Bordoni Thinks Of American Audiences As Grown Up Kids

NEW YORK, Jan. 21. American audiences to Irene Bordoni are "just like grown up kids in search of fun" and are among the most appreciative in the world.

The French actress has found that by "letting an audience know you are working hard to amuse, it is quick to respond."

"This is one of the reasons I like the American stage so well. When I am on tour I find the audiences, especially in California even more responsive than those of New York."

French audiences are blase she says, but the English are like the American. No longer does Miss Bordoni appear on the French stage, but she goes to England occasionally and enjoys her work there.

"When I came to this country I had two weeks in which to prepare for the part I was to have in a revue with Elsie Janis," she relates. "I was not the star and didn't expect to be, because I knew I had to begin all over.

"I didn't know a word of English and I shall never forget the studying I did in those two weeks. Sometimes I studied all night. You would be surprised, too, to learn what a change I had to make in my acting.

"At first I had to speak very slowly and that was hard to do. There is so much difference in punctuation, intonation and enunciation. Even now the director has to help me with these problems during rehearsals."

She shops in Paris and New York for her gowns and other costumes. But most of her songs she finds in her home—E. Ray Goetz, her husband composes them.

Peters Road And Vicinity

Such weather! In the memory of our oldest citizens and weather prophets no winter can compare with 1926 in mildness and fair distribution of snow.

Just now the ringing of saws proclaims the fact that farmers have succeeded in hauling home their fire-wood for the year, and colossal piles of this finished product rear their forms above the adjacent surroundings.

Miss Bernice MacDonald who recently was a visitor to relatives in Halifax N. S. has returned home. Miss MacDonald spent a most enjoyable time, and is profuse in her admiration of this city with its many divisions. Mr. Hugh McPhee of Halifax, a veteran of the "Great War" and now a member of the Pension's Board, also came on a business trip to Charlottetown and accompanied Miss MacDonald to Peters Road, on a short holiday trip.

Mr. Richard Campbell a former P. E. Islander, but now located in Maidstone, Sask., arrived at his old home in Alliston, for a visit to his parents Mr. and Mrs. Alexander Campbell and the friends of his youth. Mr. Campbell looks very fit after his long residence in the West. We wish him a pleasant holiday season.

Mrs. John H. McKinnon is at present visiting at the home of her daughter Mr. and Mrs. George McDonald Peters Road.

Mr. John McLean formerly of Peters Road, has opened up a grocery store in Charlottetown. We wish him success in his new enterprise.

Mr. Norman Finlayson of Glen William received the sad news that his brother Mr. Daniel Finlayson located on the Pacific, was accidentally drowned by the upsetting of a boat, but the particulars are not to hand.

Farmers in this vicinity are much pleased with the results this season from the milk sold to the Cheese Factory at Sturgeon. The management there certainly deserves credit for the excellence of the work, and for the successful sale of the manufactured product. The determination of this plant to survive through depressing times, when similar factories were "Scrapped" shows the wisdom of having faith in this most important basic industry.

The ratepayers of Point Pleasant School District intend making extensive repairs to their school building and purpose having a Social in the near future.

There is no dearth of musical talent both local and instrumental, and we predict a good time for all lovers of the "Artistic" and also for those who favor tripping the light fantastic toe, in the Terpsichorean art.

And now I will relate an anecdote which happened in Scotland's merry days, which, I hope, no Scotsman will question. The chieftain of a certain clan prepared a grand feast to which the several chieftains with their wives were invited. Nearly all had arrived, with the exception of the Chieftain of Clan McLean. So the host concluding that he was not coming, seated his guests at the table. Just then Chieftain McLean arrived, and on his entering the room, the host said "Chieftain McLean, had I known you were coming I would have reserved for you the head of the table. To which McLean replied "Any place McLean sits is the head of the table."

GASOLINE RAIL MOTOR CAR SENT TO ALASKAN RAILROAD.

PHILADELPHIA, Jan. 21.—Traffic problems on the railway in the land of the totem pole have resulted in shipment from this city of the pioneer gasoline rail motor car for the Alaska Railroad.

There it will be placed on the rails and will proceed to Anchorage where it is to be used for short distance runs. The car is a combination baggage and passenger vehicle, and is specially equipped floor as well as storm sashes.

DECLARES EVERYONE SHOULD BE MADE TO SING BY LAW.

LONDON, Jan. 21.—Everybody should be compelled by law to sing when are young, because of the disciplinary effect of music, in the opinion of Sir. Hugh Percy Allen, director of the Royal College of Music.

"And folk shouldn't discontinue singing when they have grown up," he said. "We talk too much and sing too little. We listen too much to music and do not sing enough of it. Music is one of the very best disciplines in the world. Singing teaches the singer courage, and combined singing, humility."

Game In Northern Alberta Very Scarce

(Canadian Press)

WINNIPEG, Man. Jan. 21 — In Northern Alberta the government officers and the heads of the Alberta Game Protective association, state that grouse is so scarce this winter that it is almost extinct. This they ascribe to a cycle that periodically strikes certain birds and small animals every seven years and exterminates them. This cycle is said to be due this year and rabbits have been particularly affected in Manitoba.

Due to the measures taken by the Manitoba legislature last year in declaring a closed season on prairie chicken, it is not believed that there will be any shortage of this game next season. According to J. H. Evans, deputy ministers of agriculture for Manitoba, prairie chicken has a number of enemies against which it has a hard fight for existence.

First there is the crow which is the greatest of all its enemies and devours the eggs of the chicken voraciously. Then there is a newly discovered disease attacking the birds and the department of agriculture at Ottawa has secured specimens and given them to research bureaux to find out what is the nature of the disease, with a view to attacking it. Then the sportsmen, who use automobiles, have proved a serious menace to chicken and grouse. They can get much nearer the birds in their hunting trips and move quicker and this enables them to bag larger numbers in the fall.

Mr. Evans stated that it was thought at one time that the Hungarian partridge numbers of which have been released in Manitoba, were driving out the native bird, but this has been found incorrect, as the chicken and grouse have come back to places where the imported partridge makes its roving quarters and does not seem to be afraid of the newcomer.

The Northern Alberta Game Protective League has announced that there will be no grouse shooting in that province this year and for some time after. The cycle, which affects all animals is now coming down from the north and the grouse and rabbit are reported to be fast disappearing.

RUBBER OF DOMESTIC SOURCE IS MANUFACTURED IN TEXAS.

MARATHON, Tex., Jan. 21.—In this little southwest Texas town domestic rubber is manufactured from the guayule plant, which grows wild all over this section. A factory, under the spur of high rubber prices, has reached an output of a ton a day.

The guayule is a shrub, three to five feet high, and resembless sage brush. Beneath its outer bark is a sap, known as latax, from which the rubber is made.

The shrub is put up in bales, like hay and the sap is pressed out in a machine called a pebble mill. About 30,000 gallons of water, supplied by wells, is required to produce a ton of rubber. The plant is gathered, root and all, and brings about $40 a ton at the factiry here.

The finished product comes from the presses in sheets about three inches thick, 36 inches long and 15 inches wide.
