

McADOO EXCITED

Over the Displaying of a Flag

IN HONOR OF INGERSOLL

Rev. Theodore Banks Attempts to Tear Down the Flag—Met a Gun.

McADOO, Pa., Aug. 3.—The town of Glen City yesterday was the scene of wild excitement, caused by a mob, attacking the house of James Paige. The trouble dates from the death of Robert G. Ingersoll, whose idea, Paige wished to honor by displaying a flag at half-mast on the village flagpole. Since the death of the great agnostic, discussions concerning a supreme Being have been constantly in progress in the mountain towns.

Last Sunday the Rev. Theodore Banks visited this place and excited the people by denouncing agnostics and atheists in general, and Paige in particular, who, he declared, was possessed of the devil. He said it was a sacrilege to use the American flag to symbolize un-Christian notions, and expressed his intention either to tear down the flag or to float it from the top of the pole. When he attempted to carry out his threat Paige met him with a gun.

On Tuesday evening a crowd of villagers collected at the company store, and after discussing the flag matter, were worked up by the parson. They started for Paige's house, broke down the flagpole and smashed doors and windows, and would have handled Paige roughly had not some of his sympathizers held him away.

Sores Serious In Summer.

In the hot weather it is difficult to keep sores sweet and clean.

Any nurse will tell you the care that has to be taken to keep the process of decay within bounds.

But why have festering, ill smelling, health destroying sores?

Burdock Blood Bitters can heal them even when of long standing.

Bathe the sore with B.B.B. and it keeps it thoroughly cleansed and free from odor. Take the B.B.B. internally and it removes the impurities from the blood that cause the trouble and starts the growth of healthy flesh.

Mr. B. M. Bowler, Cambridge, Kings Co., N.S., says: "Some three years ago I was troubled with a running sore in my ear, for which I tried all kinds of doctors, but could not get cured. I was recommended to try Burdock Blood Bitters, which I did, and the sore was completely healed and has never bothered me since."

Mr. B. M. Bowler, Cambridge, Kings Co., N.S., says: "Some three years ago I was troubled with a running sore in my ear, for which I tried all kinds of doctors, but could not get cured. Summer School of Science.

Monday was the day devoted to visiting the local industries, the chief of which is the lumber industry. The visit to Shives' Mills will be long remembered by those favored to take it. In the evening the school was entertained and instructed by a lecture from Mrs. Travis of Hampton, N. B., on astronomy. The history of the development of astronomy with a racy sketch of the chief astronomers was given.

Tuesday the day for the excursion up the Metapedia was anxiously looked for and the prospect of a fine day was held with delight. Up the valley of the Metapedia, through scenery unsurpassed in these provinces, slowly wended the train crowded with summer school and citizen excursionists. Stops were made at Morrissey's Rocks, tunnelled for the passage of the Intercolonial, at Metapedia, where the club house of that famous Restigouche Salmon Club is found, at the Big Rapids, and at Assametsquah where made. Fatigued yet delighted the party returned to Campbellton at 7.30 o'clock. The late return caused many to be late at the evening lecture. The subject of this evening talk was "The Salmon and Salmon Fishing of the Restigouche" by Prof. G. E. Prince, Dominion Fishery Commissioner. The evolution of the salmon with his life history was given, each stage being clearly illustrated with views projected by an electric lantern.

Wednesday brought us to the business meeting of the Session when officers for the ensuing year were elected. The election resulted as follows:—

President—Walker C. Murray, M.A., Dalhousie University, Halifax, N. S.

Vice Presidents—W. R. Campbell, County Academy, Truro, N. S.; G. U. Hay, M. A., Editor Educational Review, St. John, N. B.; Jas. Landrigan, Queen Square School, Charlottetown, P. E. I.

Secretary—Treasurer—J. D. Seaman, Prince Street School, Charlottetown, P. E. I.

Directors—J. Britton, Normal School, Fredericton, N. B.; A. Cameron, County Academy, Yarmouth, N. S.; G. J. Oulton, M. A., Grammar School, Moncton, N. B.; L. W. Bailey, Ph. D., New Brunswick University, N. B.; W. R. Campbell, M. A., County Academy, Truro, N. S.

