

To the Policyholders of THE DOMINION LIFE ASSURANCE COMPANY

The 46th Annual Statement of your Company demonstrates conclusively that times are improving. The Dominion Life has shown excellent progress, and it is with gratification that your Directors give you their summary up of 1934. A complete copy of the Annual Report will be mailed on request.

- Assets during 1934 • Increased by nearly two and a half million dollars (And now total \$28,857,019)
Policy and Annuity Reserves during 1934 • Increased by nearly two million, two hundred thousand dollars (And now total \$24,097,157)
Payments to Policyholders and Beneficiaries during 1934 • Over two million, nine hundred thousand dollars
Insurance in Force in 1934 Increased by over five million, one hundred thousand dollars (And now total \$150,221,793)
Insurance Issued and Revived in 1934 • Increased by over two million, eight hundred thousand dollars (The total for the year being \$23,974,559)
Excess of Receipts Over Disbursements in 1934 Increased by nearly one million, six hundred and fifty thousand dollars (To make a total of \$2,749,131)
Total Income in 1934 • Increased over one million dollars (A total for the year of \$7,277,030)

During the past five years the Dominion Life has paid to policyholders and beneficiaries more than Fifteen Million Dollars. (75% to living policyholders; 25% to beneficiaries under death claims.)

Annual Meeting Holstein-Friesian Association

TORONTO, Feb. 5.—The 32nd annual meeting of the Holstein-Friesian Association of Canada, held in the Royal York Hotel yesterday, was featured with reports presented by officers and committees which showed that the organization had a profitable year's business in 1934. Its strength and flourishing condition was revealed in the financial statement of the treasury department which gave total net assets as amounting to \$44,937.00. The year's receipts from all sources totalled \$21,177.75, expenditures (including depreciation reserve of \$3,213.00) amounted to \$56,939.00 with an operating surplus of \$4,474.00.

The recording office reported 21,226 registrations, 15,434 transfers, and a membership of 4,475. The Extension department accounted for 2534 Record of Performance certificates issued, 4066 head of Holstein cattle sold for export to British and foreign countries, 324 herds accepted for accreditation, 381 herds federally tested for Bang's Disease, five County Herd Surveys conducted, a number of herd sire demonstrations held and a training course for Judges promoted.

In grants to fairs the Association paid \$8,026.00, and to Breeders' Clubs, \$1,643.00. In his presidential address, W.L. Carr, of Huntington, Que. said in part "the difficult times through which we have been passing have been fruitful at least one notable result. The importance of agriculture in our economic structure has been realized by all classes of people. Farm buying power has become the topic of bank presidents at annual business and luncheon men in their clubs. Our Governments are willing to pass legislation demanded by producers in an effort to solve their marketing problems. Canadian dairymen have been active in this connection and have succeeded in having dairy control boards established in most of the provinces. Most of all, the Dominion Marketing Act provides a means by which the producers of any natural product may control the production and marketing of that commodity under whatever scheme they think will insure them reasonable returns.

You will be interested to know that such a scheme has been prepared to regulate the production and marketing of "dairy products produced in Canada and offered for sale." This is especially interesting to us as breeders of the cow that produces more than half of those dairy products. We are glad to hear that it is progressing favorably under his serious attention.

As Canadians we have often been reminded during the past few years that our conditions are appreciably better than those enjoyed by the citizens of any other country. The dairymen of the day, notwithstanding their extensive co-operative organizations complain that the competition of Canada and New Zealand on the world market is ruining them. The dairymen in their natural advantage are reported to be in desperate straits under present prices. Such world-wide unsatisfactory conditions suggest that in addition to national and provincial action, something must be done to establish an international board for the control and regulation of the world market for dairy products.

CARNIVAL

Carnival at Mt. Herbert link on Saturday night last called forth a large crowd of spectators, an excellent sheet of ice, snappy music, attractive costumes, contributed to make this one of the most successful of the season to date, and the management are to be heartily congratulated for the success of their enterprise, after prizes were awarded. The masqueraders were joined by the spectators and a most enjoyable skate followed.

Skaters in costume.— Little Miss Florence Jenkins— Princess Elizabeth.

Elizabeth Jenkins— Sailor. Vivian Munn— Old Lady. Muriel Munn— Highway bandit. Gordon Carver— Nigger wench. Mrs. Parker Ings— Black crow. Vernon Driscoll— Negro. Clarence Condy— Negro. Eileen Ings— Czech-Slovakian girl. Mrs. Lester Rankin— Lavender Lady.

