twenty three years having developed spinal trouble at the early age of 14 years, and although every thing possible was done for her, she remained an invalid.

Her death will be keenly felt by her many friends and relatives in this province and elsewhere. Correspondence was one of her great delights, and by it she entered many homes and hearts with messages of cheer, comfort, and Christian joy. She also composed poems of some merit, one of which appears elsewhere. It can truly be said of her that she set her affection on the things above and radiated to those about her the light of God's glory that shone within her heart.

She leaves to mourn her father and mother, Mr. and Mrs. Murdoch MacNeill of Little Sands; two brothers, Silas of California, U. S. A. and Edith at home; also two sisters, Edith, graduate nurse of New York, and Mrs. R. C. MacLeod of Lyndale, P. E. Island, at whose home she passed away, and who tenderly cared for her at the last.

The remains were taken to the home at Little Sands by train, and on Tuesday 13th were laid to rest in the family plot in the Little Sands Cemetery beside those of her two sisters who pre-deceased her some years.

The funeral was large. The services were conducted by her pastor Rev. Ewen MacDougall who spoke feelingly of the happy Christian influence Ella had upon all with whom she came in contact, and while he thus spoke of her he exhorted those present to give the glory and praise to God who in Christ had wrought such a blessedness within the soul of their beloved friend.

The pall-bearers were John MacDonald, Malcolm MacPherson, Colin H. MacNeill, Archie Munn, and George Blue.

THE HOME ABOVE

The following beautiful lines were dictated by The late Ella MacNeill not long before her death. (Air, "Bonnie Scotland").

There's a fair bright land In my dreams I see 'Tis a happy land From all sorrows freed, There is no desert dread, There is no unfruitful valley, Land of beauty, There I long to be.

Chorus: Brightest, fairest, cheerful, happy Land of love, Oh! the days oft seem so dreary, I grow weary, For that home above.

There are fragrant flowers, There are fruitful trees, There is no sin can come, There is no disease, There is no night there, Just one long and pleasant Sabbath, Never ending, There is perfect peace.

Chorus, Brightest, fairest, etc.

There is music sweet, Saints and angels sing, Sweetest songs of praise, To our Heavenly King, Oh my heart is glad, For I'm on my journey thither, He who leads me, Safe we there will bring.

Chorus, Brightest, fairest, etc.

Loved ones gather there They are happy and free, And I fancy oft They are beckoning me, Then I long for wings, Like the dove seeks her hiding, Scaring swiftly, Soon at rest I'd be.

Chorus! Brightest, fairest, etc.

There is One above all Whom I long to see, And though now by faith He is near to me, When faith turned to sight shall be, When His beauty, Whom to face I'll see.

Chorus, Brightest, fairest, etc.

Oh! the time draweth nigh, When my dreams shall come true, When to this low world I may bid adieu, This hope cheers me now As I travel on my journey, Though but dimly, This fair land I view.

Chorus, Brightest, fairest, etc.

And the loved ones I leave Soon shall join me there, They will pray for me, Oh! let friends not mourn When they see my soul departing, For with Jesus I shall know no fear.

Chorus, Brightest, fairest, etc.

Ella MacNeill, Little Sands, P. E. I.

Welcome to New Clergyman

On Wednesday evening the 7th inst. the parishioners of St. John's Church, Crapaud, met together in the rectory for the purpose of welcoming the Rev. Edward R. G. Bridgewater and Mrs. Bridgewater to the parish of Crapaud; and although the evening was cold and blustery, a large number of the parishioners were present, and after enjoying themselves in games and social chat for a short time, the meeting was called to order, and the senior warden, Mr. Crisp Moore was appointed chairman, and after a few appropriate remarks on the happy occasion, the chairman called on the vestry-clerk to read, an address of welcome to the Rev. E. R. G. Bridgewater, and Mrs. Bridgewater. Following is the address:

To the Rev. Edward R. G. Bridgewater and Mrs. Bridgewater: In the event of your coming to take charge of the Parish of Crapaud, we feel that a new chapter is being opened up in the history of this historic old parish—on this occasion, we, the parishioners of "St. John's Church" Crapaud, have assembled together this evening in the rectory of the said church, for the purpose of bidding you a hearty welcome as our rector-elect.

We know that it is now too late in the year for you to see our Island Province in all its beauty, as the season has now arrived "When bleak November's surly blast lays fields and forests bare," yet we hope that you and Mrs. Bridgewater will receive such a warm reception from each and everyone of your parishioners that you will forget all about the inconvenience caused by the cold weather.