After considerable discussion as to the relative merits of several places it was decided that provided suitable arrangements could be made for the accommodation of the school, the meeting in 1900 would be at Bear River N. S. This being the home of the cherry tree, and the school meeting in the cherry season, members are already in anticipation feasting on the luscious fruit.

Of all the evening meetings that of Wednesday evening was the most enjoyable. J. Boyce Scott, electrician of the I. C. R. and a very wizard in microscopy, entertained the school with an exhibition of natural curiosities as seen through the microscope. His instruments are unquestionably the very finest in the provinces and the excellent slides are unsurpassed. From 8 o'clock to 10.30 there was a continuous stream of interested scientists passing by and taking in turn their view of the objects presented.

Each succeeding year the school grows in interest and numbers. The enrollment this year exceeds that of any previous year, being now 207. Campbellton N. B. Aug. 3rd 1899.

PAUPERS' CORPSES

Cannot be Buried in a Proper Manner in a

MONTREAL CEMETERY

The Residents of the Vicinity Are Complaining of the Bad Odour.

MONTREAL, Aug. 3.—Residents of the vicinity of Cote des Neiges Cemetery complain of an odour which comes from the plot where paupers' bodies are interred in the cemetery. These bodies are buried in excavations about twelve feet square, and coffins are piled on top of one another with a thin layer of earth between, until it is filled.

The cemetery authorities explain the matter as follows:—

This cemetery did not receive a single cent for the two thousand bodies buried in the free graves last year from the friends, from the city, from the Government, from the parishes or from anybody else.

We simply bury those bodies for charity, and from the large proportion of free burials we have to make the interments as simple and inexpensive as possible. The cemetery is owned by a private corporation, and it would simply be ruined if it had to provide a separate grave for every single interment. What we do is this: We have a square pit some twelve feet square excavated and the coffins received of people for free interment are placed in a row along one side. When the row is complete a few inches of soil is placed on the lids and another tier put in, and so on, until within three feet of the top of the pit, when the tier is covered up as far as possible and a second tier begun. When the pit is filled, a mound is levelled over the top and the limits of the mound marked out by stakes.

We do our best to avoid causing any

The farmer is supposed to be about as healthy as it is possible for a man to be. People smile at the idea that a farmer can ever be ill. His occupation is supposed to be an assurance of good health. The contrary is frequently the case. He is the most hard worked of men, and the hardest working man above all others who needs to take care of his health. Frequently the farm is in a malarial district. The result is malarial troubles, liver complaint, rheumatism or neuralgia.

The best of all medicines for hard-working men and women is Dr. Pierce's Golden Medical Discovery. It invigorates the liver and purifies the blood, driving out the poisons that are responsible for malaria, and the acids that are responsible for rheumatism. It is the greatest of all blood-makers, flesh-builders and nerve tonics. It strengthens the muscles and vitalizes every organ. It brings sweet slumber at night and mental and physical activity during the day. It gives zest to the appetite and makes the digestion perfect. The man or woman who resorts to this wonderful medicine whenever the body is out of sorts will be able to do almost any amount of work without danger to the constitution. Thousands have testified to its marvelous merits. Medicine dealers sell it.

"Your Golden Medical Discovery" cured me of a severe case of poisoning of the blood," writes Mrs. Selia Ricca, of Coast, Santa Cruz Co., Cal. "Boils one after another would break out on my arms, and were very painful. I have tried the loudly praised Sarsaparillas without any benefit whatever, and until I took your 'Discovery' I did not get well. That was two years ago, and I have not had a boil or sore of any kind since."

The wise mother looks after the health of every member of the family. In this she cannot have a better aid than a copy of Dr. Pierce's Common Sense Medical Adviser. It contains 1000 pages and over 300 illustrations. It tells all about the home-treatment of ordinary diseases. It used to cost \$7.50 a copy; now it is free. For a paper-covered copy send 31 one-cent stamps to cover postage and mailing only, or 50 stamps for cloth binding. Address: The World's Dispensary Medical Association, Buffalo, N. Y.

noyances. The free lot is in a remote part of the cemetery and as soon as a tier of coffins is complete we have a few cart loads of earth thrown in it. The foremen are also instructed to keep the excavation covered with planks, and to a door of the little house locked. But the bodies are coming in all the time. There were some put in this morning, and others are coming up this afternoon. Occasionally, the coffins are very offensive when received, as in the case of bodies found drowned. As I have explained, we cannot afford to cover each coffin with earth as it is received.—Star.