Mrs. Ray Atherton— Bakers Cocoa. Arthur Weymouth— Aunt Jemina. Buddy Ings— Rug Man. Miriam Ings— Mr. Fat. Bruce Judson— Mountie. Marion Wood— Clown. Edna Powell— King's Jester. Joan Harding— Mistress Bar 1 Ranch. Clarence Maxwell— Clown. Lois Jones— 1935. Vimy Jones— English Riding Habit.

K. Mills— Ghost. Jack Stockman— Robin Hood. Freddy Mutch— Japanese boy. David Mutch— Peanut. Marion Rayner— Petty Naval Officer. Inel Ings— Mexican Senorita. Prizes won by the following: Fancy dress. Ladies first— Isabell Ings. Ladies second— Vimy Jones. Most original. 1st— Mrs. Parker Ings. 2nd— B. Atherton. Gentleman's Fancy dress. 1st— John Stockman. 2nd— Bruce Judson. Most original. 1st— Vernon Driscoll. 2nd— Gordon Carver. Children. Girls 1st— Little Miss Florence Jenkins. Boys 1st— David Mutch. 2nd— Buddy Ings.

Judges: Miss Fisher, Messrs Harley White and Wendall Mutch.

Fish to Relieve Drought Aftermath

FISH AND SEA FOOD INSTITUTE ANNOUNCED AT LUNCHEON, PLEDGES OCEAN'S WEALTH TO COMBAT MEAT SCARCITY.

The fishing industries of the United States pledge themselves to help relieve conditions brought about by the high price and scarcity of meat due to lack of summer drought by supplying the American people with fish and sea food at low prices. There will never be a drought in the ocean.

This was the keynote of a luncheon held Tuesday, at the Sherry-Netherland, 59th Street and Fifth Avenue, New York, N. Y., to inaugurate the Fish and Sea Food Institute of the United States, at which Mr. William Fellows Morgan, Jr., Commissioner, Department of Public Markets, Weights and Measures, City of New York, stated that the price of hogs had reached 94¢ of the November 1928 level while all the fish landed at the principal ports of New England, according to the U. S. Bureau of Fisheries figures for November 1934 were 50% of the price for the same month in 1928.

The Fish and Sea Food Institute of the United States was founded to promote a better understanding of the advantages of fish and sea food, emphasizing its economy, food value and taste. Speakers at the luncheon, in addition to Mr. Morgan, were: Hadden F. Taylor, a director of the Fish and Sea Food Institute of the United States; Agnes I. Webster, home economist, United States Bureau of Fisheries; and George F. Brant, President, Society for the Advancement of Better Living.

According to Miss Webster, the art of cooking fish will be altered on the basis of scientific facts newly uncovered. Because fish are regularly produced in cold temperatures, in cooking fish it should be borne in mind that the flesh of fish begins to coagulate, that is, cook, at eighty-two degrees Fahrenheit. Meat begins to cook at around one hundred and fifty degrees Fahrenheit, and is cooked, in other words, is cooked, at a higher temperature. The menu at the luncheon, consisting of 8 courses of fish, included: Oysters Bourguignonne, Bouillabaisse, Bisque of Clams, Sea Food Pot Pie New England Style, Lobster Ravigole, Planked Shad and Roe Cape May, and Bœuf Soufflé Bonne Femme.

The Institute announced the following nine points regarding fish and sea food: 1. One hundred and sixty-two different species of fish and shell fish are regularly produced in the United States. This number exceeds in variety all other kinds of foods taken together—all meats, poultry, game, vegetables, grains, tubers, seeds, melons, fruits, berries, and nuts. No other class of food compares with fish and sea food in their possibilities of variety for the epicure.

2. The ocean contains a uniform and invariable solution of all the chemical elements necessary for life. In it there can never be any deficiency of any substance necessary for perfect chemical balance in the diet. 3. Substantially all of the world's supply of iodine is in the ocean. Fish are practically the only source of vitamin D.

4. Calcium or lime is regarded by biochemists as an element generally lacking in the American diet. Most fish and shellfish are exceptionally rich in lime. Most fishes contain several times as much lime as meat contains, and in the body of every shellfish is an abundance of lime on its way to the growing shell. 5. Fish do not have to support their body weight. They are buoyed up in water in which they swim. They do not need a heavy frame of bone, ligaments and sinews and strong muscles to support them. Of all flesh foods, they are most delicate and easily digested.

6. Of all animals, fish and shell fish, being cold blooded, are by far the most efficient converters of their food into human food; they absorb animal wastes and dispose of all flesh foods, they are most delicate and easily digested. 7. Fish do not have to support their bodies warm, and only one-fourth is available to support their activities and provide for growth. All of a fish's food goes to support activities and for growth.

