

To End a Cough In a Hurry, Mix This at Home

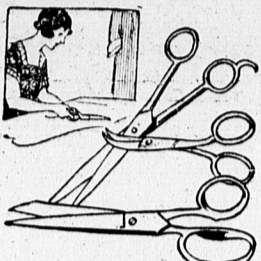

To end a stubborn cough quickly, it is important to soothe and heal the inflamed membranes, get rid of the germs and also to aid the system inwardly to help throw off the trouble.

For these purposes, here is a home-made medicine, far better than anything you could buy at 3 times the cost. From any druggist, get 2 1/2 ounces of Pinex. Pour this into a 10 oz. bottle, and add plain granulated sugar syrup or strained honey to make 16 ounces. This takes but a moment, and makes a remedy so effective that you will never do without, once you have used it. Keeps perfectly, and children like it.

This simple remedy does three necessary things. First, it loosens the germ-laden phlegm. Second, it soothes away the inflammation. Third, it is absorbed into the blood, where it acts directly on the bronchial tubes. This explains why it brings such quick relief, even in the severe bronchial coughs which follow cold epidemics.

Pinex is a highly concentrated compound of genuine Norway Pine, containing the active agent of creosote, in a refined, palatable form, and known as one of the greatest healing agents for severe coughs, chest colds and bronchial troubles.

Do not accept a substitute for Pinex. It is guaranteed to give prompt relief or money refunded.

THOSE FIVE ACRES

Sir:—I am glad to find at least one man not afraid to protest against the unpardonable negligence of the government officials with regard to that venerable pile, government house; and another not afraid to protest against the proposed spoliation of the domain thereto appertaining. To whom does this property belong? I will answer that question. It was deeded in perpetuity—not to the Province—not to the Governor—but to the people of Prince Edward Island for the use of governors while in office. Can Premier Lea sell what he does not? Unhesitatingly, NO. Can any group of men, however wealthy, buy one foot of our long cherished government property? Again unhesitatingly NO.

Are there no other suitable sites available? What about the many beautiful properties near the new sanitarium? And from an economical point of view, that is where the new hospital ought to be located because it will no doubt need a resident physician who could easily attend both institutions.

Now a word regarding government house. Should it be renovated. Surely it should, and this is the propitious moment to put it in proper condition for our new governor, Sir Charles Dalton. And moreover, I would go so far as to say that hereafter whoever the governor may be, he should be obliged to reside in government house during his term. This is the opinion of ninety nine percent of the owners of this sacred domain—the people of Prince Edward Island.

I am sir, etc. SENTIMENT NO. 2.
