Mr. Stuart held Pastorates in the Maritime Provinces and in 1890 accepted the pastorate of the Church in Nutley, N. J., which he held until about five years ago when he retired. Geo. Ayers presented Mr. and Mrs. Wright with a beautiful oak folding arm chair. Although taken by surprise, Mr. Wright responded in a few well chosen words. After this "Best be the tie that binds was sung and Mr. Ayers led in prayer. Ice-cream was served by the ladies, and after singing "They are jolly good fellows," the company dispersed in Bedouque. Use Less Shortening with

BEAVER FLOUR

YOU don't need so much shortening for Pies, Doughnuts, Layer Cake and Fancy Pastry, when you use "Beaver" Flour. It's BLENDED.

YOU see, it's this way. Ontario wheat makes what is usually known as "pastry flour". It has the delicacy of flavor—the fine, even texture—the whiteness and lightness—that a flour must have, to make good Pie and Cake.

PURELY western wheat flours don't make good pastry—they are too "strong", too heavy. Even Bread, made of purely western wheat flour, is tough, full of holes, and uninviting in appearance and flavor.

"BEAVER" Flour contains the fine Ontario wheat, with which is blended the proper proportion of Manitoba wheat to increase its strength, thus giving you all the DESIRABLE

qualities of the finest pastry flour, with the additional value of making a big loaf of bread with the true home made flavor.

"BEAVER" Flour is the ORIGINAL BLENDED FLOUR—in fact, it is the only SCIENTIFICALLY BLENDED flour on the market.

"BEAVER" Flour is always the same in strength and quality—you know just how much to use for all kinds of baking—and you may rely on it to give the best result EVERY TIME.

ASK your grocer—he knows all about "Beaver", the original blended flour.

You Grow BIGGER and BETTER CROPS with UNMIXED Fertilizers

If you can grow a big crop without using fertilizers, you can grow a far bigger one, by using UNMIXED Fertilizers. If the quality of your produce is good, even without using fertilizers, it will be far better, when you use UNMIXED Fertilizers. This statement is not misleading in any way—it is founded on fact, from the actual, working successful results of scores of leading Island farmers.

For these fertilizers give the land a better "heart" than can any other plant food. Being un-mixed, they can be applied to any field or any section of a field, to bring it up to standard fertility and prepare it for the particular crop intended.

No guesswork, no chances, no waste or useless work when you use UNMIXED fertilizers. You are SURE of a bigger and better crop—and better prices for it.

Better see about getting your land ready for a bumper crop this year. Write for our free booklets on farming and results of experiments, showing the successes other Island farmers have made with UNMIXED FERTILIZERS. Write TODAY.