8. It is officially estimated by the U. S. Department of Agriculture that for the coming year, meals will be short of last year's supply by at least twenty-one pounds per capita, because of the drought last summer. This shortage is expected to continue and prices are expected to be high for at least two years. As yet, no drought has been reported in the ocean, lakes and rivers, and none is expected. The fisheries industries are prepared to augment the food supply of the nation with fish and sea foods of conspicuous nutritive value, and definite appeal to the taste and pocketbook.

"MARIE W. M. S.—The annual meeting and mite-box opening of Marie W. M. S. was held at the home of the President, Mrs. K. A. Webster, on Monday afternoon, January 7, 1935. After devotional exercises, led by the President, the business of the meeting was transacted. The mite boxes were opened and contained a very creditable amount for this small society, which with other collections including its quarterly offerings, made up its allocation for the past year. The next order of business was appointment of officers for the ensuing year, which are as follows: President, Mrs. Herbert Hooper; Vice-president, Mrs. J. E. Dingwell; Treasurer, Mrs. Russell Webster (re-appointed); Secretary, Mrs. W. F. Bowley, (re-appointed). It was with much regret that the members accepted the resignation of their President, Mrs. K. A. Webster, who for twenty-one years acted in that capacity, and through whose great interest and devotion much of the success of the Society was due. Too much cannot be said of the splendid way in which she carried on her work with the members, and of the unanimous, Christ-like spirit she always displayed, which shall always be an inspiration to those who were associated with her. Mrs. Webster was appointed Honorary President of the Society, and it is the sincere prayer of her sister members, that she may still be spared for many more years to carry on her work for the Master, in Marie W. M. S.

ties and for growth.

7. Except for inland streams and lakes, fish are international and are the property of no person, state or nation until they are caught. Whatever is taken out of the ocean is not addition to the wealth of our country and depletes no reserve of any natural resource. 8. The United States is one of the three greatest producers of fish and sea foods in the world. The other two are Great Britain and Japan. This country produces about three billion pounds annually. The fish industry supports a quarter of a million workers in production, and with their families, over a million. If the distributors and manufacturers are included, the number is greatly increased. The value of the annual production is three hundred million dollars.

9. It is officially estimated by the U. S. Department of Agriculture that for the coming year, meals will be short of last year's supply by at least twenty-one pounds per capita, because of the drought last summer. This shortage is expected to continue and prices are expected to be high for at least two years. As yet, no drought has been reported in the ocean, lakes and rivers, and none is expected. The fisheries industries are prepared to augment the food supply of the nation with fish and sea foods of conspicuous nutritive value, and definite appeal to the taste and pocketbook.

Messrs Claude and Roy Somers Wood Islands, were recent visitors to Pleasant Valley visiting their mother.

The many friends of Mr. John T. MacLeod, Bradalbar, are glad to hear he is progressing favorably under his serious attention.

Miss Dorothy Newsome, Westmoreland, is visiting relatives and friends in Fredericton and vicinity.

Mr. James E. Somers has returned home after his well earned holiday visit to Wood Islands.

Fredricton is a thriving centre and is well equipped to administer to the needs of its citizens, as well as those of the surrounding districts. It might be well to write a word of appreciation and encouragement to those who are endeavoring to aid the common good. Rev. Mr. Quilley, New Glasgow, past of the Christian Church, who gives us some very inspiring sermons also Mr. Wain's, pastor of the United Church, Pleasant Valley, who gives us some very neat sermons.

Our stockkeeper Aubrey Outcliffe and his capable clerk Miss Ethel Outcliffe are kept busy attending to the wants of their customers.

Our meat shop operated by Kanud Jergensen presents a sanitary and inviting appearance.

Mr. John Cutcliffe is our obliging and efficient station agent. Mr. Howard Vrecko is the accommodating and responsible postmaster.

Our saw and grist mill is carefully operated by Leslie Weeks, Elliotts, representing the following trades are the following: Blacksmith and wood work shop Mr. Roy Bruce. Garage, where the public receive prompt and efficient service by Eldred Weeks. Barbe shop Howard Ruckham. Now my dear readers this is just a brief note of the activities within the village of Fredericton, Adieu.

What next? Canary breeders are finding that they must modernize their ways if they are to compete with radio dealers. The president of the Chicago Cage Bird Club reports that canary buyers are demanding louder, more staccato song, after the trend of modern jazz. Consequently breeders are crossing roller canaries with "choppers" in an attempt to achieve the desired effect. Pretty soon the lovely song of a canary will be an old-fashioned as a last year's gramophone record. We are definitely not wishing them luck in their efforts.
