**FACTORY MIXED FERTILIZERS** Experience has shown that larger and more uniform yields can be produced by using Factory Mixed Fertilizers, which increased yields pay many times over for the additional cost of the Mixed Fertilizers are compared with the cost of straight Chemicals which are mixed at home. The percentage of farmers who have gone back to mixing their own Chemicals after having used Mixed Fertilizers is practically negligible, which is surely sufficient proof that there must be something to the argument that Factory Mixed Fertilizers are BETTER and worth the additional cost. When we advocate the use of Mixed Fertilizers we feel we are working in the interests of the farmers, otherwise we could not recommend them as the success of the farmers on Prince Edward Island means our success. After making allowance for plant overhead, interest on our investment, and additional labor involved, our net profit on Mixed Fertilizers is practically the same as our net profit on straight Chemicals. You will see, therefore, that it is not with the idea of material gain that we strongly recommend every farmer on Prince Edward Island who is not already using Mixed Fertilizers to try them out this year. **The HARRIS ABA TOIR CO., Limited** Distributors For **THE ONTARIO FERTILIZERS, LTD.** Saint John, N.
