REMEMBER WHEN By The Canadian Press The Canadian Amateur Hockey Association's proposals to allow professionals in one branch of sport to play as amateurs in another was defeated by the Amateur Athletic Union of Canada nine years ago today.

POSTPONE Meeting Until Tomorrow The meeting of the Charlottetown Playground Commission which was scheduled for this evening has been postponed until Wednesday evening at 7 p.m. at the Y.M.C.A., it was learned last evening.

A PLAIN FACT SKATING IMPROVES YOUR HEALTH YOUR PLAYGROUND TO NIGHT THE FORUM

IN THE CORNER

Things are shaping up a little more definitely on the hockey front and now it is rumored that a four team City League is almost a certainty with the two Colleges, Navy and Legionnaires taking part.

The clubs should produce quite a brand of interesting, hard-fought hockey. On the two college squads there is material galore and in the case of the other two they will have the advantage of using boys who have now received their discharges after meritorious service in the various forces.

So taken all in all fans should be in for another winter of hockey just as good as was witnessed last year and that was by no means slow variety. Officials connected with the project are working quietly but nevertheless diligently the past several weeks in an endeavor to get things lined up and it is expected that a definite announcement will be forthcoming within the next few days or so.

Just how many teams will take part in the league is as yet not known but again they come into the local sports picture—the two colleges, P.W.C. and S.D.U., are reported to be holding negotiations with the Y.M.C.A. who likely is another active member of the project.

It appears that a full winter's sports program is in the making all. For awhile the picture looked dark indeed but as is usually the case, the Navy and Legionnaires sports followers will have very little slack time on their hands.

Just what has happened to the Toronto Maple Leafs of the National Hockey League is a matter which is being local hockey followers. It is likely that they are not clicking and it will not be long before a drastic shakeup might be announced in connection with the team on Sunday.

Montreal Canadiens, on the other hand, despite the general opinion of the other teams are still proving tough opposition. They are up to the task and are proving to be a different story this year. They have taken two out of three from the Irvines already this year and it appears as if the "Ives" has been found.

But as the season rolls along and the returned servicemen gradually hit their regular playing schedule, it is not unlikely that the teams are far more powerful than last year and it will behoove anyone to think the teams such as New York and Toronto with wealth of talent they have, will long remain in the unenviable position they now occupy. There must be a reason and the answer will likely soon be found.

It goes without saying that the Cleveland Barons of the American Hockey League, or any other professional hockey club for that matter, is not in the business for sentimental reasons.

However, there is good reason to believe that the acquisition of Alex Motter, who starred for several seasons with the Detroit Red Wings, both as a forward and a defenseman before joining the U.S. Coast Guard, by the Barons recently had more than a little sentiment attached to the deal, says Doug Vaughan of the Windsor Daily Star.

The story goes back to several years ago. At that time, Motter was playing with Detroit and they were engaged in a pre-season exhibition game with the Cleveland team. Motter was carrying the puck when he crashed into Dick Adolph, Cleveland defenseman.

Adolph fell to the ice, badly injured. After the game Motter went to the management of the Cleveland club and offered to play for the Barons until a replacement could be found. The offer, of course, was made with the per-

ATTLEE SPEAKS

(Continued from Page 1)

He outlined the problems facing Britain and warned against any one believing that we in Europe are old and effete.

With reference to the recent Olympic conferences at Washington with Mr. King and Mr. Truman, the British Prime Minister said he had no doubt the Canadian Parliament would be discussing the matter in due course.

"I know the problem has presented itself to all of us as one of the great questions which confronts all of us today; that problem is—how can we secure peace?" he said.

"You cannot deal with these matters by considering such a question as that of the atom bomb by itself. The particular problem of certain armaments must be considered in the light of the general question of securing world peace."

"He believed that the British Commonwealth of Nations, bound together by spiritual but not material ties, offered the world an example which should be noted and followed. The strands which composed the ties were the acceptance of the rule of law, a belief in and the practice of the principles of democracy, and a common standard of moral values."

MANUFACTURING

(Continued from Page 1)

4,400,000,000 rounds of small arms ammunition and more than 2,000,000 tons of chemicals and explosives.

"Our output of automotive and armored fighting vehicles totaled 800,000. Our shipyards produced more than 8,000 ships of all kinds, and approximately 1,000,000 were major merchant and naval units."

"The signals and communications industry has produced instruments and equipment valued at more than \$400,000,000. The value of construction projects undertaken by the Department was \$770,000,000."

"This includes defence projects and housing. The general purchasing division of the Department, which is responsible for the purchase of clothing, food, fuel and a wide variety of personal equipment, had made purchases to the value of \$3,900,000,000 at V-J Day."

Only 34 per cent of Canadian-made war material was used in the United Kingdom and other United Nations one per cent.

Approximately 60 per cent of all production in Canada in the last six months was for war purposes, said the minister in addition to the \$770,000,000 in investment which was heavy, the United Kingdom and other United Nations one per cent.

