A Modern, Sanitary Chemical Closet for \$10.00 Think of it!

You need the Beach Odorless Chemical Closet in your home, there is no dodging the fact, you know you need it—the sanitation of your home, your own health and the health of your family demands it, and not only this but the comfort and convenience it affords makes it well worth many times its price.
Why should you hesitate? Why don't you get it? Surely it's not the price of this sanitary closet that makes you wait? It cannot be the cost of installation or of up-keep, because there's none. Well what is it?
Are you jeopardizing the health of yourself and family, are you tolerating the germ-breeding, ill-smelling, inconvenient outdoor closet on your premises, just because you cannot be convinced that we can supply you with a thoroughly modern, perfectly odorless chemical closet for \$10.00.
If this is the cause of your delay, call at our store today and we will banish all your doubts—we will convince you that the Beach Odorless Chemical Closet is far superior to any description we can give—it's a marvel for the money. Price complete \$10.00.

Deering New Ideal Binder

The Deering new ideal binder is built with special features to adapt it to Island farm conditions, being exceptionally light in draft, and very strong in construction.

The main frame is made of high carbon steel, thoroughly braced; hot riveted together, which makes it practically a steel unit, strains cannot twist it out of shape, hence the cutting, elevating and binding mechanism are always held in proper positions.

Much of the light draft of the new ideal binder is due to the ball and roller bearings, at all points to reduce friction.

In the construction of the Deering new ideal binder, the following new features are combined, third packer, third discharge arm, seventh roller floating elevator, platform and elevator canvas tightening and loosening device. This is of particular value in the morning and at night, as it saves the trouble of unbuckling the canvas straps.

The Deering knottor is thoroughly reliable. It was designed and made right at the start; therefore has not been changed, really good serviceable knottor—one that will do the same satisfactory work every day of harvest.