MAKES THOUSANDS.

English Firm Takes the Gaspesia Off His Hands at a Good Profit.

HALIFAX, Aug. 2.—Capt. Farquhar, who bought the steamer Gaspesia at St. John's, Nfld., for \$20,000, made \$13,000 on his bargain. An English firm purchased the steamer from him, Mr. Bacon, the New York agent of the new owners, arrived at St. John's yesterday to pay over the money to Capt. Farquhar. The name of the English firm purchasing the steamer is not given out. Capt. Graham of New Glasgow, bid \$26,500 for the Gaspesia. Browning Bros., of St. John, who libelled the Gaspesia, have appealed from the full bench of Newfoundland, to the privy council. The full bench cut their claim down \$6,000. Their steamer, the Kita, towed the Gaspesia to St. John's. They are again the agents of the ship.

Capt. M. Yates has just returned from St. John's, where he was looking after a little claim of his own against the steamer and cargo. He goes to England shortly.

The Manifold Uses of Electricity.

In all sorts of portable tools, such as drilling, riveting, power chipping, power caulking, countersinking, and tapping, the motor is far away ahead of compressed air, steam, rotating spirals or any other systems; and there is no reason why portable riveters and punches should not be driven electrically, too.

On board ship, there is a large opportunity for the introduction of electric control of steering gear, capstans, winches, pumps, and all sorts of discharging gear. In men-of-war electricity is also applicable for working the guns, turrets, loading gear, and similar mechanisms. One obvious advantage is that the transmission system—namely, the motor, can be very easily arranged in duplicate, so that a shot is not so likely to cause disablement.

A WRONG IDEA OF... DYSPEPSIA

Throws all the Blame on the Stomach—The Real Seat of Trouble is the Intestines—The Permanent Cure is Dr. Chase's Kidney-Liver Pills.

It is an old idea long since exploded that digestion is confined to the stomach. No modern scientist denies that by far the greater part of digestion and the more difficult part takes place in the intestines. This explains why dyspepsia is never really cured by preparations which merely aid stomach digestion and act only on the stomach.

This fact also explains why Dr. Chase's Kidney-Liver Pills have been so remarkably successful as a cure for the worst forms of dyspepsia and indigestion.

Dr. Chase's Kidney-Liver Pills act directly on the kidneys, liver and bowels, and give new tone and vigor to the intestines, and make them able to perform their work of digesting the substances on which the stomach has no effect.

Stomach treatment may do well enough for slight indigestion, but if you have chronic indigestion or dyspepsia of a serious nature you can profit by the experience of scores of thousands who have been permanently cured by using Dr. Chase's Kidney-Liver Pills. One pill a day, after a box at all dealers, or Edman, Bates & Co., Toronto.

ELECTRIC ENERGY

To be Developed at Niagara Falls for the

QUEEN CITY OF CANADA

Three Million Dollars to be Expended to Develop 100,000 Horse Power.

TORONTO, Ont., Aug. 2.—Electric Energy developed at Niagara Falls is to be transmitted to Toronto for manufacturing and lighting purposes. The authority for the statement is Mr. Wallace Nesbitt, Q. C., Canadian counsel for the Canadian Niagara Falls Power Company. Mr. Nesbitt returned yesterday from Niagara Falls, N. Y., where he was summoned to consult with Colonel Rankin, secretary of the company, and Professor George Forbes F. R. S., of London, England, the great electrical engineer. At the meeting of the three gentlemen, the question of transmission of power to Toronto was discussed, and it is understood that the decision was favorable to Niagara Falls Power Company. Mr. Nesbitt was seen at his residence by a reporter, and while reluctant to enter into details, he stated positively that the company which he represented intends to transmit electricity to this city.

"Will the cable system or the overhead wire be adopted?" was asked.

"I can't say as to that," replied Mr. Nesbitt, "but my impression is that it will be the overhead wire."

"Will the power be developed on the Canadian side?"