"In 1944 the effective capacity of pig iron production was 1,800,000 tons compared with 1,500,000 tons in 1933. The peak wartime production of ingots and castings was 3,200,000 tons annually, compared with a pre-war annual production of 1,600,000 tons."

"There has been an increase in manufacturing capacity in iron and steel products of all kinds of 166 per cent. Production of non-ferrous metals was about 1,500,000 tons annually at the wartime peak, which is nearly three times the pre-war annual production."

"The most significant increases have occurred in the production of iron, steel, brass and nickel, magnesium and tin, previously imported into Canada. The number of board feet of wood produced in 1944 was 2,900,000,000 compared with 4,900,000,000 at the wartime peak. This increase has been achieved despite severe labor shortages."

The increase in the manufacturing of chemicals and allied products is estimated at 25 per cent. One of the most noteworthy achievements in this field has been the development of the successful synthetic rubber industry.

Synthetic rubber now is being delivered from the government-owned plant to commercial markets at a rate in excess of 40,000 tons a year. The expansion of industrial capacity and particularly the production of aluminum to meet war requirements, has resulted in an expansion of the installed capacity of central electric stations from 2,500,000 horse power in 1939 to 8,000,000 horse power today."

Mr. Howe paid tribute to the work of the men and women in industry, both management and labor who had made the production possible.

The world's largest liner entered Halifax harbor at 1 P.M. (A.S.T.). Overcast skies cleared, and brilliant sunshine broke forth as R.C.A. F. Hudson bombers flew overhead in formation and Canada's newest tripartite-class destroyer, H.M.C.S. Monac, escorted the ocean mistress to the quayside of Jack Adams, manager of the Red Wings.

The Browns, who would have been supplied deftly without Adolph, gratefully accepted Motter's offer. Alex played two games with the Barons until they were able to obtain a replacement.

Labor Wins In Australian Prov.

(By The Canadian Press) MELBOURNE, Nov. 19.—(CP Cable)—The Commonwealth of Australia today has Labor Government in five of its six states following announcement of the results of the Nov. 10 elections in Victoria. The Federal Government also is Labor.

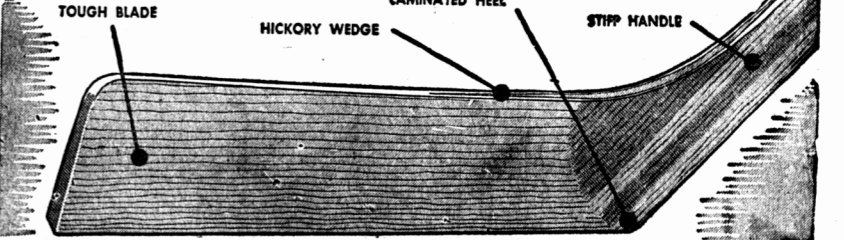

South Australia with a Conservative-Independent coalition, is the only state without a Labor administration. Although a record aggregate vote was cast for labor in Victoria, it was uncertain until last night whether the Labor party would have a working majority in the legislative assembly. Labor leader John Cain consequently delayed until today accepting the commission of Governor Sir Winston Dugan to form the first Labor Government for 10 years in the state.

Col. Gibson expressed his appreciation for the privilege of welcoming the troops on behalf of the people and Government of Canada. "The record of your exploits overseas has thrilled us all in Canada, and now we welcome you home with pride and gratitude," Col. Gibson stated. "Pride in your heroic record, and gratitude for the services you have rendered not only to Canada but to the whole world."

The new cabinet will then be sworn in and is expected to hold its first meeting this Thursday.

The assembly will resume sitting next March when the Labor Government is expected to ask it to deal with social service legislation covering employment, education and health. Mr. Cain probably will also ministerial portfolios Wednesday after Labor members draw up a panel of names for selection.

The new cabinet will then be sworn in and is expected to hold its first meeting this Thursday.

Made to "STAND THE GAFF" of "BIG TIME" Hockey

IT is the principle of wood laminations, like those in the amazing "Mosquito" Bomber, that gives C.C.M. Laminated Hockey Sticks, with their 5-ply heel, their great strength, surprising lightness, ideal stiffness and all-important liveliness.

The parts of a C.C.M. Laminated Hockey Stick, as depicted in the above illustration, are:

THE BLADE—Gets most of the rough play of hockey, is made from carefully selected and seasoned straight-grain, second growth rock elm which is noted for its tenacious fibrous structure and its ability to withstand shock and abuse.

THE HANDLE—Made of tough, straight-grain ash or of laminated hardwoods, the handle of the C.C.M. Laminated Hockey Stick is made to stand up to the slugging, checking and shooting a stick gets in any hockey game.

THE LAMINATED HEEL—This is where the C.C.M. gets its great strength and liveliness. The heel is a lamination of five layers of wood held permanently together with moistureproof glue. Two of these laminations are the dovetail of the blade, two are the dovetail of the handle and the four are further reinforced by C.C.M.'s patented construction with hickory wedge. At this point of lamination the ice-lays of the sticks are set and cannot change.

If you are going to play hockey this winter equip yourself with C.C.M. Laminated Hockey Sticks in the ice-lay that suits your best.
