This Will Interest Stomach Sufferers

SAYS INDIGESTION COMES FROM AN EXCESS OF HYDROCHLORIC ACID

A well-known authority states that stomach trouble and indigestion are nearly always due to acidity—acid stomach—and, not, as most folks believe, from a lack of digestive juices. He states that an excess of hydrochloric acid in the stomach retards digestion and starts food fermentation, then our meals sour like garbage in a can forming acid fluids and gases which inflate the stomach like a toy balloon. We then get that heavy, lumpy feeling in the chest, we eructate sour food, belch gas, or have heartburn, flatulence, water-brash, or nausea.

He tells us to lay aside all digestive aids and instead, get from any pharmacy four ounces of Jad Salts and take a tablespoonful in a glass of water before breakfast while it is effervescing, and furthermore, to continue this for one week. While relief follows the first dose, it is important to neutralize the acidity, remove the gas-making mass, start the liver, stimulate the kidneys and thus promote a free flow of pure digestive juices.

Jad Salts is inexpensive and is made from the acid of grapes and lemon juice, combined with lithia and sodium phosphate. This harmless salt is used by thousands of people for stomach trouble with excellent results.

The Witness For The Defence

FROM THE FAMOUS ENGLISH PLAY

BY A. W. E. MASON

"GUILTY?"

Would it be "THAT" when the jury came in?

Out there in the Indian Jungle, her beast of a husband, slain. The evidence all against her Her love, her hopes, shattered and buried in England. The verdict would matter little after all.

Then came the witness for the defense: Surprise, suspense, scene after scene of appeal to the heart that is simply overwhelming; and an end—well, this is one picture you won't dare miss.