"Yes, the company proposes to develop 100,000 horse power, involving an expenditure of from two to three millions of dollars. The site of the works will be opposite the monastery, and I believe boring will be begun this week."

"What does Prof. Forbes think about it?"

"I cannot tell you that. He and Mr. Rankin were deeply immersed in the discussion of technical details when I left the Falls. Prof. Forbes will remain there a few days, longer but on Saturday he sails for India having been commissioned by the Government there to prepare for the construction of works in the Madras presidency for the development of electric energy. The works, I am told, will be on a scale equal to those constructed by the Cataract Power Company on the American side of Niagara Falls. Prof. Forbes, as you probably know, is a great authority on electricity. He has just returned from Egypt, where he spent eight months drawing up plans for the development of the water-power of the second cataract of the Nile. The power is to be used for irrigation purposes, and for long distance transmission, and Prof. Forbes undertook the work at the request of the British Government."

HALIFAX EXHIBITION.

Specially Low Rates for the Big Fair at Halifax—Engagement of an Eminent Horticulturist.

The Nova Scotia Exhibition Commission have decided upon a policy in respect to Railway transportation rates, which places exhibitors in portions of the Province distant from Halifax in a decidedly better position than that which they have occupied in the past. Hitherto, the central counties' exhibitors had a great advantage over those living at the extremities of the Province, inasmuch as they could have their exhibits carried to and from the Exhibition at a greatly less cost. The conditions have been better equalized by the plan, which the Commission have adopted. In years past the rate has been a single fare for exhibits going and returning, and this arrangement still continues with the new arrangement, that the rate charged at Middleton on the Dominion Atlantic Railway shall apply to all points further west, and that the rate charged at New Glasgow shall apply to all points further east, and that the rate charged at Oxford shall apply to all points further north on the Intercolonial Railway, always within Provincial boundaries. The commission will refund to the exhibitor from any part of the Province

beyond the points named, on the return of the exhibit to the starting railway freight station, any excess of freight paid beyond the rate charged at Oxford, New Glasgow or Middleton. The Commission have had the good fortune to secure the services of Prof. Craig, lecturer on Horticulture at the Iowa Agricultural College, to act as judge of fruit at the Exhibition at Halifax. Prof. Craig has a national reputation as a horticulturist, and no better selection could have been made. During the week of the Exhibition he will deliver a series of lectures on horticulture, which will be replete with information to fruit growers, which will add much to the value of the show from an educational standpoint. The first lecture will be delivered at a reception in Horticultural Hall, Exhibition grounds at 11 a.m. Thursday, Sept. 25th. Prof. Sears of the Nova Scotia school of Horticulture, Wolfville, will cooperate with Prof. Craig in giving object lessons in spraying, etc., and will have a complete outfit of spraying apparatus, ingredients for spraying, microscopes, etc., illustrating the whole method of dealing with insect pests.

How Japanese Catarrh Cure Cures Nasal Catarrh.

Japanese Catarrh Cure is a penetrating, soothing, and healing pomade, which is inserted up the nostrils by a small carrier's bulb, and the patient breathes the soothing medicine through the nostrils and the nasal channels open up, the scum-up feeling in the head leaves, and the person commences breathing freely through the nose. The dull pain around the head ceases. Continual use for a short time soothes the mucous membrane until the mucus and inflammation are all gone. The inside of the breath passes away, and the sense of smell and hearing return. The drooping in the throat is permanently checked, and the nose does not stop up towards night. The discharge from the nose grows less and less, and finally stops altogether. It does not drive the disease into the throat or lungs or into the ears, as so often is done by washes, douches, and the temporary relief caused by powders and snuffs which contain cocaine and other harmful alkaloids, which relieve at the time, but give rise to a false security. Japanese Catarrh Cure is a thorough antiseptic, it cleanses and healing in its action, and soothes the minute applied. Six boxes are absolutely guaranteed to cure any case of nasal catarrh, or money will be returned. A free sample will be sent to any person suffering from this most dangerous disease. Enclose 5 cent stamp. Sold by all druggists. 50 cents. 50c for 50c, or by mail, Address: The Oriental Balm Co., 121 Church Street, Toronto.