We fully realize that the work you are taking up is no sinecure; for to undertake the Rectory of the parishes of Crapaud and Springfield means plenty of work; and then on the other hand, we think that we are quite safe in saying, that you will find the parishioners of Crapaud loyal to their beloved church, loyal to their Rector, and thoroughly united in everything in connection with the church; there may be some slight difference of opinion among the parishioners on some occasions, but these differences never amount to anything, as we have learned by experience that if we are going to accomplish anything worth while, we must be united, and therefore no acrimonious feelings ever exist between the members of St. John's Church.

We are glad to have you and Mrs. Bridgewater domiciled in the old rectory as this building seems to us as "Holy Ground," for it has been the home of many saintly men in the past years, and it is the sin-cere wish of those present that the Great Supreme Ruler of the Universe will give you grace and strength to carry on the work in

KOLSTER RADIO. Outstanding value! Listen to the Kolster Radio... thrill to the pulsing throb of a famous dance band in a far-away city... glory in the swelling notes of an inspired symphony orchestra or a great singer or speaker... then pick another broadcast—and still another. Each will be clear—living—real. With Kolster you choose your own entertainment—and vary it at will. Every Kolster owner is a Kolster booster. Try Kolster. You'll buy it.

UNCLE RAY'S CORNER

LITTLE TRIPS INTO SCIENCE VIII WAVES OF SOUND

How are you able to hear a sound? By means of your ears, you say, and that is true; but how does the sound reach your ears? It starts some distance away, yet it reaches your brain without being seen or touched or smelt.

Sound comes to us by means of waves. The waves are very much like the ripples set up when you drop a stone into a quiet pool. The ripples travel outward farther and farther.

Sound travels through the air at the rate of one mile in about five seconds. When the weather is warm, it travels a little faster; but five seconds is a good average to remember for the air. You can tell how far away lightning is striking when you hold a watch and see how many seconds pass between the flash and the thunder. If it takes ten seconds to hear the thunder, it means that the lightning is striking two miles away.

Sound will travel through water, you may test this out by listening while you "duck" when in swimming. Tests show that sound travels much faster through the water than through the air—almost a mile a second.

Even faster does sound travel through steel—about two and a half miles a second. Some persons put their ears to a railroad track, and hear trains which are miles away; but railroad tracks are good places to stay away from.

Sound comes by telephone and radio thousands of miles in less than a second; but then it is carried by electric waves through the ether, not by air waves.

Uncle Ray Tomorrow—The Radiometer

WATER. A second lot of roots should be brought in when the first pulling has been removed from the previous roots. Five roots properly handled should produce about sixty pounds of a marketable product. When the fourth pulling has been removed, it is a good plan to place the roots out-of-doors again and allow them to freeze. These roots can be planted out in the spring in good soil to recuperate.

The first civil airplane to be registered under the Irish Free State Government has been registered by Colonel Fitzmaurice, the Irishman who flew the Atlantic.

Two views of a sound wave. (From electric spark photographs.)

In the same way, we may say that there are "ripples" which travel through the air, starting at the point where the sound is made. The closer we are, the better we hear the sound (I am not counting radios or loudspeakers.) Scientists have known about sound waves for a long while; and in recent times, they have been able to

brought in and placed on the cellar floor adjacent to the furnace. Sand, earth or cinders should be piled around the roots to maintain an even moisture supply. At intervals of a week or ten days, it may be found necessary to apply water to the soil much. It is unnecessary to apply fertilizer of any kind since the fleshy root-stalks have sufficient plant food stored up in them to produce at least four good pullings.

Under proper conditions, the first pullings should be ready in about four weeks from the time the roots have been placed in the cellar. To maintain the supply throughout the

celar during the winter months is one of the easiest and simplest of under takings. Strong, healthy roots that are at least two years old from seed, or old crowns will give very satisfactory results. These should be dug up late in the autumn or just before the ground freezes up for winter. Allow as much earth to adhere to the roots as possible, allowing them to remain on the surface of the ground until the soil and roots have been frozen through. Freezing is essential to good forcing as it has been found by experiment that roots that were not frozen before being placed in the cellar did not do so well as those that had been frozen. A dark cellar where the temperature can be maintained around 55 F. to 65 F. will be quite satisfactory. The frozen roots and soil should be

CELLAR FORCING OF RHUBARB (Experimental Farm Notes.)

To successfully force rhubarb in the cellar during the winter months is one of the easiest and simplest of under takings. Strong, healthy roots that are at least two years old from seed, or old crowns will give very satisfactory results. These should be dug up late in the autumn or just before the ground freezes up for winter.
