

HERE'S HOW YOU CAN

Can Obtain Funds For Beautifying Home

Did you ever look at your house as you approach it and think it looked dispirited and dejected? Remember how a facial or a wave will raise your own morale and let the house profit accordingly.

You may obtain modernization funds from any Canadian bank under the Home Improvement Plan for the necessary beauty treatment for your house.

The entrance to a house may often change the entire character of the building. A sheltered entrance is a convenience in bad weather for the guest who is waiting for the door to be opened and it also prevents the rain from beating in.

This Is Time For Roof Job

No other item in construction offers a wider range of materials than the roof of a house. Most frequently encountered types are of paper, impregnated; slate covered shingles in strip or in single units; wood shingles, composition shingles, cement tiles, terra-cotta tiles, metal shingles, sheet metal and slate.

In building a new house, the type of covering is selected and the roof structure built accordingly. A deck or sheathing is usually required. To this is fastened the covering, but in some sections, particularly those near the set, it may be advisable to lay wood shingles over shingle lath. The underside of the shingles needs to "breathe" on account of the excess

moisture in the air, or it may rot quickly.

With all types, save the paper and wood shingles, heavy roof felt should be placed over the decking before covering is put on. When a roof is renewed the matter of weight of the material selected must be given careful study. If the old roof is of wood shingles it is often possible to cover it without removing the old shingles, if a heavy material, such as slate is used if it will carry the additional weight in safety.

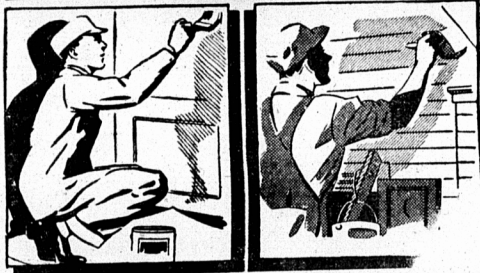

If you do a lot of sewing handy to have a sewing apron fitted with pockets for marking chalk, spoons, scissors and tape.

Stains should be removed from clothes before they are washed with soap, as the soap may set the stain.

Does this mean extra expense on your part? Will it increase your taxes, or mean special assessments?

Consider the Lot

With those questions answered, and others of a similar nature which they may suggest, consider the particular lot itself.

Privacy, light, space and quiet are probably important to you. The size, shape and position of the lot may determine whether you will enjoy these advantages.

For detached dwellings of modest size, lots should be not less than 40 feet in width. A narrow lot which may appear satisfactory before adjoining lots are occupied by houses will not ensure you adequate light and privacy if your home has many side windows.

Depth of the lot ordinarily should be not less than 100 feet.

A marshy lot or one on which water is standing is likely to mean a considerable expenditure on a drainage system.

Drawings showing the proper method of application.

Implicitly In Your Livingroom

A living room which combines utility and comfort is the aim of every housewife. Simplicity is the keynote. Thousands of housewives throughout the country have found that they may acquire backgrounds for such rooms through the aid of the Dominion Government sponsored Home Improvement Plan.

This plan provides for additions, alterations, repairs to or improvement of homes and for the purchase and installation of certain types of equipment.

The housewife completely transformed her living room by a few simple changes. First of all, a rug which led into another room which was seldom used was placed into a bookcase to balance a window on the other side of the room. Windows and bookcases were finished with wide white mouldings. The woodwork in the room was white.

The ceiling was rather low, so walls were finished in a solid color as the walls, but in a considerably lighter shade. A border much like the kind which is used to hang in all papered rooms, was placed about six inches from the baseboard, relieving the plainness of the walls.

A modern fireplace was acquired simply by removing the mantel which had adorned it formerly and acting as a catch-all for the daily knick-knack. White venetian blinds were hung at the windows.

With this background the housewife made a few changes in the room's furnishings from her own funds and the result was an extremely livable apartment. A deep red carpet was purchased to contrast with the pale green walls.

Old spoons can be used as knobs for a cupboard door. Cut the edge of one end and fasten to the door with a small bolt. When these are enameled over they look quite nice.

YOUR HOME and PROPERTY UNDER THE HOME IMPROVEMENT PLAN

The Boy's Room

Don't try to "pretty up" the boy's room and make him feel like a sissy every time he enters it. If you have a yen to do it over, let it be mainly in decoration and not in daintiness. Glazed chintz draperies can be used with plain curtains and pictures can stress dogs, horses, the sea and other points of interest to a boy. The bed spread may be attractive and yet washable so he does not feel it a crime to lie down on it if he so desires.

Millwork Should Be Under Cover

If you are having a house built be certain that all millwork was delivered to the building site and protected from the weather. Many times window and door frames are left exposed to the elements awaiting the time when they are to be placed over the millwork.

When practical, the door and window frames should be given a coat of paint before delivery to the job.

Arranged for that NEW BATHROOM yet?
